**January 2010**

## **FOREWORD**

The Report entitled “**5% Sample Checking of DISE 2008-09 Data** ” was sponsored by the Jharkhand Education Project Council (JEPC), Ranchi. We are grateful to the management of the JEPC for entrusting this assignment to XISS. We express our gratitude to Ms. M. N. Kerketta (State Project Director) and the project officers and the staffs of JEPC for their full cooperation during the course of the study.

We sincerely hope that the findings and recommendations of the study will enable the JEPC, Ranchi to plan out effective ways to collect DISE data .

17<sup>th</sup> January 2010

**Dr. Alex Ekka S. J.**

Director, XISS

## **ACKNOWLEDGEMENTS**

The Study entitled “**5% Sample Checking of DISE 2008-09 Data**” was entrusted to XISS by the JEPC, Ranchi.

We wish to put on record our sincere gratitude to Ms. M. N. Kerketta, the State Project Director and other officers of JEPC, Ranchi for their guidance and assistance throughout the study.

We extend our sincere thank to all the DSEs, ADPOs, BEOs, BPOs and CRPs of all districts for their support for the study

I wish to thank to our Project Officer Mr. William Norman, Mr. Arvind Dey and Mr. Herman Ekka for supervising and guiding the field data collection as well as for writing the report.

I am grateful to the team of supervisors and investigators for their perseverance in visiting the schools and collecting the required information.

Let me also thank Mr. Shree Ram Mishra for supervising the data processing and analysis.

I put on record my appreciation for all the assistance received from the various departments of XISS. Thanks to the co-operation of all we were able to complete our report on schedule.

17<sup>th</sup> January 2010

**Dr. Alex Ekka s.j**  
Director, XISS

## Executive Summary

The Cultural and Educational Rights is one of the six fundamental rights that have been granted to us in the Indian Constitution. This right allows every citizen of India to have education up to where that person wants. One of the developmental goals of countries like India is not only ensuring literacy for all but also access to education irrespective of geographical disparities. Hence there is a need to evolve an educational developmental mechanism that would ensure more equal access to education in the various states irrespective of differences in literacy and conventional infrastructure. Therefore, to universalize and improve quality of education through decentralized and context specific planning and a process based, time bound implementation strategy was taken up by Government of India in the year 2001-02. Sarva Shiksha Abhiyan (SSA) has been launched in 2001-2002 in partnership with the State Governments and Local Self Governments. The programme aims to provide useful and relevant, elementary education to all children in the 6 to 14 age group by 2010.

To ensure consistency, accuracy and quality of data the MHRD – along with the Department of Elementary Education & Literacy, Government of India, has decided to have a sample check of DISE data on 5% basis by involving independent agencies or research institutes. In this context, 5% sample checking of DISE data 2008-09 has been entrusted to Xavier Institute of Social Service (XISS), Ranchi by Jharkhand Education Project Council (JEPC), Ranchi. The ToR for this study was signed in the month of March 2009.

### Objectives of the Study

The study was to accomplish the following objectives:

To assess consistencies and validity of DISE data for the year 2008-09

To assess the process for collection, compilation and analysis of DISE data as well as use of DISE data at different level.

To know the gaps responsible for maintaining good quality data at all level.

To disseminate findings of the study to ensure policy and support to strengthen quality DISE data.

### Major Findings

The comparative study between Post Enumeration Survey (PES) and DISE data for the academic year 2008-09 was assessed and the major findings were as follows:

**Category of schools:** Over all 96% PES and DISE data matched on school category for the academic year 2008-09.

**Particulars of school:**

- 3.4% difference found to be on school location (rural/urban), 7.1% on school type (boys/girls), 3.9% on school category, 2.8% on school management, 6.6% on residential facilities of the school and 23.2% on ownership status of the school.

- Similarly, 5.1% difference observed on lowest class and 15.2% difference observed on highest class of the school.

**Basic amenities available in the schools:** On and average more than 60% PES and DISE data matched on availability of the basic facilities viz. toilet facilities, electricity, drinking water, play ground, computers, boundary wall, etc. in the schools.

**Total enrollment:** 2.9% difference observed between PES and DISE data on total enrollment.

**Total boy's enrollment:** 1.9% difference observed between PES and DISE data on total boy's enrollment.

**Total girl's enrollment:** 3.9% difference observed between PES and DISE data on total girl's enrollment.

**SC boy's enrollment:** 3.2% difference observed between PES and DISE data on SC boy's enrollment.

**SC girl's enrollment:** 7.17% difference observed between PES and DISE data on SC girl's enrollment.

**ST boy's enrollment:** 1.69% difference observed between PES and DISE data on ST boy's enrollment.

**SC girl's enrollment:** 2.56% difference observed between PES and DISE data on SC boy's enrollment.

**OBC boy's enrollment:** 3.12% difference observed between PES and DISE data on OBC boy's enrollment.

**OBC girls's enrollment:** 4.5% difference observed between PES and DISE data on OBC girl's enrollment.

**General boy's enrollment:** 9.12% difference observed between PES and DISE data on general boy's enrollment.

**General girl's enrollment:** 16.2% difference observed between PES and DISE data on general girl's enrollment.

**Total Repeaters (2008-09):** 21.9% difference observed between PES and DISE data on total repeaters.

**Total enrollment in class IV/V (2007-08):** 0.9% difference observed between PES and DISE data on total enrollment for class IV/V.

