P R E F A C E

The Directorate of Economics and Statistics, Government of Rajasthan has conducted a study and brought out a report on the "Post Enumeration of 5 percent Sample Checking of DISE Data in three Districts of Rajasthan : 2009-10". The publication is titled, "Post Enumeration of 5 percent Sample Checking of DISE Data in three Districts of Rajasthan : 2009-10". This publication presents data on findings of a 5 percent sample of schools of DISE data in three districts of Rajasthan for the academic year 2009-10. It has also been compared with the DISE DCF data on some selected indicators based on the availability of data from both the sources.

I would like to take this opportunity to thank the officers and staff of Directorate of Economics and Statistics for their cooperation, support, sincere and dedicated efforts and the NGO, Jankalyan Evam Paryavaran Sudhar Samiti, Jaipur for bringing out this publication under the technical guidance of the Directorate.

(Suraj Mal Raigar)

Executive Summary

Introduction to Rajasthan

Rajasthan is situated in the northern part of India. It is the largest State in India by area constituting 10.4 percent of the total geographical area of India and it accounts for 5.5 percent of population of India. Topographically, deserts in the State constitute a large chunk of the land mass, where the settlements are scattered and the density of population is quite low. It is administratively divided into 7 divisions, 32 districts, 241 Tehsils, 237 Panchayat Samities, 9,189 Gram Panchayats, 39,753 inhabited villages and 188 urban local bodies as of Census 2001. Recently, a new district has been carved out in the State namely Pratapgarh in 2008. Currently, there are 33 districts, 244 Tehsils, 249 Panchayat Samities and 9,166 Gram Panchayats. The State has a population of 56.5 million according to Census 2001.

According to the population projections by the technical group on population projections constituted by the National Commission on Population, population Projections for India and States 2001-2026, the projected population of Rajasthan as on 1st July, 2009 is 6.60 crore (66.0 million). The decadal growth rate of population of Rajasthan is 28.41 percent compared to 21.34 percent in case of India. In Rajasthan, there is a slight decline in the decadal growth rate from 28.44 during 1981-1991 to 28.41 during 1991-2001. In the last century (1901 to 2001), Rajasthan's population has grown by more than five times from 1.03 to 5.65 crore compared to India's population, which has seen a growth of more than four times, during the same period. The density of population of the State is quite low at 165 persons per sq. km. with large scale district level variations of 13 persons per sq. km. in Jaisalmer to 471 persons per sq. km. in Jaipur. The State's literacy rate stands at 60.4 percent. The overall sex ratio is of the tune of 921 females per 1,000 males and the sex ratio amongst the 0-6 year population is 909 females per 1,000 males. The sex ratio at birth in the State is masculine in nature at 870 female births per 1,000 male births, which is lower than that of India (904 female births per 1,000 male births) (*SRS, 2006-08).*The percentage of Scheduled tribes in the State is 12.6 percent. It is one of the High Focus States under National Rural Health Mission (NRHM, 2005-2012).

Though, the State has shown some progress on the human development front with the human development index showing progress from a rank of 12 in 1981 to 9 in 2001 amongst the 15 major States (National Human Development Report 2001), the Millennium Development Goals (MDGs) of health are far behind the desired levels. The Infant Mortality Rate (IMR), which is considered to be one of the most sensitive indicators of human development lies at 63 infant deaths per 1,000 live births compared to 53 per 1,000 live births in case of India *(SRS, 2008)*. The Maternal Mortality Ratio of the State is 388 maternal deaths per 100,000 live births compared to 254 maternal deaths per 100,000 live births in case of India *(SRS, 2004-06)*. It ranks third highest amongst the major States in India. The percentage of institutional deliveries is also dismally

low. The Total Fertility Rate (TFR) is also at a high level at 3.3 births per woman compared to 2.6 at the all India level *(SRS, 2008)* making the National Population Policy (NPP) 2000 goal of reaching the replacement level of fertility of 2.1 TFR and population stabilization a far-fetched dream. According to the projection report of Census 2001 with projections from 2001-2026, Rajasthan is projected to achieve replacement level TFR by 2021. The overall life expectancy of the State is 62.0 years with 61.5 years for males and 62.3 years for females *(SRS based abridged life tables, 2002-2006)*. It has gained 12.8 years between 1970-75 and 2002-06 compared to 13.8 years gain in case of India during the same period.

Background of the Study

The Directorate of Economics and Statistics has been commissioned to conduct a Study on the 5% post enumeration check of the DISE data. The District Statistical Officers (DSOs) and Statistical Assistants (SA) were entrusted with the task of collecting data by canvassing a semi-structured schedule called the special Data Capture Format (DCF). The reference period for the DISE data and the post enumeration survey (PES) are the same i.e. September 30, 2009 for the districts of Ajmer, Dausa and Jaisalmer for the year 2009-10. In the present report, data for the three districts of Ajmer, Dausa and Jaisalmer for the year 2009-10 has been presented.

In total, 395 schools were covered in the three districts of Ajmer, Dausa and Jaisalmer of Rajasthan. Out of which 302 were Government schools and 93 schools were Private (the actual sample size was 395, but 7 schools were found to be closed, out of which 3 were Government schools and 4 schools were Private). The data presented here is based on the 388 schools, out of which, 299 were Government schools and 89 were private schools, which were found open. The following findings are based on these 5% sample of schools covered in Post Enumeration Survey of special DCF data.

Percentage of variation between 5% PES and DISE data

There seems to be some variation between the regular DISE data captured by the DISE DCF and the special DCF of PES data. The two data sets have been compared on some indicators of school management, enrolment, pupil teacher ratio and availability of certain facilities and it is observed that there is variation between the two sets of data.

In case of school management, the variation is higher in case of private aided and private unaided schools, where none of the data is matching. In case of schools being managed by the school education department, the variation is 56.62 percent and in case of schools being managed by the local bodies, it is 46.43 percent.

In case of total enrolment, the variation ranges from 1.62 percent in Dausa to 6.27 percent in Ajmer. This variation is higher in case of private schools compared to Government schools.

In case of avialbility of facilities in schools, the variation is 42.70 percent, 7.71 percent, 7.48 percent and 1.19 percent for availability of girls' toilet, availability of electricity, availability of playground and the availability of common toilet in the schools respectively. The variation in the percentage of girls' toilets is due to fact that the Education Department has issued instructions to schools to consider single toilets as girl's toilets as a result of which, in the DISE DCF, single toilets have been referred to as girls' toilets.

In case of the number of pupils and teachers in the three districts, the variation in case of number of students ranges from 5.92 percent in case of Ajmer to 1.63 percent in Dausa and in case of number of teachers, 43.35 percent in case of Ajmer to no variation in case of Dausa.

Variation is also observed with respect to school type with 178 primary schools being reported in PES compared to 185 schools reported in DISE data.

The overall percentage of variation computed between the two sets of data based on the data from the above indicators available from the two sets of data reveals a variation of 4.75 percent.

Total Enrollment in the selected schools

Overall, in the three districts, the total enrollment upto upper primary in 2008-09 was 51,859, out of which 28,720 were boys and the rest 23,139 were girls. In Ajmer district, the total enrollment upto upper primary in 2008-09 was 28,036, out of which, 14,985 were boys and the rest 13,051 were girls. In Dausa district, the total enrollment upto upper primary in 2008-09 was 16,745, out of which 9,483 were boys and the rest 7,262 were girls. In Jaisalmer district, the total enrollment upto upper primary in 2008-09 was 7,078, out of which, 4,252 were boys and the rest 2,826 were girls. Overall, in the three districts total enrollment upto upper primary in 2009-10 was 50,908, out of which 27,898 were boys and the rest 23,010 were girls. In Ajmer district, the total enrollment upto upper primary in 2009-10 was 28,157, out of which 4,964 were boys and rest 13,193 were girls. In Dausa district, the total enrollment upto upper primary in 2009-10 was 16,040, out of which 8,923 were boys and the rest 7,117 were girls. In Jaisalmer district, the total enrollment upto upper primary in 2009-10 was 6,711, out of which, 4,011 were boys and rest 2,700 were girls.

Enrollment of girls per 1,000 boys

Overall, in the three districts of Rajasthan, the number of girls enrolled per 1,000 boys in 2008-09 was 806. Among the three districts this figure is 871 for Ajmer, 766 for Dausa and 665 for Jaisalmer. Overall, in the three districts of Rajasthan, the number of girls per 1,000 boys enrolled in 2009-10 was 825. Among the three districts, this figure was 882 for Ajmer, 798 for Dausa and 673 for Jaisalmer. It is lowest in case of Jaislamer as in case of the regular DISE DCF data. The data reveals that, the total number of girls enrolled per 1,000 boys, in the three districts has increased from 806 in 2008-09 to 825 in

2009-10. The percentage increase, in girls' enrollment per 1,000 boys, is highest in Dausa district at 4.18 percent.

