Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system was, therefore, accorded priority from the very beginning of the District Primary Education Programme (DPEP) in 1994, as a result of which the District Information System for Education (DISE) was developed by the National Institute of Educational Planning and Administration (NIEPA).

Importance of an Educational Management Information System (EMIS) was reiterated when Sarva Shiksha Abhiyan (SSA) was launched in 2001. SSA guidelines envisage development of a community-owned and transparent EMIS, and preparatory activities of the programme included substantial strengthening of MIS infrastructure in States.

Twenty five States & UTs have now adopted DISE and it is proposed to cover all states and completely replace the existing manual system of collection of educational statistics, in so far as elementary education is concerned, in a year or so. Information generated through DISE will then acquire status of official statistics.

The present volume presents the State Report Cards on more than three hundred variables for the year 2003-04. Most of the indicators are presented according to school category. Information presented in the volume is particularly valuable for implementing educational programmes like SSA in the decentralized context. Transition, Graduation, Survival and Grade-to-Grade Repetition rates are also being made available for the first time. I am confident that this data will be used in planning for good quality elementary education at different levels, and that data users, researchers and development planners interested in the Indian education system will find the volume useful.

I must take this opportunity to thank UNICEF, Delhi for consistently supporting EMIS activities since 1994, as well as NIEPA, especially Dr. Arun C. Mehta, Fellow, and his team, for bringing out the present publication.

Prof. Marmar Mukhopadhyay
Director

From the Director's Desk

I am happy to present *Elementary Education in India: Where Do We Stand: State Report Cards*, which is based upon the DISE 2004 data. In February last, NIEPA brought out *Elementary Education in India: Where Do We Stand: District Report Cards 2004* which contains large number of indicators spread over different aspects of universalisation of education. The amount of data that is being disseminated through the present publication is enormous and very rich in contents. The State Report Cards 2004 present a variety of state-specific indicators, many of which are being made available for the first time.

NIEPA is committed to provide professional and technical support to all the States and UTs of the country. We have been conducting workshops on DISE across the country. This has helped in improving the capabilities of both the state and district level MIS officers to a great extent. We plan to further intensify our capacity building activities in the year that follows.

I am confident that all the remaining States would be covered under DISE in a year or two. This is important in the light of the Government's decision to gradually replace the existing manual system of data collection by the DISE.

I thank the DISE team led by Dr Arun C. Mehta for bringing out the publication, which is of great significance. I hope that the researchers, policy makers, administrators and planners will find the publication informative and useful.

New Delhi
March 2005

(Marmar Mukhopadhyay)

Acknowledgements

For the last several years, NIEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The year 2004 State Report Cards are based on the data received from twenty five states. The publication presents not only the data up to elementary level but also brings in many new dimensions of elementary education into focus, including data on teachers in terms of their age, academic and professional qualifications, experience and type of in-service training obtained by them. It also incorporates data on children with disabilities, examination results, medium of instruction, students' flow including transition and retention rates, utilization of school development and TLM grants, and many other parameters on which not much information was available so far.

The State Report Cards are based on the data received from as many as 9,31,471 schools spread over 539 districts across 25 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers & data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, for consistently supporting EMIS activities ever since the inception of DISE. Shri K.M. Acharya, Joint Secretary and Ms Vrinda Sarup, Joint Secretary, Department of Elementary Education & Literacy played a very crucial role in facilitating the implementation of DISE in various states. The contribution of Shri Amit Kaushik, Director (EE & L) is also gratefully acknowledged.

I am thankful to Prof Marmar Mukhopadhyay, Director, NIEPA, for his encouragement. I appreciate the support that I have been receiving from my faculty colleagues from time to time.

I am also thankful to Shri M. K. Talukdar, Chief Consultant (MIS), TSG who played a significant role in providing professional support to the states in the implementation of DISE. The contribution of Shri Naveen Bhatia, Computer Programmer, in database management and Dr R. S. Thakur, Consultant in data scrutiny is gratefully acknowledged. Special thanks are due to Shri Shalender Sharma, Project Associate Fellow, for facilitating the preparation and design of State Report Cards. I also express my thanks to Mr. Pramod Rawat, Deputy Publication Officer and his colleagues, especially Mr. Sudhakar Mishra and Mr. Jai Prakash Dhami in the Publication Unit and Mr. P. N. Tyagi, Cartographer for extending all the help.

I hope that this publication will of value for education planners, policy formulators and researchers. Any suggestion for improvement is most welcome.