**Total enrollment in class VII/VIII (2007-08):** 17.5% difference observed between PES and DISE data on total enrollment for class VII/VIII.

**Total Appeared in annual exams (2007-08) for Class IV/V:** 11.4% difference observed between PES and DISE data on total appeared students of class IV/V.

**Total Appeared in annual exams (2007-08) for Class VII/VIII:** 3.9% difference observed between PES and DISE data on total appeared students of class IV/V.

**Total passed in annual exams (2007-08) for Class IV/V:** 10% difference observed between PES and DISE data on total appeared students of class IV/V.

**Total passed in annual exams (2007-08) for Class VII/VIII:** 14.4% difference observed between PES and DISE data on total appeared students of class IV/V.

**Over all Percentage Deviation and Precision Level of the DISE data with the PES data for all Comparable data**

S.N.	Description of Comparable items	Quantitative Value Under			Percentage	
		PES Data	DISE Data	Deviation (±)	Deviation (%age)	Precision (%age)

**Enumerators Feedback**

Nearly 17% schools were found to be closed during first visit of the enumerators. Only 10% school head master's initial response towards the enumerators were very good and 61% were good whereas rest paid average response to the enumerators.

Pertaining to the availability of the school records, nearly in 5% schools the records were found to be very good and in 48% schools it was good.

80.6% Principals /Head Masters were able to provide the information to enrolment and pass percentage.

42.4% Principals /Head Masters were able to give enrolment and other details from single register.

91.6% Teachers were filled up the attendance register properly.

78.2% Principals/Head Masters had the year end summary details of children for all grades.

School Report cards were available in 68.1% schools.

Attendance registers were properly maintained and kept in the almirahsin 76.6% schools.

Teachers come on time in 91.6% schools.

Only 14.2% schools had a photo copy of filled in DISE DCF of previous years.

In 26.4% schools enumerators had faced problem in getting the information from the head masters.

68.7% schools had display board.

91.5% schools were found to be cooking Mid Day Meal for the students.

Total 2,35,767 students enrolled, of these, SC students were 35,206 (14.9%) and ST students were 60,786 (25.8%).

Overall 58.3% students were found to be present in the class. Proportion of boy and girl students' attendance was equal.

Out of 60,786 ST students, 56.3% were present in the class.

Out of 35,206 SC students, 56% were present in the class.

## **Suggestions and recommendation**

The following conclusions were drawn from the study:

- ◆ The average deviation of DISE data from PES data, in respect of all comparable of items was 4.45 %.
- ◆ Difference on some points in two sets of formats (DISE and PES) or unfilled columns in prescribed formats of DISE data, etc. were the limitations confronted during analysis.
- ◆ The comparative study could not be made on certain points. Some examples were as follows:
  - The details of the Head Master i.e. educational qualifications, experience, etc.
  - Year of establishment of the school
  - Children enrollment in the last Academic year
  - Enrollment and attendance details of children on the date of survey
  - Grade wise Examination details for which Annual Examinations conducted in Last Academic Year.
  - Particulars of pre primary classes
- ◆ Apart from these, there were certain information collected on regular basis from schools under DISE data were missing in the special DCF- PES format, as follows:

Particulars of pre primary classes  
Teacher training activities  
School development  
Maintenance grants  
Infrastructure availability in the class rooms  
Library facilities  
Arrangements for disable students  
School information on the whole. etc.

- ◆ While checking the copy of filled DISE format in the school some points were found to be left blank. Apart from this, on spot verification of the DISE data with the school register pertaining to enrollment, caste categories of the students, number of boys/girls, grading, etc. were found to be miss-matched.
- ◆ In some cases, the training for filling DISE format was conducted after September of the same academic year and thus the head masters/teachers received late the format from the BRCs/CRCs.
- ◆ A number of head masters did not participate in the training foDISE format. In many cases the DISE formats reached them through para teachers/ CRPs.
- ◆ CRPs of the respective clusters were not check/ verify the filled DISE Formats with the school records while collecting from the head masters.
- ◆ In most cases, the head masters did not able to provide information on few points like the year of establishment of the school, number of teachers' sanctioned post, disability, details of repeaters, caste of the students, etc.
- ◆ In many schools, the school registers/ records of the previous years i.e. 2006-07 & 2007-08 were not available. This caused the enumerators lot of inconvenience while collecting data for these schools.

### **Recommendations**

Based on the results of the survey the following recommendations are made for improving MIS:

- ◆ The DISE format is lengthy and hence it should be re-designed to keep it short and simple.
- ◆ Training should be conducted at the district level or block level by August of each academic year and the DISE Format should be distributed simultaneously. So that the head master/ teachers shall have proper time to fill the format and submit the same within stipulated time.
- ◆ BRC/ CRC should ensure the participation of the head master for training of DISE Format.
- ◆ The cluster level representatives should pay attention and verify the filled DISE format with the school register/record while collecting it from the head masters.
- ◆ Collection of data through DISE format may be ensured by October of each academic year so that the 5% Sample Check can be done after a gap of one month of the same academic year so that the results can be appropriately utilized for planning the activities for next academic year.