Enrollment of SC and ST

With regards to the enrollment by social category, the percentage of ST (12.05 percent) enrollment is low, compared to SC and others in the total of the three districts in the year 2008-09. It has still declined to 11.33 percent in 2009-10, which is a matter of concern in the 5% of the schools covered in the survey.

Filled up position of Teachers

Overall, the percentage of teachers post filled up against the total post sanctioned in the three districts, is 87.93 percent, out of which, 96.07 percent teachers post filled up in private school and 82.64 percent in government schools. Overall, the percentage of teachers post filled up out of the total post sanctioned, is highest in Dausa 92.43 percent and lowest in Jaisalmer (83.27 percent). In case of private schools, this figure is highest in Jaisalmer (98.21 percent) and lowest in Ajmer (95.75 percent). In case of government schools, this figure is highest in Dausa (89.12 percent) and lowest in Jaisalmer (79.34 percent).

Type of schools for Girls or boys only or Co-education

Overall, in the three districts, 82.22 percent schools are Co-Ed, 12.37 percent schools are only for boys and rest 5.41 percent are only for girls. The highest percent of Co-Ed schools is in Jaisalmer (96.15 percent) and lowest in Dausa (64.62 percent). The highest percent of schools which are only for boys is in Dausa (30.77 percent) and lowest in Jaisalmer (1.28 percent). Similarly the highest percent of schools, which are only for girls, are in Ajmer (7.22 percent) and lowest in Jaisalmer (2.56 percent). Out of total schools in the 3 districts among the schools having primary only, 85.96 percent schools are Co-Ed, 12.92 percent schools are only for boys and 1.12 percent schools are only for girls.

Gender – wise teachers employed

In the three districts overall, 55.36 percent male and 44.64 percent female teachers are working other than the headmaster. In primary, it is 50.30 percent for male and 49.70 percent for female, whereas in upper primary, it is 56.91 percent for male and 43.09 percent for female.

Teachers present on the day of survey

Overall, 39.35 percent teachers were present on the day of survey out of total working teachers. The highest percent of teachers were present in Jaisalmer district (79.46 percent) followed by Ajmer (35.44 percent) and lowest was in Dausa (31.01 percent).

Infrastructure facilities

With regards to the status of school building, in the Government schools of the 3 districts, the highest percent of schools are functioning in government building (96.32 percent) followed by government on rent (2.67 percent) and 1 percent are without building.

With regards to the status of school building, in the Private schools of the 3 districts the highest percent of schools are functioning in Private on rent (56.18 percent) followed by Private building (43.82 percent).

With regards to the type of school building, out of the total sample of 388 schools in the three districts 95.10 percent are pucca, 4.12 percent are partially pucca and 0.77 percent are kuccha.

Availability of rooms by condition

In Government Schools, out of total rooms available in the school in the 3 districts, 78.40 percent are in good condition, 14.98 percent need minor repairs, 4.62 percent need major repairs and 2.00 percent are not in a usable condition. In Private Schools, out of total rooms available in the school in the 3 districts, 92.62 percent are in good condition, 4.70 percent need minor repair, 0.17 percent need major repair and 2.52 percent are not in a usable condition. In total, out of total rooms available in 388 sampled schools in the 3 districts, 81.79 percent are in good condition, 12.53 percent need minor repair, 3.56 percent need major repair and 2.12 percent are not in a usable condition. Overall, in the 3 districts, the average number of classrooms is 4. This is highest in Ajmer (6) followed by Dausa (5) and lowest in Jaisalmer (4).

Availability of Boundary Walls

Overall, in the three districts 52.17 percent Government school and 59.55 percent private schools have permanent boundary walls in the schools. For temporary boundary walls, it is 18.06 percent for Government schools and 12.36 percent for private Schools, whereas in 29.77 percent Government schools and 28.09 percent private schools, no boundary wall is present.

Other Facilities available in schools

Playground

With regards to the availability of playgrounds in the schools, overall, 44.82 percent Government and 43.82percent private schools have this facility. For Government schools, it is highest in Ajmer (59.56 percent) followed by Dausa (41.49 percent) and lowest in Jaisalmer (20.29 percent). For private schools, the highest percent of schools in which playground facility is available, covered under Ajmer district (47.73 percent) followed by Jaisalmer (44.44 percent) and lowest in case of Dausa (38.89 percent).

Girls' and common toilet and separate toilet for teachers and other staff

It is evident that, out of the total sample of 388 schools in 51.84 percent Government and 64.04 percent private schools girls' toilets are available. In case of Government school, it is highest in Jaisalmer (63.77 percent) followed by Ajmer (54.41 percent) and lowest in Dausa (39.36 percent), whereas in case of private Schools, it is highest in Jaisalmer (88.89 percent) followed by Ajmer (68.18 percent) and lowest in Dausa (52.78 percent).

Out of the total sample of 388 schools, in 64.21 percent Government and 71.91 percent private Schools, common toilets are available. In case of Government schools, it is highest in Dausa (71.28 percent) followed by Ajmer (64.71 percent) and lowest in Jaisalmer (53.62 percent). In case of private schools, it is highest in Dausa (75 percent) followed by Ajmer (70.45 percent) and lowest in Jaisalmer (66.67 percent).

Overall, in 3 districts 15.72 percent Government and 34.83 percent private schools, separate toilet facility for teachers and other staff are available. Out of total sample of 388 schools, in 19.32 percent school only a single teacher is working. It is highest in Jaisalmer (46.15 percent) followed by Dausa (17.69 percent) and lowest in Ajmer (8.88 percent).

Electricity

Out of the total sample of 388 schools, only in 29.77 percent Government and 73.03 percent private schools electricity is available. In Ajmer district, it is 45.59 percent for Government and 86.36 percent for private For Dausa district, it is 12.77 percent for Government and 58.33 percent for private Schools, Whereas, in case of Jaisalmer district, it is 21.74 percent for Government and 66.67 percent for private schools.

Drinking water

Overall, in the 3 districts in 89.97 percent Government and 100.00 percent private Schools, drinking water facility is available. For Government schools, it is highest in Ajmer (91.91 percent) followed by Dausa (89.36 percent) and lowest in Jaisalmer (86.96 percent), whereas in case of private Schools, drinking water facility is available in all the schools. Out of the total sample of 388 schools, the most popular source of drinking water in Government schools, is hand pump (46.15 percent) followed by tap water (25.42 percent) followed by others (17.73 percent) and lowest is well water (0.67 percent). Whereas in case of private Schools, tap water is the most popular source of drinking water covering (62.92 percent) schools, followed by other sources (17.96 percent) followed by hand pump (15.73 percent) and lowest is well water (3.37 percent).

Computer Facility

Out of the total sample of 388 schools, in 11.71 percent Government and 46.07 percent private Schools, computer facility is available. For Government schools it is highest in Ajmer (13.97 percent) followed by Jaisalmer (13.04 percent) and lowest in Dausa (7.45 percent). In case of private schools, it is highest in Ajmer (61.36 percent), followed by Jaisalmer (55.55 percent) and it is lowest in Dausa (25.00 percent).

Furniture

Overall, in the 3 districts in 90.30 percent Government schools, chairs are not available to student followed by 8.70 percent schools where chairs are available to some students followed by 1.00 percent where chairs available to all students. Whereas in case of private schools, in 66.29 percent schools chairs are not available to students followed by 19.90 percent chairs available to all students, followed by 14.61 percent where chairs available to some student.

Other Important aspects

Some other aspects, which were also investigated, are as follows:

- Overall, in the 3 districts, in 99.00 percent government and 97.75 percent private schools, attendance register was properly maintained.

- In the 3 districts, in 70.23 percent government and 62.92 percent private schools, school report card was available.

- Overall, in the 3 districts, 70.23 percent government and 62.92 percent private schools were found to be maintaining records properly.

- Overall, in the 3 districts, in 73.58 percent government and 69.66 percent private schools, DISE format was available.

- Overall, in the 3 districts, in 97.66 percent government and 11.24 percent private schools, midday meal facility was available in the school. Overall, in the 3 districts, in 25.00 percent of the schools, the quality of midday meal was good, in 73.63 percent quality of midday meal was satisfactory whereas in 4.68 percent schools, its quality was not satisfactory in case of Government Schools. In case of Private schools in 100.00 percent schools, the quality of midday meal was good.

- Overall, in the 3 districts, the Student-Class room ratio is, 25.80. For government schools, this ratio is 23.76, whereas for private schools, this ratio is 29.24. Among the three districts, this ratio is highest in Ajmer (27.57) followed by Dausa (25.75) and lowest in Jaisalmer (20.43). For government schools, this ratio is highest in Ajmer (25.67) followed by Dausa (22.71) and lowest in Jaisalmer (20.88). For private schools, this

ratio is highest in Ajmer (30.32) followed by Dausa (30.23) and lowest in Jaisalmer (18.64). Overall, in the 3 districts, the Pupil Teacher ratio is 25.05. For government schools, this ratio is 24.29 whereas, for private schools, this ratio is 26.17. Among the three districts, this ratio is highest, in Jaisalmer (30.00) followed by Dausa (28.39) and lowest in Ajmer (22.63). For government schools, this ratio is highest in Jaisalmer (32.49) followed by Dausa (28.56) and lowest in Ajmer (20.75). For private schools, this ratio is highest in Dausa (28.22) followed by Ajmer (25.47) and it is lowest in Jaisalmer (22.36).

