**Definition**

Transition rate is the proportion of students that progress from the final grade of one level to the first grade of the next level, expressed as a percentage of those enrolled in the final grade of the preceding school year.

**Method of calculation**

Divide the number of new entrants in the first grade of the specified higher cycle or level of education by the number of students enrolled in the final grade of the preceding cycle or level of education by the number of students enrolled in the final grade of the preceding cycle or level of education in the previous school year, and multiply by 100.

**Formula for calculating Transition Rate from Primary to Upper Primary**

$$\text{Transition Rate [ Primary to Upper Primary ]} = \frac{(\text{Enrolment in class VI in current year} - \text{Number of Repeaters in class VI in current year})}{\text{Enrolment in class V in previous year}} * 100$$
