

## **Procedure to implement U-DISE 2012**

### **The given below procedure is for State Level MIS persons:**

The basic requirement for implementing U-DISE2012:

1. You must have STEPS/DISE@S 2011-12 data for your state in your machine in oracle
2. You must have SEMIS 2011-12 data (.dmp file) for your state
3. Import SEMIS data into the STEPS user

Make a folder in C:\ as U-DISE

Make a sub-folder in C:\U-DISE as DiseAsst

Make a sub-folder in C:\U-DISE\DiseAsst as SchData

The folder structure will be: C:\U-DISE\DISEASST\SCHDATA

Extract the contents of the downloaded file U-DISE\_SCHDATA.RAR into C:\U-DISE\DISEASST\SCHDATA

Execute the file C:\U-DISE\DISEASST\SCHDATA\UDISESCH.EXE

Login into the user having STEPS/DISE@S Data and SEMIS Data

Select the District and Academic Year as 2011-12 and click on “Continue” button

Go to ‘Master-Prepare Database’ Menu and select “Create” option

Click on “Upgrade” button

After upgrading the database perform the Mapping of SEMIS data with DISE

After Mapping, you can generate the data for 2012-13 or initialize supplementary variables or define Master Entities

You can use Data Transfer Utility to transfer the data for the selected District(s) or Block(s) from one machine/user to another machine/user.

For any clarification you can drop a mail to [mr.nbhatia@gmail.com](mailto:mr.nbhatia@gmail.com) or call on 09811280890 (Naveen Bhatia).