Recommendations

The following are some of the recommendations based on field experience:

- The system of DISE needs to be popularized by the School education department by making it usable at the district administration level to identify low performing panchayat samitis and panchayats and by the schools.

- The DISE formats should also be made available at all schools without fail as in the PES, it is revealed that in the 5% schools that the survey was carried out, in Jaisalmer district, in only 7.25 percent of schools the DISE format was available in the Govt schools.

- There needs to be periodic dissemination of data and feedback needs to be taken from the community level.

- Strict Monitoring of the DISE DCF formats needs to be done to ensure quality of data and reduce variation.

- The DISE data should be made available in excel format on the website, so that further analysis could be done on it easily.

- The focus needs to be on other indicators in addition to Gross and Net enrolment ratio.

Chapter 1

Chapter 1 Introduction

Education is one of the most important factors influencing the development of a nation. It is a decade, since the international community adopted the following six Education for All (EFA) goals in Dakar, Senegal, during April 26-28, 2000:

1. expanding and improving comprehensive early childhood care and education, especially for the most vulnerable and disadvantaged children;

2. ensuring that by 2015 all children, particularly girls, children in difficult circumstances and those belonging to ethnic minorities, have access to and complete free and compulsory primary education of good quality;

3. ensuring that the learning needs of all young people and adults are met through equitable access to appropriate learning and life skills programmes;

4. achieving a 50 percent improvement in levels of adult literacy by 2015, especially for women, and equitable access to basic and continuing education for all adults;

5. eliminating gender disparities in primary and secondary education by 2005, and achieving gender equality in education by 2015, with a focus on ensuring girls' full and equal access to and achievement in basic education of good quality;

6. improving all aspects of the quality of education and ensuring excellence of all so that recognized and measurable learning outcomes are achieved by all, especially in literacy, numeracy and essential life skills.

Worldwide consensus has been reached to declare Universalization of Primary Education as the second MDG for achievement by 2015 only after eradication of poverty, which is the first goal. As mandated by the 86th Amendment to the Constitution of India making free and compulsory elementary education to children of ages 6-14 a fundamental right, the Government of India launched, the *'Education for All'* (*Sarva Shiksha Abhiyan)'* programme to achieve the goal of Universalization of Elementary Education of satisfactory quality by 2010. In spite of significant achievements in education sector, there are many pitfalls. Most important constraints in the education system are quantitative expansion, increasing privatization particularly after the globalization in 1990 and increase in inequality and exclusion of the vulnerable groups of population in education. In order to examine the exact situation of education there is a need for correct and unambiguous data base which is very much weak in respect of education. The data and information about education system are not

available in one place and from one source. There are differences in similar data from two/three different sources which actually are not available easily. It was strongly felt by the policy makers, planners and decision makers to make the data easily accessible and available in a more user friendly manner.

The introduction of DISE educational Management and Information System is an innovative step in this direction. DISE is a system for the collection, integration, processing, maintenance and dissemination of data and information to support in decision making, policy analysis and formulation, planning, monitoring and management of data at all levels of an education system.

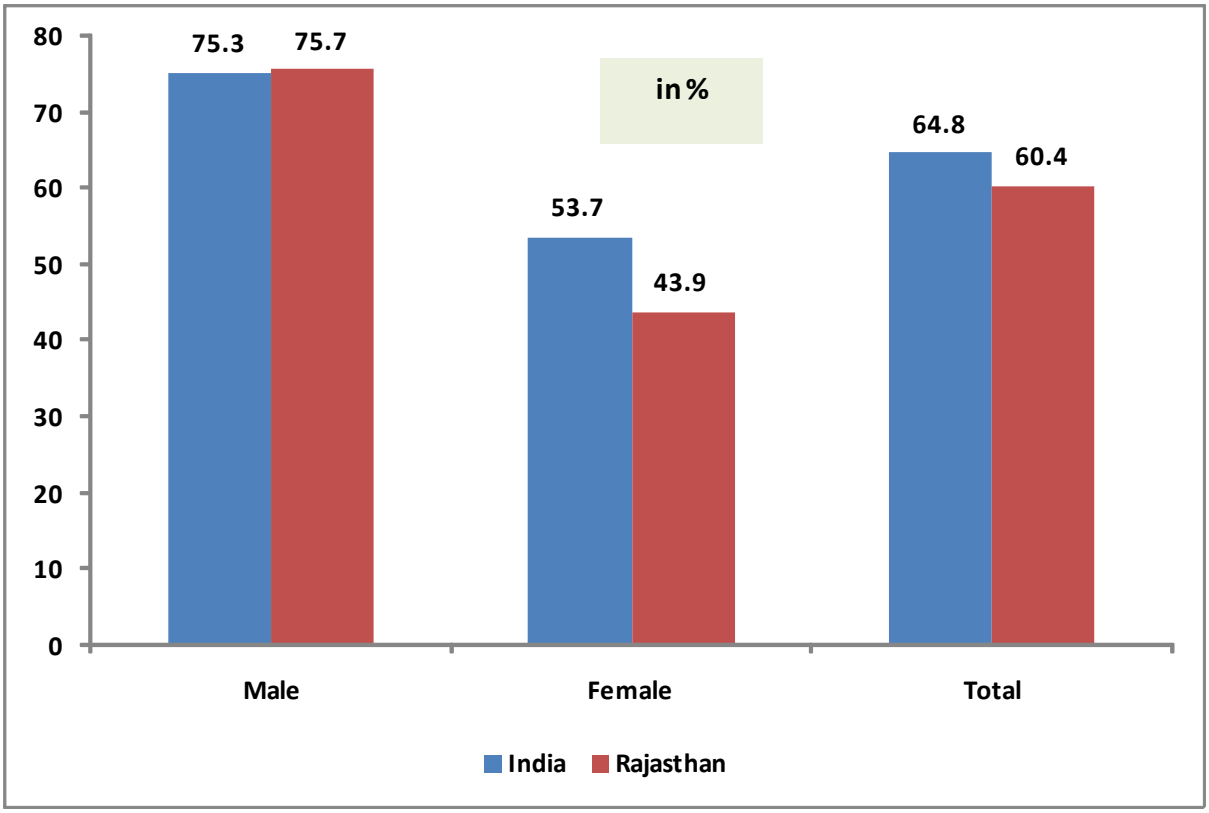
The State Government is committed to achieving the national goals and has been steadily increasing the budgetary allocation for education. The State has also made significant strides in higher and technical education.

The Status of Literacy and Education in India and Rajasthan

Education and Literacy are the two most important factors affecting the progress of a nation and State. It is such an important indicator that it has been agreed upon and focused by a collective of nations as the second most important Millennium Development Goal out of the eight goals related to poverty, health, women empowerment, environment sustainability and Global Partnership for Development.

Literacy rate in Census 2001 has been computed as the number of persons literate 7 and above years of age. According to Census 2001, the literacy rate of India stands at 64.8 percent. Amongst all the States, it is highest in case of Kerala (90.9 percent) and lowest in case of Bihar (47.0 percent). The literacy rate of Rajasthan is 60.4 percent. Though the total literacy of Rajasthan is lower than the national average, the male literacy rate is slightly higher than the national average. The female literacy is less than half at 43.9 percent compared to a little over half (53.7 percent) at the all India level. It ranks 29th in terms of literacy.

Figure 1: Literacy Rates in India and Rajasthan by Gender, Census 2001



Source : Census of India, 2001

Gender-wise, there is a big gap between male and female literacy. Male literacy in Rajasthan is higher than in case of India, but female literacy in Rajasthan is lower than the all India average.

The Gross enrollment ratio for primary education for the period of 2008-09 in the State is 116.54 compared to 115.31 in case of India according to the report by NUEPA.

Table 1 : Literacy and Enrollment in Rajasthan and India

Indicators	***Year***	***Rajasthan***	***India***
Literacy Rate (persons of age 7+) Census 2001	2001	60.4	64.8
Gross Enrollment Ratio (I-V class)	2008-09	116.54*	115.31*

Socio-demographic Profile of Rajasthan and Districts

Population

Rajasthan ranks eighth amongst all the States in India with a population of 5.65 crore (56.5 million). Population in Rajasthan has increased from 1.03 crore (10.3 million) in 1901 to 5.65 crore (56.5 million) in 2001 in a span of 100 years. It is projected to reach about 8.2 crore (81.5 million) by 2026. By another set of projections it is projected to reach 16.8 crore (168.3 million) by 2101 under scenario A, where TFR is assumed to be at replacement level of 2.1 and it is projected to be 14.7 crore (147.3 million) under scenario B with a TFR of 1.85[1]. In terms of decennial growth rate (1991-2001), Rajasthan's growth rate (28.41 percent) is higher than India (21.34 percent) *(Census Info Version 2, ORGI, Government of India)*. Rajasthan ranks 12th in terms of decadal growth rate in India. Amongst all the States, the north eastern State of Nagaland has the highest decennial growth rate (1991-2001) of 64.53 percent. Amongst the districts in Rajasthan, Jaipur is the largest by population at 52.5 lakh and Jaisalmer is the smallest at 5.1 lakh. In terms of decennial growth rate amongst the districts in Rajasthan, Jaisalmer has the highest decennial growth rate (1991-2001) of 47.52 percent and Rajsamand has the lowest (19.97 percent).

