## Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Strengthening the school information system has, therefore, been accorded top priority from the very beginning of the *Sarva Shiksha Abhiyan* (SSA), as a result of which the coverage of DISE was extended to all states and districts of the country, and its scope extended to the entire elementary stage of education. I am confident that in the light of the recommendations of the *Expert Group on Creation of Unified System of Data Collection for School Education Statistics*, efforts for a unified school data collection system across the country will soon bear fruit. This will help us in formulating not only plans for elementary education under SSA but also for secondary education under *Rashtriya Madhyamik Shiksha Abhiyan*.

I am happy to note that DISE has become a regular source of information on all aspects of elementary education. NUEPA brings out annually a set of eight publications including 'District and State Report Cards', web-enabled 'Elementary Education in Rural and Urban India', 'DISE Flash Statistics including Educational Development Index', and 'Elementary Education in India: Progress towards UEE, Analytical Reports & Tables', which data-users and researchers have found very useful. DISE will undoubtedly play an important role in monitoring the implementation of the Right of Children to Free and Compulsory Education Act, 2009 in years to come.

I congratulate all those involved in the process of strengthening the MIS for education (EMIS) through DISE across the country and for winning E-Governance and eINDIA, 2010 Awards, as also the Manthan Award, South Asia, 2010 and the EMPI-Indian Express Indian Innovation Award.

I thank NUEPA, especially Prof. R. Govinda, Vice-Chancellor, Dr. Arun C. Mehta, Professor and Head, Department of EMIS and the entire DISE team, for bringing out the present publication. I also thank UNICEF, Delhi, for consistently supporting EMIS activities at NUEPA.

### **From the Vice-Chancellor's Desk**

The country has witnessed phenomenal expansion of school education system in recent years. There are currently around 1.5 million schools in the country. Effective monitoring of such a vast system spread over diverse conditions that characterize different states and regions of the country demands a well organized and comprehensive data base. NUEPA has been pursuing the goal of creating a reliable system of statistics on school education during the last two decades through the District Information System for Education (DISE) which provides the basis for assessing the progress under SSA and on status of implementation of the Right to Education Act. The importance of this has further increased with efforts to extend the policy of universal education to cover secondary education stage of schooling also. Keeping this in view DISE is making a concerted effort to provide a unified system of school education statistics for all levels of schooling from elementary to higher secondary education. We hope to present such a unified system of data base for policy makers, planners, administrators, researchers and other users beginning from 2013-14.

It is, indeed, a great pleasure for me to present a summary data base on elementary education in India through present publication. Including this publication, NUEPA brings out on annual basis 8 publications exclusively based on DISE data under the following titles: (a) DISE Flash Statistics: Elementary Education in India, Progress towards UEE; (b) Elementary Education in India: Where Do We Stand; District & State Report Cards; (c) Analytical Report & Analytical Tables; and (d) Elementary Education in Rural & Urban India

DISE has been acclaimed by a number of national and international institutions as one of the most comprehensive and innovative initiative. It is gratifying to note that DISE received the EMPI Indian-Express Indian Innovation Award for 2012. Earlier, it has received several other prestigious National Awards including e-Governance, eINDIA and Manthan Award South Asia. I take this opportunity to congratulate Prof. Arun C. Mehta and his team for their commitment and hard work in producing the various publications and sustaining that effort over the years.

I hope that researchers, policy makers, administrators and planners will find the publication both informative and useful.

New Delhi  
June, 2012

  
**(R Govinda)**

## Acknowledgements

For the last several years, NUEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The *Flash Statistics: Elementary Education in India: Progress towards UEE* is based on the data received from all the States & UTs of the country for the year 2010-11. The publication presents not only state-specific indicators but also brings in many new dimensions of elementary education into focus. It incorporates key indicators on all aspects of universalisation of elementary education in case of all the States & UTs of the country.

The *Flash Statistics: 2010-11* is based on the data received from as many as 1.36 million schools spread over 637 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Ms Urmila Sarkar, Chief (Education) for consistently supporting EMIS activities ever since the inception of DISE and Ms Anita Kaul, Additional Secretary and Mr P.K. Tiwari, Director, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states.

I am thankful to Prof R Govinda, Vice-Chancellor, NUEPA, for his consistent encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Shri Naveen Bhatia, System Analyst, NUEPA and Shri Shalender Sharma, Chief Consultant, Technical Support Group, Ed. CIL, in database management, is gratefully acknowledged. I am thankful to Ms Shakun Sethi, Project Consultant (DISE Project) and Ms Aseela M for computing indicators that have been presented in the document.