# Chapter I

## Introduction

### 1.1 Background

The Cultural and Educational Rights is one of the six fundamental rights that have been granted to us in the Indian Constitution. This right allows every citizen of India to have education up to where that person wants. One of the developmental goals of countries like India is not only ensuring literacy for all but also access to education irrespective of geographical disparities. For the purpose of census 2001, a person aged seven and above, who can both read and write with understanding in any language, is treated as literate. A person, who can only read but cannot write, is not literate. In the censuses prior to 1991, children below five years of age were necessarily treated as illiterates.

As per Census of India 2001, our country has literacy rate of 64.8 %, this rate varies from state to state. Kerala retained its position by being on top with a 90.9% literacy rate, closely followed by Mizoram (88.8%) and Lakshadweep (86.7%). On the other hand, Bihar with a literacy rate of 47.0% ranks last in the country preceded by Jharkhand (53.6%) and Arunachal Pradesh (54.3%). Similarly, the male literacy rate in the country is 75.3% and 53.7% for females. Kerala also occupies the top spot in the country both in male literacy with 94.2% and female literacy with 87.7%. On the contrary, Jharkhand has recorded 31<sup>st</sup> rank in literacy rates in case of males (67.3%) and 34<sup>th</sup> rank in case of females (38.9%).

Hence there is a need to evolve an educational developmental mechanism that would ensure more equal access to education in the various states irrespective of differences in literacy and conventional infrastructure. Therefore, to universalize and improve quality of education through decentralized and context specific planning and a process based, time bound implementation strategy was taken up by Government of India in the year 2001-02. Sarva Shiksha Abhiyan (SSA) has been launched in 2001-2002 in partnership with the State Governments and Local Self Governments. The programme aims to provide useful and relevant, elementary education to all children in the 6 to 14 age group by 2010. It is a comprehensive and integrated flagship programme of Government of India to attain Universal Elementary Education (UEE), covering the entire country in a mission mode. With objective of ensuring universal education for children, the Sarva Shiksha Abhiyan is being implemented by the Jharkhand Education Project Council (JEPC) in all 24 district of Jharkhand since 2001-02.

#### **Jharkhand Education Project council (JEPC)**

Jharkhand Education Project Council (JEPC) a Society, registered under the Societies Registration Act, 1860 was set up as a State Implementation Society (SIS) to pursue the goals of universalisation of Primary Education (UPE) which received importance under the National Policy on Education (NPE) adopted in 1986 and updated in 1992. The NPE provides a frame-work for the development of education and plan of action, for assigning specific responsibilities for organizing, implementing and financing education, giving it an unqualified priority. After creation of the state of Jharkhand, the Jharkhand Education Project Council was constituted on 12 th April' 2001.

The council has since then been involved in implementing various projects / programmes like the DPEP, Janshala, Aus-aid, CLEP etc with the objective of pursuing the goals for which the council has been set up.

For successful implementation of any educational programme, effective monitoring, coupled with efficient information system, is essential. While monitoring framework under SSA is developed separately, concerted efforts have been made towards strengthening of Educational Management Information System (EMIS) in India. The school statistics form the basis of planning, monitoring and evaluation of various aspects of education, in general, and primary and elementary education, in particular.

In view of the above, the first version (dbase) of the software, named as 'District Information System for Education' (DISE) was released by NIEPA during the middle of 1995 and the district was selected as a nodal point for collection, computerization, analysis and use of school level data. The software was later redesigned in 2001 in the light of requirements of the SSA. Not only the coverage of DISE was extended to non-DPEP states but it was also extended from primary to the entire elementary level of education. At present all 35 states and UTs in the country have been covered under DISE.

In Jharkhand, DISE data being collected through DCF is filled by Head Master/Acting Head Master/ principal. The filled DCF was then signed by Head Master/Acting Head Master/ principal and countersigned by Gram Shiksha Samiti (GSS) of school. The filled DCF is verified at the cluster/block level by the Cluster Resource Centre (CRC) coordinators/Block Resource Centre Coordinators (BRCC). CRC is the only level at which quality of data can be checked. Besides the significance of data entry in DISE software and compilation is done at district level, a sample cross check is also done at district level. The compiled data from the district is brought at state level for compilation and then from the state level, after being properly checked and compiled, the data is brought and compiled at national database maintained by NIEPA.

To ensure consistency, accuracy and quality of data the MHRD – along with the Department of Elementary Education & Literacy, Government of India, has decided to have a sample check of DISE data on 5% basis by involving independent agencies or research institutes. In this context, 5% sample checking of DISE data 2008-09 has been entrusted to Xavier Institute of Social Service (XISS), Ranchi by Jharkhand Education Project Council (JEPC), Ranchi. The ToR for this study was signed in the month of March 2009.

