## Foreword

Ever since the National University of Education Planning and administration initiated the process of strengthening Educational Management Information system, it has been disseminating data collected under the District Information System for Education (DISE) both online ([www.dise.in](http://www.dise.in)) and through a series of annual publications, such as *Progress towards UEE: Analytical Reports and Elementary Education in the Rural and Urban India*, and *Elementary Education in India: District Report Cards (Volume I & II)*, which focuses on the analysis of key performance indicators relating to access, participation, teachers and teaching-learning facilities for, the continuous monitoring of progress towards the goal of Universalization of Elementary Education. As per the feedback received from States/UTs, these reports have been immensely useful for developing District Elementary Education Plan and also in providing a variety of indicators for monitoring outcomes of planned interventions being provided under the *Sarva Shiksha Abhiyan*.

To operationalise and strengthen the strategy of decentralized planning and management of elementary education in the country, it is necessary to generate disaggregated database based upon school management, location of schools (rural/urban), gender, social categories, focus groups, children with special needs, etc. Although, the Management Information System Units are now functional both at district and state levels across the country, they are yet to be fully equipped with necessary capacity to generate reports which could feed into the planning and monitoring processes of the elementary education in India. Hence, there is a need for bringing out publications based on DISE data at the national level.

In view of the above we are bringing out a new web based publication, *Elementary Education under Government Managements* which is based on DISE 2008-09 data. All the indicators, presented in the publication are presented state-wise for Government Managements. I hope that this publication would enrich understanding with regard to elementary education in Government schools and would be useful to academic community, the policy-makers, managers and other stakeholders.

I would like to place on record my appreciation for all the hard work put in by the DISE team at NUEPA. In particular I am thankful to Ms. Aseela.M for taking keen interest in bringing out this publication.

(Arun C. Mehta)