Population Density in Rajasthan

Population density is the number of persons inhabiting in an area of one sq. km. According to Census 2001, the Population density of India is 325 persons per sq. km. Amongst all the States in India, West Bengal has the highest density of population at 903 persons per sq. km. and Arunachal Pradesh has the lowest density with 13 persons per sq. km. The population density of Rajasthan is 165 persons per sq.km, little less than half of that of India. Rajasthan ranks 24th in population density amongst all the States in India. Amongst the districts in Rajasthan, Jaipur is the densest with 471 persons per sq.km. and Jaisalmer is the least dense with only 13 persons per sq.km. The low density of population in the State is also related to issues of service delivery.

[1] *Source : The Future Population of India : A Long Range Demographic view, Population Foundation of India and Population Reference Bureau, 2007*

Rural-Urban Distribution

Residence in terms of rural or urban location is an important background characteristic of a population. Urban areas usually have concentrated population with better access to resources and facilities resulting in better indicators. India has 72.2 percent rural population and 27.8 percent urban population. Amongst all the States, Himachal Pradesh has the highest percentage of rural population (90.2 percent) and Goa has the least percentage of rural population at 50.2 percent. Goa is the most urbanized State in India. In Rajasthan, the percentage of rural population (76.6 percent) is little higher than India. Amongst the districts in Rajasthan, Banswara has the highest percentage of rural population at 92.85 percent followed by Dungarpur (92.70 percent), Barmer (92.60 percent) and Jalore (92.41 percent). Kota has the lowest percentage of rural population at 46.54 percent followed by Jaipur (50.64 percent) and Ajmer (59.91 percent). Kota is the most urbanized district in Rajasthan.

Population of Scheduled Castes (SC)

The percentage of scheduled castes in India is 16.2 percent and the percentage of scheduled tribes is 8.2 percent of the total population. Amongst the States, Punjab has the highest SC population (28.9 percent) and Mizoram has the lowest (0.03 percent). In case of ST population, Mizoram has the highest percentage (94.5 percent) and Goa has the lowest percentage of ST (0.04 percent). Amongst the selected districts, Ajmer is the most populated with a population of 21.8 lakh constituting 3.9 percent of the total population and Jaisalmer is the least populated with 5.0 lakh population with 0.9 percent of the total population. Amongst these six districts, Kota has the highest literacy rate (73.5 percent) and Banswara has the lowest literacy rate (44.6 percent).

Population of Scheduled Tribes (ST)

Rajasthan has 17.2 percent SC and 12.6 percent ST population. Amongst the districts in Rajasthan, Ganganagar has highest SC population (33.72 percent) and Dungarpur has the lowest (4.15 percent). Banswara has the highest percentage of ST population (72.3 percent) followed by Dungarpur (65.1 percent) and Udaipur (47.9 percent). The above three districts have the highest ST population. The district with the least percentage of ST is Nagaur (0.2 percent).

Infant Mortality Rate (IMR)

One of the most sensitive indicators of health of a nation namely IMR, which is an important indicator of the fourth MDG of reducing child mortality, is at a high level in the State. The MDG target 4A is to reduce by two-thirds, between 1990 and 2015, the under-five mortality rate. The current IMR stands at 63 infant deaths per 1,000 live births compared to 53 infant deaths per 1,000 live births for India (SRS, 2008). Amongst all the States, Madhya Pradesh has the highest IMR (70 infant deaths per 1,000 live births) and Manipur has the

lowest IMR (14 infant deaths per 1,000 live births). The IMR in Rajasthan has registered a 42 percent decline from a high of 108 infant deaths per 1,000 live births in 1985 to it is level.

Maternal Mortality Ratio (MMR)

One of the most important indicators of the fifth MDG of improving maternal health is the maternal mortality ratio. The MDG target 5A is to reduce by three quarters (75 percent), between 1990 and 2015, the Maternal Mortality Ratio. According to the latest special bulletin on maternal mortality, 2004-06, the MMR of India is 254 maternal deaths per 100,000 live births (95 percent CI 239-269) and that of Rajasthan is 388 maternal deaths per 100,000 live births (95 percent CI 314-462) (*Special Bulletin on Maternal Mortality in India 2004-06, SRS, ORGI).* Amongst the States in India, Rajasthan ranks third after Assam (480 maternal deaths per 100,000 live births) followed by Uttar Pradesh/ Uttaranchal (440 maternal deaths per 100,000 live births). Kerala has the lowest MMR at 95 maternal deaths per 100,000 live births amongst the bigger States. Rajasthan has registered a decline of 24 percent from 508 in 1997-98 to 388 in 2004-06 compared to 36 percent in case of India during the same period from a high of 398 in 1997-98 to 254 in 2004-06 (SRS, 2004-06). The eleventh plan goal is to achieve a level of 148 maternal deaths per 100,000 live births *(Eleventh Five Year Plan (2007-12), Vol. 2, Social Sector, Planning Commission).*

Status of Literacy and Education in Rajasthan and Districts

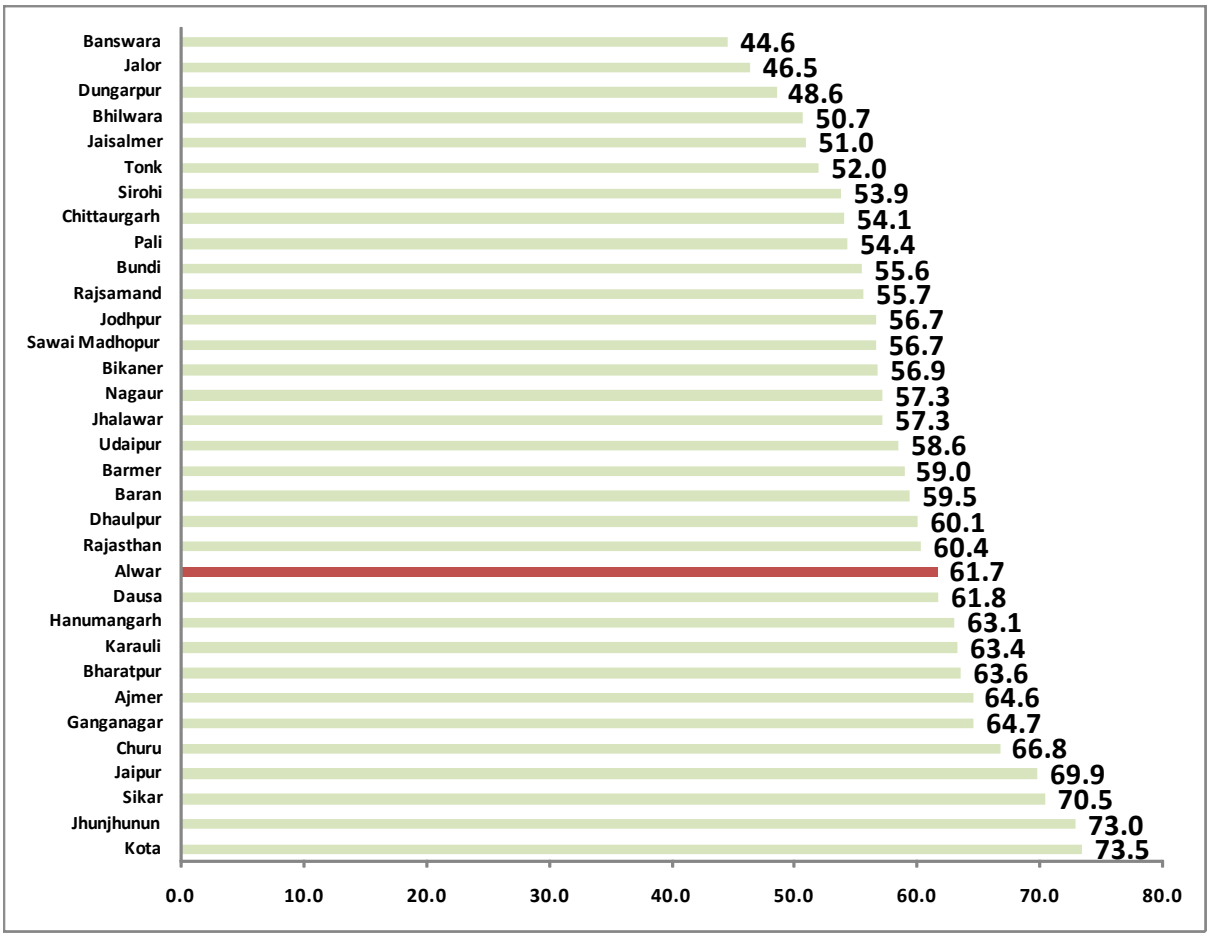
As per the 2001 Census, Rajasthan recorded a literacy rate of 60.4 percent as compared to 38.6 percent in the year 1991, registering a net increase of 21.8 percent during the decade 1991-2001. The subsequent figures for male and female literacy rates are 75.7 and 43.9 percent respectively. As a result, the gap between literacy rates in the state when compared to the national aggregate has reduced from 14 percentage points in the year 1991 to a mere four percentage points in 2001. Amongst the districts in Rajasthan, Kota has the highest literacy rate (73.5 percent) and Banswara has the lowest literacy rate (44.6 percent) *(Census 2001).*