I am also thankful to colleagues in the Publication Unit especially Shri Pramod Rawat, Deputy Publication Officer and Ms Sheeja Biju, Former Project Publication Officer (DISE Project) for timely bringing out the publication.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

**Arun C. Mehta**

a : Including SSK etc. institutions.

b : Excluding AIE centres.

c : Clarification from state is awaited.

@ : State does not have such school type.

\* : Total may not add to hundred because of missing values and rounding of figures.

\*\* : Excluding AIE centres. State has closed down 8772 AIE Centres & 6476 Venture schools.

# : Including teachers teaching Grade VIII as a part of Secondary level has also been considered.

c : Including SSK etc. institutions.

\*\* : Figures may not add to total because of missing values.

+ : May not present complete enrolment as a number of states did not report Grade VIII enrolment.

\* : Excluding AIE Centres.

b : State has undertaken study to find out reasons of decline in primary enrolment report of which is still awaited.

z : Including enrolment in unrecognised schools and madrasas.

@ : Excluding enrolment in Grade VIII under Secondary level.

\* : State does not have such school type.

<sup>#</sup> : Average repetition and drop-out rates have been based on data of common schools. States showing negative rates have not been reported.

<sup>\*\*</sup> : Retention rate at primary level is calculated based on the enrolment data of Grade I (2006-07) & Grade V (2010-11) including enrolment in unrecognised schools. At all-India level, it is based on the data of 609 districts. Without enrolment in unrecognised schools, retention rate at all-India level is 72.08 percent.

<b>All States</b>	<b>73.74</b>	<b>75.80</b>	<b>81.15</b>	<b>56.22</b>	<b>58.29</b>	<b>61.82</b>

\*\* : Computed based on the projected population provided by the Office of the Registrar General of India. States are advised to use more recent figures of child population obtained through HH Survey to workout the ratio. Clear picture will emerge when child population based on 2011 Census is available. GER at Primary level without enrolment in unrecognised schools/madarsas at all-India level is 116.10 percent and NER 97.79 percent. Corresponding figures at Upper Primary level are 79.81 and 60.80 percent.

\* : Based on the incomplete coverage as a number of states have not reported Grade VIII enrolment.

**EDUCATIONAL  
DEVELOPMENT  
INDEX  
(EDI)  
2010-11**

### Variables used in Computing Educational Development Index (EDI)

Component	Indicator
<b>ACCESS</b>	Percentage of Habitations not Served* (corrected with reference to new schools (Government) opened since 2002-03)
	Availability of Schools per 1000 Child Population
	Ratio of Primary to Upper Primary Schools/Sections (only at Upper Primary stage)
<b>INFRASTRUCTURE</b>	Schools with Student-Classroom Ratio > 40
	Schools with Drinking Water facility
	Schools with Common toilet
	Schools with Girl's toilet
<b>TEACHERS</b>	Percentage of Schools with Female Teachers (in schools with 2 and more teachers)
	Schools with Pupil-Teacher Ratio > 40
	Percentage of schools with less than 2 teachers (in schools with more than 15 students) (Primary schools only)
	Percentage of Schools with < 3 teachers (Upper Primary schools/sections)
	Teachers without Professional Qualification
<b>OUTCOMES</b>	Gross Enrolment Ratio - Overall
	Participation of Scheduled Castes Children: Percentage SC Population (2001 Census) - Percentage SC Enrolment
	Participation of Scheduled Tribes Children : Percentage ST Population (2001 Census) - Percentage ST Enrolment
	Gender Parity Index in Enrolment
	Repetition Rate
	Drop-out Rate*
	Ratio of Exit Class over Class I Enrolment (only at Primary stage)
	Transition Rate from Primary to Upper Primary level (only for Upper Primary level)

**Note:**

- Indicators used for constructing EDI were pre-determined by the MHRD, Government of India. Contributions received from the members of the Multi-Disciplinary Expert and Core Group on EDI constituted by the MHRD in 2005-06 is gratefully acknowledged.
- Indicators were normalized before the Principal Component Analysis was applied to decide the factor loadings and weights.
- Separate dimensional indices were constructed first before finalising the EDI; and
- \* Number of access-less habitations has been obtained from the Seventh All India Educational Survey and drop-out rate at Upper Primary level from the Statistics of School Education. Wherever necessary projected child population provided by the Office of the Registrar General of India has been used.