Report Cards: An Overview

1. Introduction

The recently launched *Sarva Shiksha Abhiyan* Programme envisages achieving goal of universal elementary education by 2010. In order to operationalize this premise into reality, considerable amount of educational and allied data is required. It was in this context that the District Information System for Education (DISE) was designed to provide district and sub-district level school data for planning, monitoring and review of various project interventions. The DISE data received from schools are computerized at the district level and disseminated up to the school level in various ways. The data capture formats; definitions and concepts used for data collection are available at <http://www.dpepmis.org> which is being followed uniformly across states.

2. State Report Cards

The State Report Cards are based on the data received from as many as 9,31,471 schools spread over 539 districts across 25 States & UTs. Except Haryana, the coverage in case of all other States & UTs in terms of number of districts is complete. Haryana could supply data only 17 out of 19 districts. Though all the districts are covered in Punjab but the collection of data largely confine to Government schools only.

The State Report Cards 2004 incorporate information on the following important areas of elementary education:

- a) Basic data on population, literacy and sex ratio and number of districts, blocks, villages, clusters and schools from which data is reported.
- b) Key data on elementary education in terms of number of schools, enrolment, and teachers classified by school-category and school management (Government & Private). Details of schools and enrolment in rural areas are also made available category-wise and management-wise.
- c) Grade-wise and level-wise enrolment along with percentage of over-age and under-age children at primary and upper primary levels of education in each state.
- d) Examination results for the previous academic session for the terminal class at primary and upper primary levels of education.
- e) Classrooms categorized into good condition, requiring minor and major repairs by school category.
- f) Number of schools by category and by type of building.
- g) Distribution of regular and para teachers by educational and professional qualifications and by school category.
- h) Sex-wise enrolment of children with disabilities in primary and upper primary classes.
- i) Gender and caste distribution of regular and para teachers and proportion of teachers undergoing in-service teacher training by school category.

- j) Enrolment by mediums of instruction and by school category.
- k) Sex-wise number of students benefited by various incentive schemes at primary and upper primary levels.
- l) Grade-specific repetition rate at primary and upper primary levels of education. This has been presented for the states having at least 2 years DISE data.
- m) Apparent survival rate in primary grades, transition from primary to upper primary level and retention rate at the primary level. Transition rate is presented in case of states having at least 2 years data and retention in case of districts in a state having 4/5 years DISE data.
- n) Performance indicators in terms of school category, enrolment distribution: total, Scheduled Castes, Scheduled Tribes, percentage of girls enrolment and schools with enrolment 50 and below, classrooms, schools with classroom 60 and above, single teacher schools, no female teacher schools, schools with attached pre-primary classes, number of beneficiaries under different incentive schemes etc.
- o) Quality indicators according to category of schools, teacher pupil ratio, average number of teachers, availability of female teachers, blackboards, school buildings, students classroom ratio, common toilets, girl's toilets, schools without building and blackboard, average number of instructional days, average number of days spent on non-teaching assignments during the previous academic year etc; and
- p) Number of schools received and utilized school development and teaching learning material grant by school category.

3. Methodology and Sources of Data

The Report Cards are based on the school level data provided by the State Project/Mission Directors to the Department of Elementary Education and Literacy of the MHRD. The data are first cross-checked and validated at the district and then at the state level. After the state is satisfied with the quality and reporting of the data, it is submitted to the national level for analysis, dissemination and reporting to various project management agencies. At the national level thorough scrutiny of state-specific data is undertaken and limitations, if any, are reported back to the states concerned.

3.1 Indicators and their Formulation

The Report Cards contain both absolute data and selected indicators. For the purpose of presentation and ease of understanding and interpretation, certain classificatory variables are regrouped. The following paragraphs provide information on the variables where regrouping has been done for the purpose of presentation in the Report Cards:

- a) School management: The State Report Cards present the data on management in terms of Government and Private category. The Government category includes all schools under the management of the Government (Central/State), Tribal and Social Welfare Departments and Local Bodies. The private category includes schools classified as Private Aided and Private Unaided. It may be noted that the DISE covers only recognized schools falling under the above categories. Unrecognized schools are not included in the DISE information collection system.

- b) School buildings: The classification of schools is also presented in terms of the number of school buildings and their type. Schools having more than one type of building structures are counted under the category of 'Multiple Type Building'.
- c) Teachers in position: The distribution of teachers in terms of educational qualifications has been presented separately for teachers and para teachers. The analysis of teachers' data for in-service training is presented for the regular teachers. Para teachers have been excluded from this analysis in the Report Cards.
- d) Mediums of instruction: The State Report Cards present the number of children studying through various mediums of instruction by category of schools. The data for four major mediums of instruction are presented in the Report Cards and if a state has more than four mediums of instruction, these have been presented under the category, 'Others'.
- e) Schools, villages, districts, blocks and clusters: The number of districts, blocks, villages and schools is based on the initialized entities in the DISE software. The list of districts, blocks, villages and schools is created at the time of DISE implementation and is updated annually.