Table 2 : Socio-Demographic Profile of the Districts in Rajasthan arranged in alphabetic order

State/ District	*Population, Census 2001 (in lakh)*	*% of Total Population*	*Literacy Rate, Census 2001*	*Area, Census 2001 (in1,000 Sq. Km.)*	*Population Density, Census 2001 (Persons per Sq. Km.)*	*Decennial Growth Rate (1991-2001) (in percent)*	*% of SC, Census 2001*	*% of ST, Census 2001*
Rajasthan	**565.1**	**-**	**60.4**	**342.2**	**165**	**28.4**	**17.16**	**12.56**
Ajmer	21.8	3.9	64.6	8.5	257	26.2	17.71	2.41
Dausa	13.2	2.3	61.8	3.4	384	32.4	21.21	26.82
Jaisalmer	5.1	0.9	51.0	38.4	13	47.5	14.58	5.48

Source : Census of India, 2001

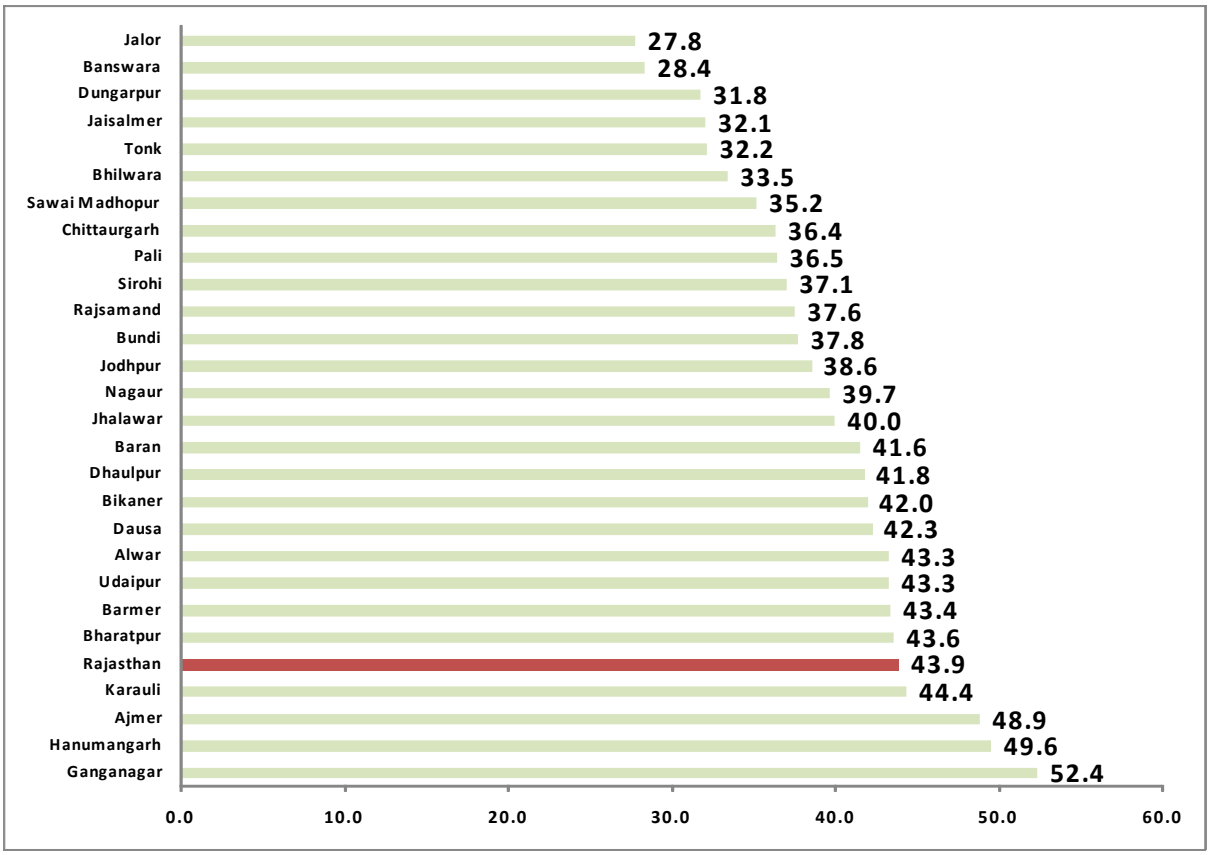
Figure 2 : Total Literacy Rates in the Districts in Rajasthan, Census 2001 (in %)



Source : Census of India, 2001

Female literacy rate according to Census 2001 varies from 52.4 percent in case of Ganganagar district to 27.8 percent in case of Jalore district.

Figure 3 : Female Literacy Rates in the Districts in Rajasthan, Census 2001 (in percent)



Source : Census of India, 2001

In case of the six selected districts, female literacy rate according to Census 2001 varies from 61 percent in case of Kota district to 28 percent in case of Banswara district.

Table 3 : Percent of Female Literacy in the selected Districts in Rajasthan arranged in alphabetic order (in percent)

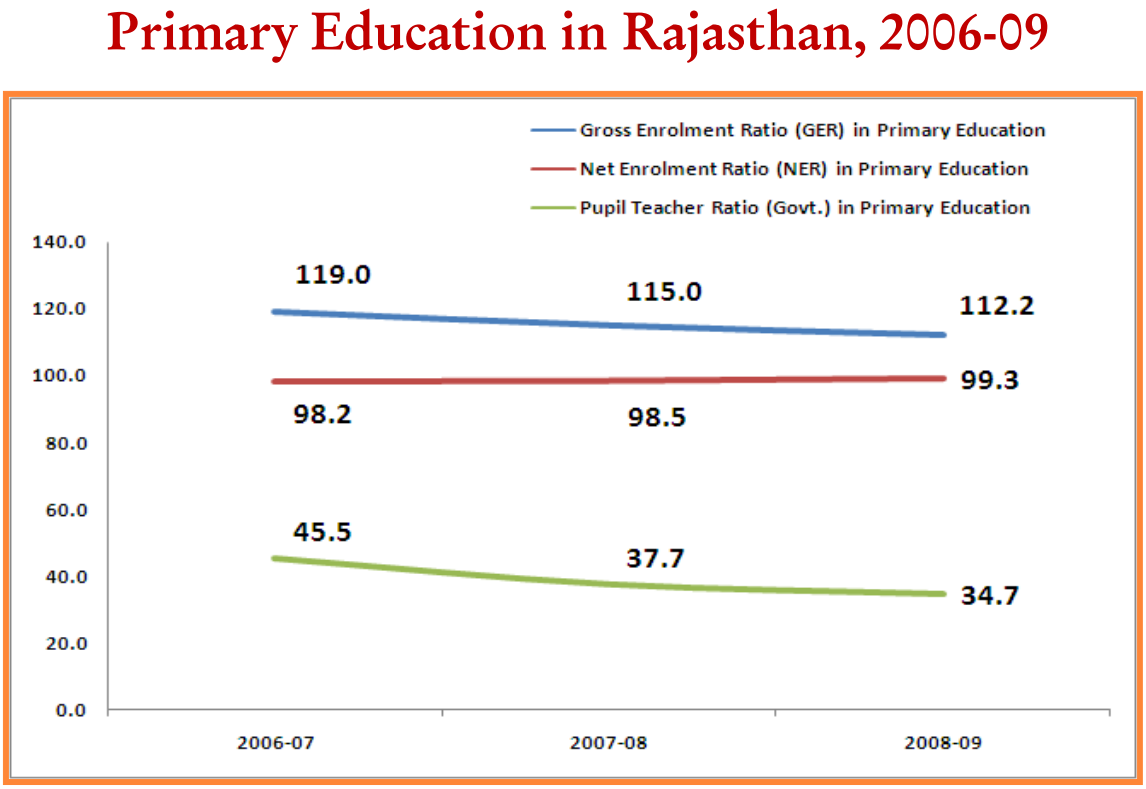
Rajasthan/ District	*% of Female Literacy*
Rajasthan	**44**
Ajmer	49
Dausa	43
Jaisalmer	32

Source : Census of India, 2001

The Net enrollment ratio for primary education is an MDG indicator, which has increased from 98.22 percent in 2006-07 to 99.25 percent in 2008-09. The pupil teacher ratio has also declined from 45.54 percent in 2006-07 to 34.67

percent in 2008-09. Observations reveal that female-male ratio in education has also been steadily improving over the years.