## **1.2 Objective of the study**

The main concern of this study was to inform and guide the policy maker and the end user of DISE data on quality issues. The study was to accomplish the following objectives:

To assess consistencies and validity of DISE data for the year 2008 09

To assess the process for collection, compilation and analysis of DISE data as well as use of DISE data at different level.

To know the gaps responsible for maintaining good quality data at all level.

To disseminate findings of the study to ensure policy and support to strengthen quality DISE data.

## 1.3 Methodology

### 1.3.1 Sample

The selection of 15 districts was done by JEPC. Stratified random sampling method was used for the selection of the schools. 1417 schools i.e. 5% of total schools of the state were studied keeping in view 5% coverage from each district. While ensuring 5% sampling care has been taken to keep a balance in selection of following points:

- Type of schools i.e. primary/middle/high school
- Both rural and urban schools
- Types of school management
- Due consideration of schools located in SC/ST and minority area.

The number of schools studied is shown district and block wise in table 1.1.

**Table 1.1 Number of sampled school**

S.N.	District	No. of Block	Total
1	Chatra	9	96
2	Deoghar	9	106
3	Dumka	9	125
4	Garhwa	13	68
5	Giridih	15	167
6	Godda	9	89
7	Hazaribagh	10	84
8	Khunti	6	53
9	Lohardaga	5	36
10	Palamu	15	143
11	Ramgarh	5	37
12	Ranchi	11	133
13	Sahebganj	9	80
14	Saraikele-Kharsawan	8	83
15	West Singhbhum	14	117
16	<b>Total</b>	<b>147</b>	<b>1417</b>

### 1.3.2 Reference Period

The reference date of DISE data is 30<sup>th</sup> September of every year. The post enumeration survey (PES) for the year 2008 was also of the same period. But, the ToR was signed in the month of March 2009 because of certain administrative reasons, so the study was started in April 2009.

### 1.3.3 Tools of data collection

Data collection was done by a special DCF for PES provided by JEPC, Ranchi. The schedule covered both quantitative and qualitative information of school.

### 1.3.4 Data collection

A team of trained investigators was constituted for the study. The team was then exhaustively trained by JEPC officials for data collection process. The team was

thereafter visited the different districts and collected data from each school under the supervision of three supervisors. The field data was collected between April – July 2009.

### 1.35 Limitation in data collection

The data collection work was started in the month on April 2009. But, the progress of the work was disturbed / delayed due to following reasons:

Due to the Lok Sabha Election in the month of April 2009, the officers of the Education Department and Head Masters / Acting Head Master / Principals and other teachers were not available because of their duty in connection with the elections.

The many *Bandhs* called by the various organizations specially extremist stopped our movement to the Blocks and schools

In the month of May the District Administration declared special holidays due to extreme heat. The school offices were to remain open, but in many cases, the school offices were found closed. The Head Masters/ Acting Head Masters/ Principals were not available in spite of prior information. This further delayed the survey work.

The 2<sup>nd</sup> list of schools given to us had very few options to choose from when confronted with closed / shut-down schools. Since such a situation was causing delay we had to request for yet another list with more names of schools. This 3<sup>rd</sup> list was given to us almost at the end of April (27th). The new list speeded up our work to a certain extent.

Some of the school authorities and BPOs/CRPs did not co-operate the survey team for the smooth functioning of the work. Most of the Head Masters/ Acting Head Masters in Chatra, Hazaribagh, Giridih and Deoghar were unwilling to give information to the investigators. Our investigators had to make a number of visits to the schools to obtain the needed information.

Our team did not get timely support from the Department in Chatra, Giridih and Hazaribagh districts. The officials from the Ranchi Head Office had to intervene to get the local authorities to support the survey team.

### 1.3.6 Tabulation

Quantitative data was tabulated and analyzed using statistical software packages like MS-Excel. Already filled DISE formats and Special DCF formats, after scrutiny of both the sets, were subjected to comparison by using simple deviation methods. The following deviation formula was used:

$$\frac{d1+d2+d3+\dots\dots\dots d^n}{a+b+c+\dots\dots\dots n} \times 100$$

Where, d1, d2, d3,..... stands for deviation of data of DISE data from Post Enumeration Survey data ignoring + or - signs  
a, b, c,..... denote items of Post Enumeration Survey data.

## 1.4 Organization of the Report

The report consists of three chapters including this introductory chapter. The structure of the report is as follows:

Preface	
Acknowledgement	
Research team	
List of tables	
List of figures	
Abbreviations	
Executive Summary	
<b>Chapter I</b>	Introduction
<b>Chapter II</b>	Comparison between DISE and PES data
<b>Chapter III</b>	Feedback of the Enumerators
<b>Chapter IV</b>	Conclusions and Suggestions

## Chapter II

### Comparative Analysis of DISE and PES Data

#### 2.1 Introduction

This chapter compares and analyses DISE data with Post Enumeration Survey (PES) data for the academic year 2008-09. The chapter contains a comparative analysis of variables existing between PES and DISE survey data among the common schools covered. Simple deviation method has been used for the analyses. The tables present school wise and category wise comparative items.