The main indicators presented in the State Report Cards have been derived by using the following illustrative formulas. The derivations are given for schools in primary category only. The same method is applied for other categories and classificatory groups.

$$1. \text{ \% Single classroom schools} = \frac{\text{Primary schools having single classroom}}{\text{Total primary schools}} \times 100$$

$$2. \text{ \% Single teacher schools} = \frac{\text{Primary schools with single teacher in position}}{\text{Total primary schools}} \times 100$$

$$3. \text{ \% Schools with SCR} \geq 60 = \frac{\text{Primary schools having student classroom ratio} \geq 60}{\text{Total primary schools}} \times 100$$

$$4. \text{ \% Schools with pre-primary classes} = \frac{\text{Primary schools having pre-primary classes}}{\text{Total primary schools}} \times 100$$

$$5. \text{ \% Schools with common toilet} = \frac{\text{Primary schools having common toilet}}{\text{Total primary schools}} \times 100$$

$$6. \text{ \% Schools with girl's toilet} = \frac{\text{Primary schools having girl's toilet}}{\text{Total primary schools}} \times 100$$

Enrolment in primary schools having Education
Department, Local Body, Tribal Welfare Department
& Others as school management

$$7. \text{ \% Enrolment in Government Schools} = \frac{\text{Enrolment in primary schools having Education Department, Local Body, Tribal Welfare Department \& Others as school management}}{\text{Total enrolment in primary schools}} \times 100$$

$$8. \text{ \% Enrolment in single teacher schools} = \frac{\text{Enrolment in primary schools having single teacher}}{\text{Enrolment in total number of schools having primary category}} \times 100$$

$$9. \text{ \% No female teacher schools (teacher} \geq 2) = \frac{\text{Primary schools having teacher} \geq 2 \text{ but no female teacher}}{\text{Total primary schools}} \times 100$$

$$10. \text{ \% Students in schools without building} = \frac{\text{Enrolment in primary schools having no building}}{\text{Enrolment in primary schools}} \times 100$$

$$11. \text{ \% Students in schools without blackboard} = \frac{\text{Enrolment in primary schools having no blackboard}}{\text{Enrolment in primary schools}} \times 100$$

$$12. \text{ \% Underage \& overage children} = \frac{\text{Enrolment in Grades I-V below '6' \& above '11' years}}{\text{Total enrolment in Grades I-V}} \times 100$$

$$13. \text{ \% SC enrolment} = \frac{\text{Enrolment of SC in primary schools}}{\text{Total enrolment in primary schools}} \times 100$$

$$14. \text{ \% SC girls to SC enrolment} = \frac{\text{Enrolment of SC girls in primary schools}}{\text{SC enrolment in primary schools}} \times 100$$

$$15. \text{ \% ST enrolment} = \frac{\text{Enrolment of ST in primary schools}}{\text{Total enrolment in primary schools}} \times 100$$

$$16. \text{ \% ST girls to ST enrolment} = \frac{\text{Enrolment of ST girls in primary schools1}}{\text{ST enrolment in primary schools}} \times 100$$

$$17. \text{ Pupil Teacher Ratio (PTR)} = \frac{\text{Total enrolment in schools of primary category}}{\text{Total teachers in primary schools category}} \times 100$$

(Para teachers have been included while calculating PTR)

$$18. \text{ Student Classroom Ratio (SCR)} = \frac{\text{Total enrolment in primary schools}}{\text{Total classrooms in primary schools}}$$

$$19. \text{ \% Schools with } \leq 50 \text{ students in Grades I-IV/V} = \frac{\text{Number of primary schools having enrolment } \leq 50 \text{ in Grades I-IV/V}}{\text{Total primary schools}} \times 100$$

$$20. \text{ \% Schools with PTR } \geq 100 = \frac{\text{Total primary schools having PTR } \geq 100}{\text{Total primary schools}} \times 100$$

$$21. \text{ \% Female Teachers} = \frac{\text{Total female teachers in primary schools}}{\text{Total teachers in primary schools}} \times 100$$

(Para teachers have been included while calculating this indicator)

$$22. \text{ \% of Primary schools established since 1994} = \frac{\text{Total primary schools established since 1994}}{\text{Total primary schools}} \times 100$$

(The denominator excludes the schools for which year of establishment is not given.)