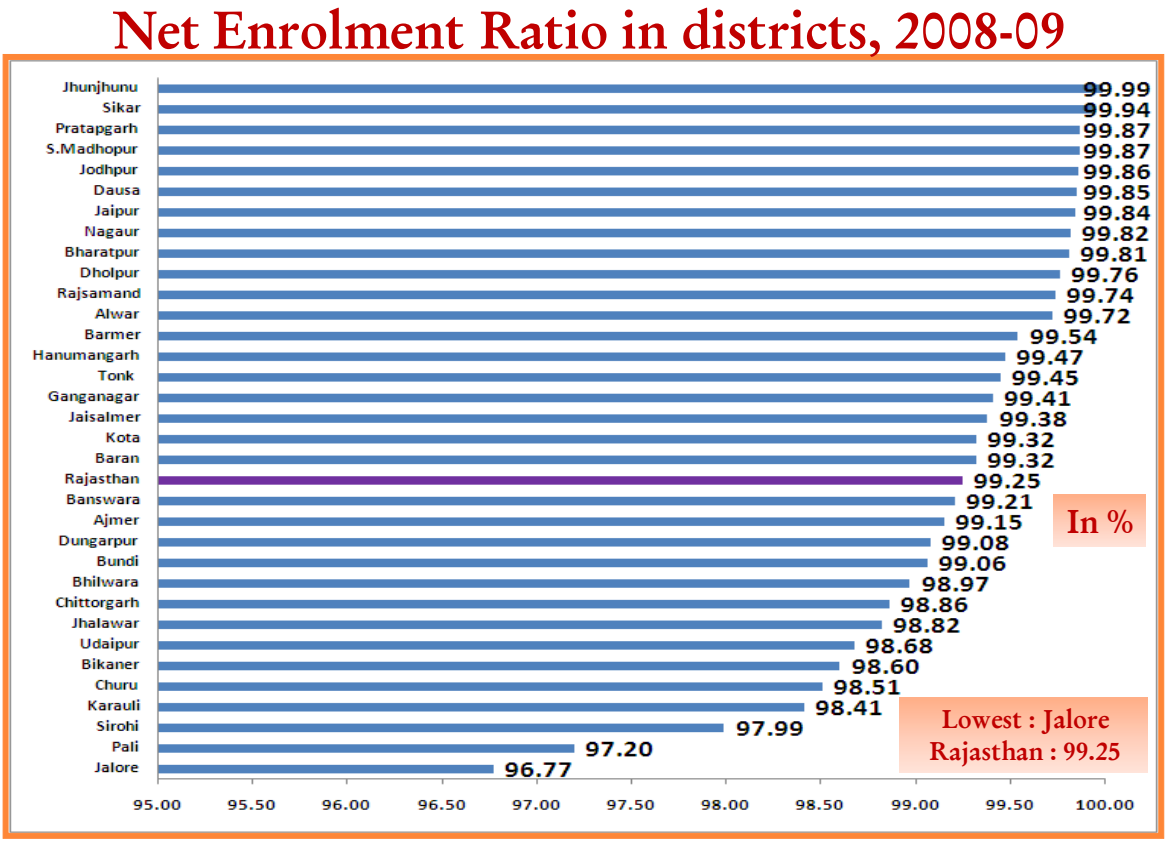
Figure 4 : Primary education in Rajasthan, DISE, 2006-09 (in %)



Source: District Information System for Education, 2006-2009

The District-wise Net enrollment ratio (NER) for the educational year 2008-09 reveals that the district with the highest NER is Jhunjhunu (99.99 percent) followed by Sikar (99.94 percent) and the lowest NER is observed in case of Jalore district (96.77 percent).

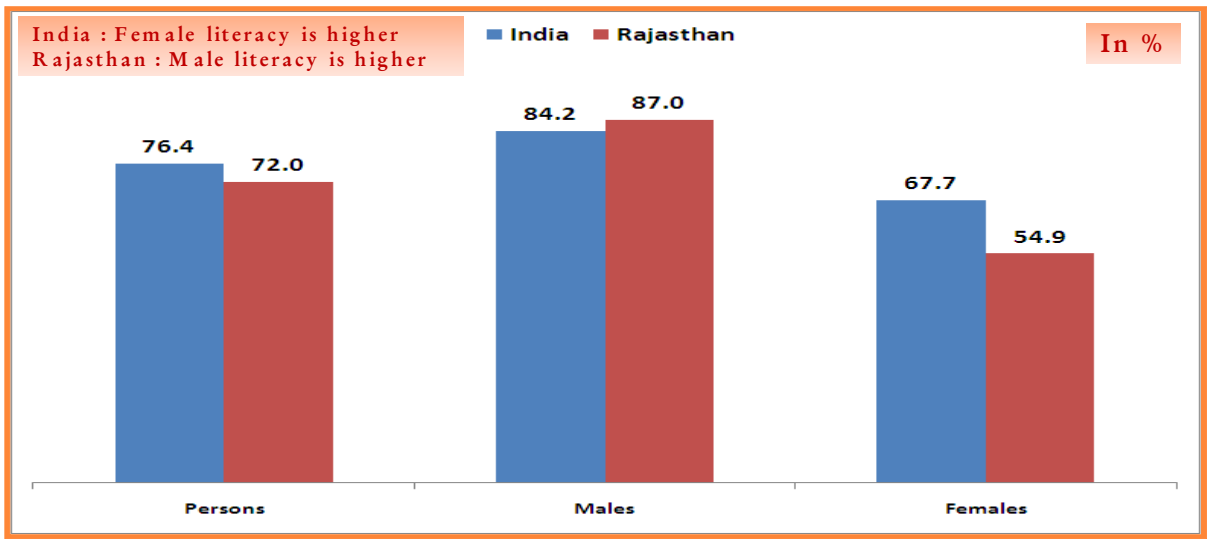
Figure 5 : Net Enrollment Ratio in districts of Rajasthan, DISE, 2008-09 (in %)



Source: District Information System for Education as on September 30, 2008, Shikshya Sankul, Jaipur

The other significant MDG indicator of Literacy rate of 15–24 year-olds women and men has been compared below with India, which reveals that amongst 15–24 year-olds women and men, in case of Rajasthan the female literacy is lower than the all India average, whereas, the male literacy is higher than the all India average.

Figure 6 : Literacy Rate of 15-24 year old Rajasthan and India, Census 2001 (in %)



Sources : Computed from Census 2001

The DISE data for the educational year 2008-09 as of September 30, 2008 reveals that there are more than one lakh schools in Rajasthan, in which there is a total enrollment of 12.79 million children in the primary and upper primary category. There are still about a little less than 1 lakh out of school children (91,726). The Net enrollment ratio of Rajasthan is 99.25 percent and the pupil-teacher ratio in the Government schools is 34.67. The percentage of children who have passed with greater than or equal to 60 percent are 51.60 percent and the number of girls per 1,000 boys enrolled is 813. Amongst the selected six districts, Banswara has the highest number of schools (3,577) and Jaisalmer has the lowest (1,596). The NER is highest in case of Jaisalmer (99.84 percent) and lowest in case of Banswara (99.15 percent). The Pupil-Teacher Ratio (PTR) is lowest in case of Kota (25.80) and the highest in case of Dausa (33.39). The number of girls per 1,000 boys upto eighth class is highest in case of Dausa (850) and Kota (850) and lowest in case of Jaisalmer (695).

Table 4 : Key Indicators from DISE, 2008-09 for Rajasthan and the three selected districts

Rajasthan/ District	*% of Total Literacy*	*Total Schools*	*Total Enrollment*	*Out of School Children*	*NER (%)*	*PTR (Government)*	*Pass percent (>=60 percent)*	*No. of Girls per 1,000 Boys enrolled*

Objectives of the Study

The broad objectives of the present study are:

1. to verify and validate the data collected through DISE
2. to study the usefulness of DISE data required for achieving the goal of Primary and Higher Primary education
3. to suggest appropriate measures for improving the quality of DISE data.

Chapter 2

Chapter 2 Study Methodology

Background

The Directorate of Economics and Statistics has been commissioned to conduct a Study on the 5% post enumeration check of the DISE data. The District Statistical Officers (DSOs) were entrusted with the task of collecting data by canvassing a semi-structured schedule.

Reference Period

The reference period for the DISE data and the post enumeration survey (PES) are the same i.e. September 30, 2009 for the districts of Ajmer, Dausa and Jaisalmer for the year 2009-10. In the present report, data for the three districts of Ajmer, Dausa and Jaisalmer for the year 2009-10 have been presented.