The team of XISS visited a total 1417 schools from 15 sampled Districts and filled-up data in special DCF for PES provided by JEPC, Ranchi. Data was collected from the Head Masters/ Head Teachers of the sampled schools. The comparison of common variables where deviation occurred (ignoring  $\pm$  sign) between PES data and DISE DCF are furnished below:

#### 2.2 Comparative analysis of PES and DISE data

##### 2.2.1 Category of schools

Over all 96% PES and DISE data matched on school category. There was no significant difference observed between two sets of data in primary school and primary with upper primary school category. However, there was huge difference observed between two sets of data in primary with upper primary school (59.4%), only upper primary school (16.7%) and upper primary with secondary school (37.5%) (Table 2.1).

**Table 21 Comparison of PES Data with DISE Data on Category of School**

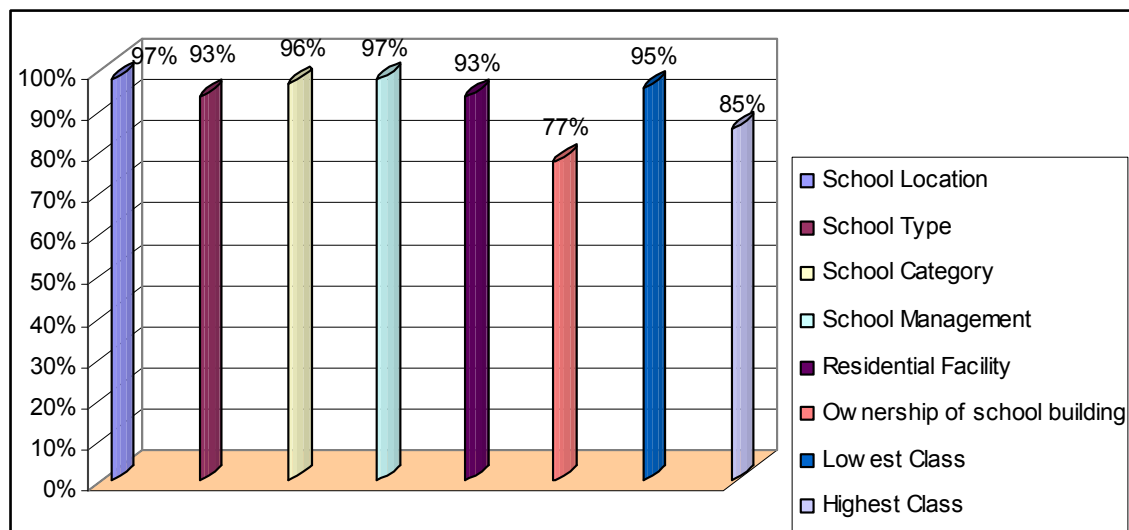

S.N.	Category of School	PES Data	DISE Data	Deviation	Deviation (%age)	Precision (%age)
1	Primary	891	887	4	0.5	99.5
2	Primary with Upper Primary	480	501	21	4.4	95.6
3	Primary with Secondary	32	13	19	59.4	40.6
4	Upper Primary	6	5	1	16.7	83.3
5	Upper Primary with Secondary or H.S.	8	11	3	37.5	62.5
<b>Total</b>		<b>1417</b>	<b>1417</b>	<b>48</b>	<b>3.9</b>	<b>96.1</b>

##### 2.2.2 Particulars of school

A comparative analysis of PES and DISE data pertaining to school particulars was done and data has been presented in table 2.2. There was deviation found ignoring  $\pm$  sign between DISE and survey data. The percentage of deviation was like 3.4% difference found to be on school location (rural/urban), 7.1% on school type (boys/girls), 3.9% on school category, 2.8% on school management, 6.6% on residential facilities of the school and 23.2% on ownership status of the school. Similarly, 5.1% difference observed on lowest class and 15.2% difference observed on highest class of the school (Table 2.2).

**Table 2.2 Comparison of PES and DISE data on school particulars**

S.N.	Facilities	Sample Size (N)	Deviation (ignoring ±)	Deviation %age	Precision % age
1.	School Location	1417	48	3.4	96.6
2.	School Type	1417	100	7.1	92.9
3.	School Category	1417	48	3.9	96.1
4.	School Management	1417	40	2.8	97.2
5.	Residential Facility	1417	94	6.6	93.4
6.	Status of ownership of school building	1417	315	23.2	76.8
7.	Lowest Class	1417	72	5.1	94.9
8.	Highest Class	1417	216	15.2	84.8

**Fig 2.1 School particulars where DISE data matches with survey data**

### 2.2.3 Basic amenities available in the schools

On and average more than 60% PES and DISE data matched on availability of the basic facilities viz. toilet facilities, electricity, drinking water, play ground, computers, boundary wall, etc. in the schools. The detail of availability of basic facilities in the schools is presented in table 2.3.