23. Flow Rates

(a) Promotion Rate

$$\text{Promotion Rate (p}_g^t) = \frac{P_{g+1}^{t+1}}{E_g^t} \times 100$$

where

P_{g+1}^{t+1} = Number of students promoted to grade 'g+1' in year 't+1' and

E_g^t = Total number of students in grade 'g' in year 't'

(b) Repetition Rate

$$(r_g^t) = \frac{R_g^{t+1}}{E_g^t} \times 100$$

where

$$R_g^{t+1} = \text{Number of repeaters in grade 'g' in year 't+1'}$$

(c) Dropout Rate

$$(d_g^t) = \frac{D_g^t}{E_g^t} \times 100$$

where

$$d_g^t = \text{Number of student's dropping out from grade 'g' in year 't'}$$

(d) Transition Rate

$$TR = \frac{E_{g+1}^{t+1}}{E_g^t} \times 100$$

where

$$E_{g+1}^{t+1} = \text{New entrants into Grade V/VI in year 't+1' and}$$

$$E_g^t = \text{Enrolment in Grade IV/V in year 't'}$$

(e) Retention Rate

$$RR = \frac{\text{Enrolment in Grade V in year 't-' Repeaters in Grade V in year 't'}}{\text{Enrolment in Grade I in year 't - 4'}} \times 100$$

(f) *Survival Rate (SR)*

Enrolment in Grade II and subsequent primary grades in year 't' is divided by enrolment in Grade I in the same year 't' is multiply by 100 to obtain survival rate in primary grades.

24. Average number of days spent on non-teaching assignments

Presents average number of days spent on non-teaching assignments during the previous academic year in case of teachers imparting elementary irrespective of the school type

$$25. \text{ Gender Parity Index (GPI)} = \frac{\text{Girl's enrolment in Primary Grades in year 't'}}{\text{Boy's enrolment in Primary Grades in year 't'}}$$

26. Ratio of Primary to Upper Primary Schools/Sections

$$= \frac{\text{Total number of Primary Schools/Sections in year 't'}}{\text{Total number of Upper Primary Schools/Sections in year 't'}}$$

$$27. \text{ Gross Enrolment Ratio (GER)} = \frac{\text{Total enrolment in Grades I-V}}{\text{Population of age 6-11 years}} \times 100$$

$$28. \text{ Net Enrolment Ratio (NER)} = \frac{\text{Enrolment I-V/6-11 age group}}{\text{Population of age 6-11 years}} \times 100$$

4. Limitations of the Data

The analysis presented in the Report Cards is based on the information received from the State Project Offices. Procedures for the data validation and verification of sample data capture formats at the district level have been prescribed, and the districts reported the steps taken by them to ensure quality and reliability of data collection. The DISE software also checks for many internal inconsistencies in the data and generates reports for verification by the District Project Office. The State Project Office while transferring the data from the district to the state database ensures that the data received from the district is complete and free from any inconsistency. At the national level, data from the State Project Office is received to ensure compliance with various quality control measures. Despite these efforts, some inconsistencies and missing data are observed at the national level. In some cases data on key elements is found missing.

Despite all our efforts, it is possible that the field agencies might have not covered all *Navodaya Vidyalayas*, *Sainik* Schools, Military Schools, *Kendriya Vidyalayas*, Tibetan Schools etc. under DISE. All these schools are recognized schools and are supposed to be covered under DISE but their coverage varies from state to state. A few states have collected data from these schools while others might not have covered all such schools. Similarly, field level functionaries reported that data from a few private recognized schools couldn't be obtained for one or the other reason. We are trying to reach all such schools through the highest level, and are hopeful that these efforts will be reflected in the year that follows.

In some cases data is noticed to be inconsistent. States are advised to use consistency module of DISE software to identify and remove inconsistencies in the data. In addition, CRC Coordinators are being made accountable to ensure that data is consistent and there are no missing values.

Irrespective of the school structure, enrolment ratio at the Primary level is based on Grades I-V and Upper Primary level, Grades VI-VIII. Enrolment ratio at the Upper Primary level is not reported in case of states supplied enrolment data up to Grade VII only.

One of the other important limitations of the data is incomplete reporting of school age population, which is crucial in assessing the progress towards universal elementary enrolment. The Standing Committee Population Projections are not yet available in the absence of which 2001 Census age group population in a state is used to project 6-11 and 11-14 year population. For this purpose Sprague Multipliers are used to obtain single age population. GER and NER presented should therefore be analyzed in the light of these limitations.

DISE 2004: Coverage

Sl. No.	State & UT	School Structure		Number of Districts 2001 Census	Number of Districts Reported Data in 2004