Table 5 : Reference period of data of the three selected districts of Rajasthan, 2009-10

Sl. No.	*District*	*Reference Period*
1	Ajmer	2009-10
2	Dausa	2009-10
3	Jaisalmer	2009-10

Study Design

The guidelines for the study design and the name of the selected districts was provided by the Department of School Education, Government of Rajasthan, where it was suggested that 5 percent of Schools have to be selected from the three selected districts of Ajmer, Dausa and Jaisalmer.

Sampling Procedure

The study was planned to collect data from three districts covering 5 percent of the total primary and higher primary schools. The Department of School Education provided the list of Schools in the three districts of Ajmer, Dausa and Jaisalmer to be covered in the Post Enumeration Survey. The total number of schools in all these three districts are to the tune of 7,447 out of which 5,533 (74.29 percent) are in the Government sector and 1,914 (25.70 percent) are in the Private sector. According to the sampling guideline, all the schools were stratified into Government and Private sector schools and 5 percent of the schools were selected by systematic random sampling from these two categories of Government and Private schools.

Data Collection

The study was carried out in three districts of Rajasthan namely; Ajmer, Dausa and Jaisalmer. In all, 7,447 schools are present in these six districts and 5 percent of these schools (395) have been selected by systematic random sampling after stratifying the schools as Government and Private schools. In total, 302 Government schools and 93 private schools have been covered in the survey.

In all, 395 schools have been selected from a total of 7,447 schools with 302 Government Schools and 93 private schools, with 180 in Ajmer, 133 in Dausa and 82 in Jaisalmer.

Table 6 : Number of total and sampled schools in the three selected districts of Rajasthan for the educational year 2009-10

Sl. No.	*District*	*Total Schools*			*Sampled Schools*		
		No. of Government Schools	**No. of Private Schools**	**Total No. of Schools**	**No. of Government Schools**	**No. of Private Schools**	**Total No. of Schools**
1	Ajmer	2203	938	3141	136	44	180
2	Dausa	1855	810	2665	94	39	133
3	Jaisalmer	1475	166	1641	72	10	82
	Total	**5533**	**1914**	**7447**	**302**	**93**	**395**

As per the sampling guideline, in each district atleast 20 schools have been selected per block and 5 percent of the total schools have been sampled.

Table 7 : Average number of schools per block in the three selected districts of Rajasthan for the educational year 2009-10

Sl. No.	**District**	**Number of Blocks**	**Average Schools per block**	**Percent of Sampled Schools from Total Schools**
1	Ajmer	9	20	5.7
2	Dausa	5	27	5.0
3	Jaisalmer	3	27	5.0
	Total	**17**	**23**	**5.3**

In these three districts, on an average 23 schools per block have been selected with 5.3 percent of the total schools.

Field Operations and Supervision

The field work of post enumeration survey of DISE was conducted and supervised by the Directorate of Economics and Statistics with the help of its well trained statistical assistants and staff of different Departments in the district. The field staff was given intensive training for one day before the initiation of the field work. It helped in getting reliable data from the field. The

training was done in a cascade format. The master trainers trained at the Directorate headquarters trained statistical assistants and other staff from different departments in the districts. Some of the filled in formats were spot checked by designated Deputy Director, Statistical Officers of the Directorate and Statistical Officers in the Districts.

Scrutiny of data and validation

The data was scrutinized and validated at the Directorate. The quality of data under PES was found to be of good order. The special DCF was constructed in line with the objectives of the study which was helpful in maintaining the quality of the data under PES. The quality of the data under PES was maintained to a great extent due to the well versed field staff, computer staff of the Directorate and the overall co-operation of the headmasters and principals, BRC/CRC members and the officials of SSA unit.

Data Entry and Analysis

After the scrutiny of PES data, data entry was done in a customized data entry module in excel and tabulation was done in excel at the Directorate with the help of its well trained computer personnel. The tabulated data was compared with the comparative data from DISE from SSA division in the State and the percentage of variation was computed for certain selected indicators.

Univariate and bivariate analyses were conducted. Crosstabulations were done between different variables. In order to compare the data on some major indicators available in the Special Data Capture Format (DCF) and the DCF used in DISE, variation was computed by simple deviation method, which was used to estimate the deviation between DISE and PES data. The variation between the two data sets was calculated by using the following formula:

$$\textbf{Percentage of Variation} = \frac{PES - DISE}{DISE} \times 100$$

Where, DISE stands for data collected from the sampled schools from the DCF used in DISE and PES stands for data collected from the sampled schools from the special DCF data.

The overall percentage of variation was computed by using the following formula:

$$\textbf{Overall Percentage of Variation} = \frac{(d1 + d2 + d3 \ldots\ldots dx)}{(p1 + p2 + p3 \ldots\ldots pn)} \times 100$$

Where, d1,d2.....dx stand for deviation of items of different indicators of DISE data from PES (Post enumeration survey) data ignoring ± signs and p1,p2,p3.....pn denote the respective items of indicators of PES data

The report consists of a comparative study of the PES and DISE data of the certain indicators of education collected from the 5% sampled schools.

Chapter 3

Chapter 3 Major Findings of the Post Enumeration Survey

In all, 395 schools were covered in the three districts of Ajmer, Dausa, and Jaisalmer of Rajasthan for the educational year 2009-10, out of which, 302 were government schools and 93 were private. The major findings have been presented here alongwith the tables. In some places, they have been illustrated with charts. The distribution of number of sampled schools and those found closed in the three districts are as follows:

Table 8 : Number of total and sampled schools in the three selected districts of Rajasthan for the educational year 2009-10

Sl. No.	*District*	*Sampled Schools*			*Data available for following schools*			Schools Closed
		No. of Government Schools	No. of Private Schools	Total No. of Schools	No. of Government Schools	No. of Private Schools	Total No. of Schools	
1	Ajmer	136	44	180	136	44	180	0
2	Dausa	94	39	133	94	36	130	3
3	Jaisalmer	72	10	82	69	9	78	4
	Total	**302**	**93**	**395**	**299**	**89**	**388**	**7**

Based on the data availability of DCF of DISE and the Special DCF of the 5% schools in all the three selected districts, some key aspects have been compared. One of them relates to the distribution of Schools by management and the other relates to the type of schools and some indicators related to different facilities in the schools. With regards to School management, large amount of variation has been found between the two sets of data. In case of school management, the variation is higher in case of private aided and private unaided schools, where none of the data is matching. In case of schools being managed by the school education department, the variation is 56.62 percent and in case of schools being managed by the local bodies, it is 46.43 percent (See figure 7 & table 9).

Figure 7 : Variation between 5 % PES and DISE data in School Management in the three selected districts of Rajasthan for the educational year 2009-10

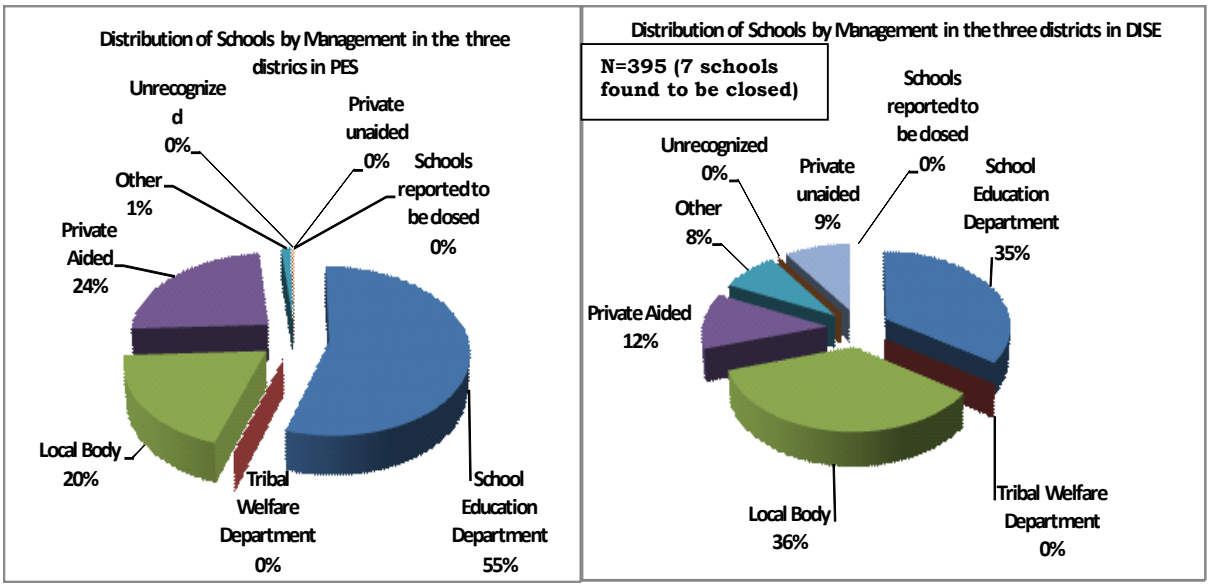

Table 9 : Percentage variation between 5% PES and DISE data in School Management in the three selected districts of Rajasthan for the educational year 2009-10

Schools by Management	Ajmer			Dausa			Jaisalmer			Total

In case of the number of pupils and teachers in the three districts, the variation in case of number of students ranges from 5.92 percent in case of Ajmer to 1.63 percent in Dausa and in case of number of teachers, 43.35 percent in case of Ajmer to no variation in case of Dausa (See table 12). In case of number of Pupils and Teachers and the Pupil Teacher Ratio, also there is variation (See table 12).