**Table 2.3 Basic Amenities available in the Schools**

S.N.	Facilities	Sample Size (N)	Not filled/ not available in DISE data		Available in DISE data but doesn't match with survey data		Deviation		Available in DISE data and matches with the survey data	
			No.	%	No.	%	No.	%	No.	%
1.	Availability of Electricity	1417	90	6.35	70	4.94	20	22.2	1397	77.8
2.	Availability of Common Toilets	1417	633	44.67	515	36.34	118	37.5	1299	62.5
3.	Separate Toilets for Girls	1417	554	39.10	349	24.63	205	37.0	1212	63.0
4.	Condition of Boundary Wall	1417	255	18.00	255	18.00	0	0	1417	100
5.	Source of Drinking Water	1417	1053	74.31	1026	72.41	309	29.3	1108	70.7
6.	Play Ground in School	1417	303	21.38	354	24.98	51	32.9	1366	67.1
7.	Total No. of Computers	1417	302	21.31	344	24.28	42	13.9	1375	86.1
8.	Good Condition of Class room	1417	1167	82.36	905	63.87	378	32.4	1039	67.6
9.	Bad Condition of Class room	1417	250	17.64	512	36.13	262	18.49	1155	81.5

**Table 24 Comparison of PES Data with DISE Data on Residential School and Non-Residential School**

S.N.	Category of School	Residential School					Non-Residential School				
		PES Data	DISE Data	Deviation	Deviation (%age)	Precision (%age)	PES Data	DISE Data	Deviation	Deviation (%age)	Precision (%age)
1	Primary	15	36	21	140.0	40.0	876	851	25	2.85	97.15

## Chapter III

### Feedback of the Enumerators

#### 3.1 Introduction

This chapter is divided in to two sections. Section I deals with numerator's feedback on the present study and Section II deals the annual results of the academic year 2007-08.

#### Section I

#### 3.2 visits of enumerator

83.34% schools were found to be opened during the first day of visit of the enumerators whereas remaining schools were found to be closed (Table 3.1). Therefore, the enumerators were compelled to visit again those schools to get the information from the headmasters.

**Table 3.1 Status of school on first visit**

S.N.	Category of School	PES Data		
		Not Opened	Opened	Total
1	Primary	131 (14.7)	760 (85.3)	891 (100.0)
2	Primary with Upper Primary	100 (20.8)	380 (79.2)	480 (100.0)
3	Primary with Secondary	4 (12.5)	28 (87.5)	32 (100.0)
4	Upper Primary	1 (16.7)	5 (83.3)	6 (100.0)
5	Upper Primary with Secondary or H.S.	0	8 (100.0)	8 (100.0)
	<b>Total</b>	<b>236 (16.66)</b>	<b>1181 (83.34)</b>	<b>1417 (100.0)</b>

Figures within parenthesis are in percentage

Number of visits of enumerators in different categories of schools is presented in table 3.2. The enumerators paid more than one visit to nearly 85% of the primary schools to get the information. Similarly, the enumerators had more than one visit for 79% primary with upper primary schools, 89% for primary with secondary schools, 83% upper primary schools and 100% for upper primary with secondary schools. The number of several visits done by the enumerators was due to following reasons:

- Unavailability of the head masters during first visit
- Unavailability of records at the time of visit
- Schools were closed at the time of first visit
- School's records were not kept well by the head masters

**Table 3.2 School get information was number of visit**

S.N.	Category of School	Number of visit				Total
		1	2	3	4	
1	Primary	131 (14.7)	666 (74.7)	58 (6.5)	36 (4.1)	891 (100.0)
2	Primary with Upper Primary	100 (20.8)	322 (67.1)	45 (9.4)	13 (2.7)	480 (100.0)

3	Primary with Secondary	4 (12.5)	26 (81.2)	2 (6.3)	0	32 (100.0)
4	Upper Primary	1 (16.7)	3 (50.0)	2 (33.3)	0	6 (100.0)
5	Upper Primary with Secondary or H.S.	0	2 (25.0)	6 (75.0)	0	8 (100.0)
	<b>Total</b>	<b>236 (16.7)</b>	<b>1019 (71.9)</b>	<b>113 (8.0)</b>	<b>49 (3.5)</b>	<b>1417 (100.0)</b>

### 3.3 Initial reaction of head master

Nearly 10% head master's initial reaction was very good with the enumerators. They were very cooperative in providing information. Out of the remaining 61.5% head masters were good, whereas 28% head master's initial reaction was average/poor with the enumerators (Table 3.3).

**Table 3.3: Initial reaction of the Principal /head teacher**

S.N.	Category of School	PES Data				
		Very Good	Good	Average	Poor	Total
1	Primary	145 (16.3)	746 (83.7)	0	0	891 (100.0)
2	Primary with Upper Primary	0	126 (26.3)	348 (72.5)	6 (1.3)	480 (100.0)
3	Primary with Secondary	0	0	0	32 (100.0)	32 (100.0)
4	Upper Primary	0	0	0	6 (100.0)	6 (100.0)
5	Upper Primary with Secondary or H.S.	0	0	0	8 (100.0)	8 (100.0)
6	<b>Total</b>	<b>145 (10.2)</b>	<b>872 (61.5)</b>	<b>348 (24.6)</b>	<b>52 (3.7)</b>	<b>1417 (100)</b>

### 3.4 Response of the head masters

84% head masters response on providing information was found to be very good and 56.5% were good. Whereas remaining 35% head masters responses for providing information were average/poor (Table 3.4).