## Assumptions used in Computing EDI

An effort has been made by the National University of Educational Planning and Administration (NUEPA) and the Government of India (MHRD, Department of School Education and Literacy) to compute an Educational Development Index (EDI), separately for Primary and Upper Primary levels of education and also a composite index for the entire Elementary education which is exclusively based on the DISE data for the year 2010-11. The first such attempt was made in 2005-06.

A set of 20 indicators have been used in computing EDI which are re-grouped into the four sub-groups, namely Access, Infrastructure, Teachers and Outcome indicators. The Indicators used for constructing EDI were pre-determined by a Working Group on EDI constituted by the MHRD during 2005-06 of which NUEPA was also one of the institutional members. Like in the previous year, improved versions of a few variables were used. Percentage of access-less habitation was one such variable which is latest available for the year 2002-03. In view of a large number of schools that have been opened across the country in the recent past, the same was corrected with reference to new schools (Government) opened since 2002-03. Like in the previous year, in place of Gross Enrolment Ratio of SC/ST population, percentage of SC/ST population (to total population, 2001 Census) *minus* percentage of SC/ST share of enrolment in Primary and Upper Primary classes has been used to assess participation of the SC/ST children. Schools with Student-Classroom Ratio (SCR) above 40 and schools with Pupil-Teacher Ratio (PTR) above 40 have been used in place of schools having SCR and PTR above 60. Similarly, in place of single-teacher schools, percentage of Primary only schools with less than 2 teachers (in schools with more than 15 students) has been used in computing Teacher's Index at Primary level. Since information on percentage of appeared children securing 60 percent and more marks is not available under DISE, the same is not used in computing EDI in 2010-11 both in case of Primary and Upper Primary levels of education.

After data was cleaned, each indicator was *normalised* by using the following formula:

$$NV_{ij} = 1 - \left[ \frac{\{\text{Best } X_i - \text{Observed } X_{ij}\}}{\{\text{Best } X_i - \text{Worst } X_i\}} \right]$$

Upon receiving *normalised values*, *Principal Component Analysis* (PCA) was applied to decide the factor loading and weights. In case of a few variables, policy options were explored to identify the *best values* instead of based on the *observed values*. Some of these variables are: access-less habitations (best value, zero), percentage of schools with pupil-teacher and students-classroom ratio above 40 (best value, zero), percentage of teachers without professional qualification (best value, zero) etc. EDI in 2010-11 may not necessarily be comparable with the same in the previous year.

*The Honorable Minister has been quite pleased to note the enormous efforts of the NUEPA, the Ministry of HRD and the UNICEF that went into the significant publication, and extends his compliments to all those behind the arduous compilation which would be of immense value to the policy-makers and researchers on the subject.*

PS to Minister of HRD  
Government of India  
*November 2010*

*It must be conceded that the DISE does represent a significant advancement over the earlier systems of data collection, compilation, analysis and publications. In terms of reduction of time-lag and improvement of quality, it represents a phenomenal stride over all the other systems.*

*DISE can be said to have emerged as a time-tested 'model' to serve educational statistics. It must become the only system and shall be upgraded to cover Secondary and Senior Secondary stages also.*

Report of the Review Committee on Educational Statistics  
Ministry of Human Resource Development  
Government of India  
*December 2008*

# One Million+ School Report Cards

([www.schoolreportcards.in](http://www.schoolreportcards.in))

Winner of Manthan Award South Asia 2010, e-Governance & eINDIA 2010 National Awards and EMPI-Indian Express Indian Innovation Award 2012

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both Primary and Upper Primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has completely eliminated the time-lag in availability of educational statistics which has come down drastically from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.3 million Primary and Upper Primary schools/sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the Click of a Mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the Country.

## DISE: Forthcoming Publications

Elementary Education in India: Where do we stand?, District Report Cards, Volume I, 2010-11

Elementary Education in India: Where do we stand?, District Report Cards, Volume II, 2010-11

Elementary Education in Rural India: Analytical Tables, 2010-11 (Web-enabled Version)

Elementary Education in Urban India: Analytical Tables, 2010-11 (Web-enabled Version)

Elementary Education in India: Where do we stand?, State Report Cards, 2010-11 (Web-enabled Version)

Elementary Education in India: Progress towards UEE, Analytical Report 2010-11

Elementary Education in India: Progress towards UEE, Analytical Tables 2010-11