**Table 3.4 Response of the Principal /head teacher on providing information**

S. N.	Category of School	PES Data				
		Very Good	Good	Average	Poor	Total
1	Primary	119 (13.3)	768 (86.2)	4 (0.5)	0	891 (100.0)
2	Primary with Upper Primary	0	33 (6.9)	422 (87.9)	25 (5.2)	480 (100.0)
3	Primary with Secondary	0	0	1 (3.1)	31 (96.9)	32 (100.0)
4	Upper Primary	0	0	0	6 (100.0)	6 (100.0)
5	Upper Primary with Secondary or H.S.	0	0	0	8 (100.0)	8 (100.0)
6	<b>Total</b>	<b>119 (8.4)</b>	<b>801 (56.5)</b>	<b>427 (30.1)</b>	<b>70 (4.9)</b>	<b>1417 (100)</b>

### 3.5 Availability of records

Availability of school's records was found to be very good only in 4.7% schools and good in 47.7% schools. On the other hand for rest 48% schools the records were not keeping well by the head masters (Table 3.5).

**Table 3.5 Availability of Records in the schools**

S.N.	Category of School	PES Data				
		Very Good	Good	Average	Poor	Total
1	Primary	64 (7.2)	613 (68.8)	203 (22.8)	11 (1.2)	891 (100.0)
2	Primary with Upper Primary	3 (0.6)	63 (13.1)	349 (72.7)	65 (13.5)	480 (100.0)
3	Primary with Secondary	0	0	3 (9.4)	29 (90.6)	32 (100.0)
4	Upper Primary	0	0	0	6 (100.0)	6 (100.0)
5	Upper Primary with Secondary or H.S.	0	0	0	8 (100.0)	8(100.0)
6	<b>Total</b>	<b>67 (4.7)</b>	<b>676 (47.7)</b>	<b>555 (39.2)</b>	<b>119 (8.4)</b>	<b>1417 (100)</b>

### 3.6 Head Masters status in keeping records

The head master/teacher has to keep school records up to date. The information was gathered by the enumerators with the help of feed back format provided by the JEPC, Ranchi and the responses were yes/no form. Therefore, the head master's status in keeping school records was done and data is presented in table 3.6.

80.6% Principals /Head Masters were able to provide the information to enrolment and pass percentage.

42.4% Principals /Head Masters were able to give enrolment and other details from single register.

91.6% Teachers were filled up the attendance register properly.

78.2% Principals/Head Masters had the year end summary details of children for all grades.

School Report cards were available in 68.1% schools.

Attendance registers were properly maintained and kept in the almirahsin 76.6% schools.

Teachers come on time in 91.6% schools.

Only 14.2% schools had a photo copy of filled in DISE DCF of previous years.

In 26.4% schools enumerators had faced problem in getting the information from the head masters.

68.7% schools had display board.

91.5% schools were found to be cooking Mid Day Meal for the students.

**Table 3.6 Principal /Head Master /Teacher status for providing information**

S. N.	Particulars	Category of School					Total
		Pri	PUP	PS	UP	UPS

### 3.7 Students enrollment and attendance

The student's enrollment and attendance on the day of survey was done and data is presented in table 3.6, 3.7 and 3.8.

Total 2,35,767 students enrolled, of these, SC students were 35,206 (14.9%) and ST students were 60,786 (25.8%).

Overall 58.3% students were found to be present in the class. Proportion of boy and girl students' attendance was equal.

Out of 60,786 ST students, 563% were present in the class.

Out of 35,206 SC students, 56% were present in the class.

## Chapter IV

### Suggestions and recommendation

National University of Educational Planning and Administration, Government of India designed the format of DCF and is used for collecting the DISE data. XISS has done careful study keeping in view of the importance of the 5% sample check of the DISE data. The special DCF for Post Enumeration Survey was provided by JEPC, Ranchi. Since the primary objective of the study was quality check of the filled DISE data therefore due care was taken up by the team while collecting the information.

The following conclusions were drawn from the study:

- ◆ The average deviation of DISE data from PES data, in respect of all comparable of items, was 4.5%.
- ◆ Difference on some points in two sets of formats (DISE and PES) or unfilled columns in prescribed formats of DISE data, etc. were the limitations confronted during analysis.
- ◆ The comparative study could not be made on certain points. Some examples were as follows:
  - The details of the Head Master i.e. educational qualifications, experience, etc.
  - Year of establishment of the school
  - Children enrollment in the last Academic year
  - Enrollment and attendance details of children on the date of survey
  - Grade wise Examination details for which Annual Examinations conducted in Last Academic Year.
  - Particulars of pre primary classes
- ◆ Apart from these, there were certain information collected on regular basis from schools under DISE data were missing in the special DCF- PES format, as follows:
  - Particulars of pre primary classes
  - Teacher training activities
  - School development
  - Maintenance grants
  - Infrastructure availability in the class rooms
  - Library facilities
  - Arrangements for disable students
  - School information on the whole. etc.
- ◆ While checking the copy of filled DISE format in the school some points were found to be left blank. Apart from this, on spot verification of the DISE data with the school register pertaining to enrollment, caste categories of the students, number of boys/girls, grading, etc. were found to be miss-matched.
- ◆ In some cases, the training for filling DISE format was conducted after September of the same academic year and thus the head masters/teachers received late the format from the BRCs/CRCs.
- ◆ A number of head masters did not participate in the training foDISE format. In many cases the DISE formats reached them through para teachers/ CRPs.

- ◆ CRPs of the respective clusters were not check/ verify the filled DISE Formats with the school records while collecting from the head masters.
- ◆ In most cases, the head masters did not able to provide information on few points like the year of establishment of the school, number of teachers' sanctioned post, disability, details of repeaters, caste of the students, etc.
- ◆ In many schools, the school registers/ records of the previous years i.e. 2006-07 & 2007-08 were not available. This caused the enumerators lot of inconvenience while collecting data for these schools.

### **Recommendations**

Based on the results of the survey the following recommendations are made for improving MIS:

- ◆ The DISE format is lengthy and hence it should be re-designed to keep it short and simple.
- ◆ Training should be conducted at the district level or block level by August of each academic year and the DISE Format should be distributed simultaneously. So that the head master/ teachers shall have proper time to fill the format and submit the same within stipulated time.
- ◆ BRC/ CRC should ensure the participation of the head master for training of DISE Format.
- ◆ The cluster level representatives should pay attention and verify the filled DISE format with the school register/record while collecting it from the head masters.
- ◆ Collection of data through DISE format may be ensured by October of each academic year so that the 5% Sample Check can be done after a gap of one month of the same academic year so that the results can be appropriately utilized for planning the activities for next academic year.

## Annexure I

## Chapter IV

### Suggestions and recommendation

National University of Educational Planning and Administration, Government of India designed the format of DCF and is used for collecting the DISE data. XISS has done careful study keeping in view of the importance of the 5% sample check of the DISE data. The special DCF for Post Enumeration Survey was provided by JEPC, Ranchi. Since the primary objective of the study was quality check of the filled DISE data therefore due care was taken up by the team while collecting the information.

The following conclusions were drawn from the study:

- ◆ The average deviation of DISE data from PES data, in respect of all comparable of items, was 4.5%.
- ◆ Difference on some points in two sets of formats (DISE and PES) or unfilled columns in prescribed formats of DISE data, etc. were the limitations confronted during analysis.
- ◆ The comparative study could not be made on certain points. Some examples were as follows:
  - The details of the Head Master i.e. educational qualifications, experience, etc.
  - Year of establishment of the school
  - Children enrollment in the last Academic year
  - Enrollment and attendance details of children on the date of survey
  - Grade wise Examination details for which Annual Examinations conducted in Last Academic Year.
  - Particulars of pre primary classes
- ◆ Apart from these, there were certain information collected on regular basis from schools under DISE data were missing in the special DCF- PES format, as follows:
  - Particulars of pre primary classes
  - Teacher training activities
  - School development
  - Maintenance grants
  - Infrastructure availability in the class rooms
  - Library facilities
  - Arrangements for disable students
  - School information on the whole. etc.
- ◆ While checking the copy of filled DISE format in the school some points were found to be left blank. Apart from this, on spot verification of the DISE data with the school register pertaining to enrollment, caste categories of the students, number of boys/girls, grading, etc. were found to be miss-matched.
- ◆ In some cases, the training for filling DISE format was conducted after September of the same academic year and thus the head masters/teachers received late the format from the BRCs/CRCs.
- ◆ A number of head masters did not participate in the training foDISE format. In many cases the DISE formats reached them through para teachers/ CRPs.

- ◆ CRPs of the respective clusters were not check/ verify the filled DISE Formats with the school records while collecting from the head masters.
- ◆ In most cases, the head masters did not able to provide information on few points like the year of establishment of the school, number of teachers' sanctioned post, disability, details of repeaters, caste of the students, etc.
- ◆ In many schools, the school registers/ records of the previous years i.e. 2006-07 & 2007-08 were not available. This caused the enumerators lot of inconvenience while collecting data for these schools.

### **Recommendations**

Based on the results of the survey the following recommendations are made for improving MIS:

- ◆ The DISE format is lengthy and hence it should be re-designed to keep it short and simple.
- ◆ Training should be conducted at the district level or block level by August of each academic year and the DISE Format should be distributed simultaneously. So that the head master/ teachers shall have proper time to fill the format and submit the same within stipulated time.
- ◆ BRC/ CRC should ensure the participation of the head master for training of DISE Format.
- ◆ The cluster level representatives should pay attention and verify the filled DISE format with the school register/record while collecting it from the head masters.
- ◆ Collection of data through DISE format may be ensured by October of each academic year so that the 5% Sample Check can be done after a gap of one month of the same academic year so that the results can be appropriately utilized for planning the activities for next academic year.