Table 12 : Percentage variation between 5% PES and DISE data in Pupil Teacher Ratio (PTR) in schools of the three selected districts of Rajasthan for the educational year 2009-10

% Schools reported to be closed	0	0		2.26	0		4.88	2.44	100.00	7	2	250.00
Total no. of schools	**180**	**180**		**133**	**133**		**82**	**82**		**395**	**395**	

**Note: The variation in the percentage of girls' toilets is due to fact that the Education Department has issued instructions to schools to consider single toilets as girl's toilets as a result of which, in the DISE DCF, single toilets have been referred to as girls' toilets. So, the percentage of girls' toilet reported in DISE DCF is 93.67 percent compared to 53.67 percent in case of PES.*

The overall percentage of variation between the two sets of data based on the above indicators is 4.75 percent.

The key findings of the data of five percent sample checking of the Post Enumeration Survey on various aspects such as school management, gender and category based distribution of schools, school building type and condition, total number of classrooms and other rooms by condition, availability of facilities in schools, enrollment and examination results etc. have been presented in this chapter. The findings are based on a total of 388 schools covered in these three districts.

School Management

With regards to school management in the 3 districts, it is reported that the highest percentage of schools are managed by the School Education Department (54.90 percent) followed by private aided/ private unaided (23.45 percent), followed by local body (19.33 percent) (See figure 10 & table 13).

Figure 10 : Distribution of Schools by Management in the three selected districts of Rajasthan

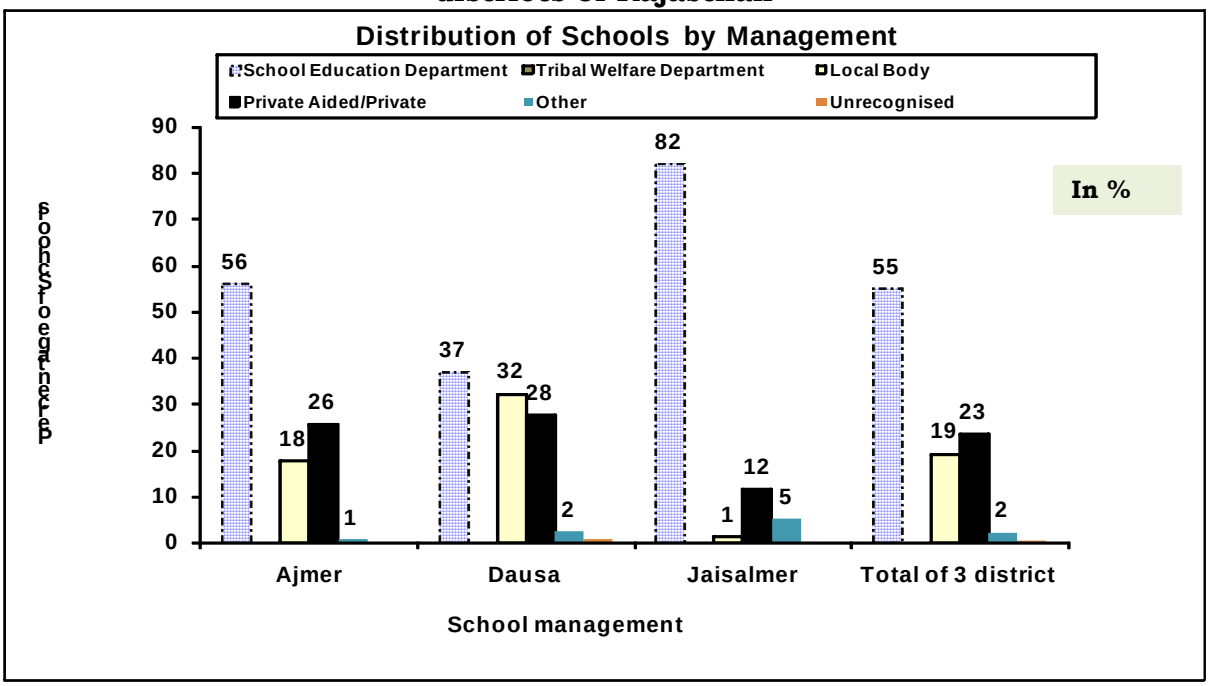

Table 13 : Distribution of Schools by Management in Ajmer, Dausa and Jaisalmer for the year 2009-10 in PES

School Management	Ajmer	%	Dausa	%	Jaisalmer	%	Total of three Districts	%
School Education Department	101	56.1	48	36.9	64	82.1	213	54.9

Total Schools	**180**	**100**	**130**	**100**	**78**	**100**	**388**	**100**

Among the 3 selected districts, in Ajmer district highest number of schools are reported to be managed by the school education department (56.10 percent) followed by private aided/ private unaided (25.60 percent) followed by local body (17.80 percent) and others. Similarly, in Dausa district highest number of schools are managed by school education department (36.90 percent) followed by local body (32.30 percent) followed by private aided/ private (27.70 percent) and

others. In Jaisalmer also, it has been reported that the highest number of schools are managed by school education department (82.1 percent) followed by private aided/private unaided (11.50 percent) followed by others (5.10 percent).

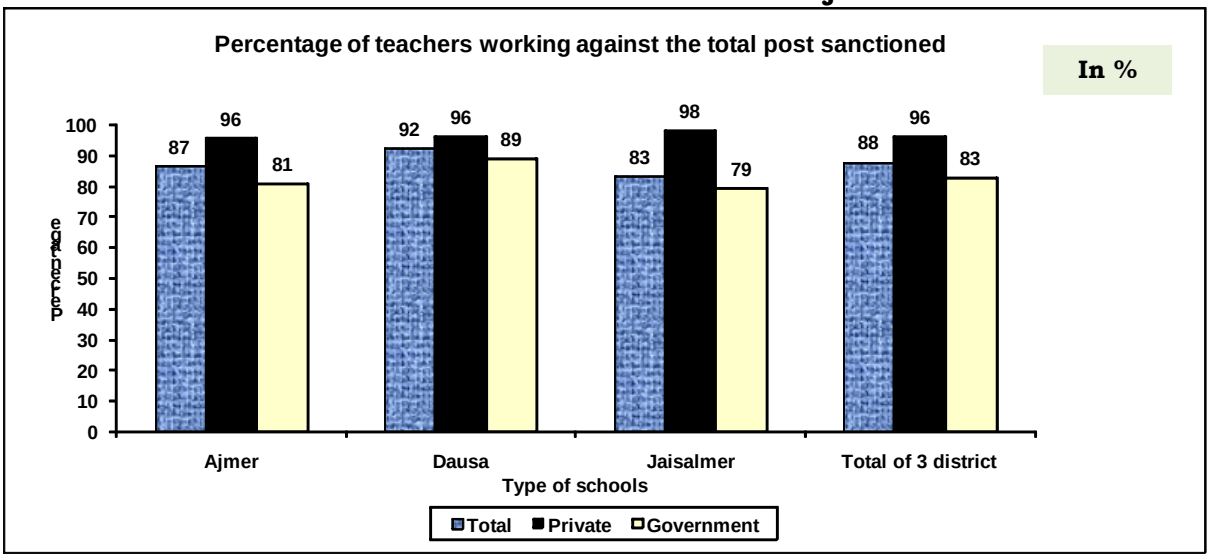
Overall, the number schools managed by the school education department is highest in Jaisalmer (82.10 percent) and lowest in Dausa (36.90 percent). Similarly, the number of schools managed under private aided/ private unaided is highest in Dausa (27.70 percent) and lowest in Jaisalmer (11.50 percent). The number of schools managed by local bodies is highest in Dausa (32.30 percent) and lowest in Jaisalmer (1.30 percent).

Status of Teachers' Posts

Overall, the percentage of posts of teachers filled up against the total sanctioned post in the three districts is 87.93 percent, in case of Government and Private schools, 96.07 percent of the teachers' post is filled up in private schools and 82.64 percent in Government schools (See figure 11 & table 19).

In Ajmer district, it is reported that a total of 86.69 percent post of teachers are filled up, out of which, 95.75 percent are filled in private schools and 80.70 percent in government Schools out of total post sanctioned. In Dausa district, it is reported that, a total of 92.43 percent teachers post are filled up, out of which 96.21 percent are filled in private schools and 89.12 percent are filled in government schools, out of total post sanctioned. In Jaisalmer district, it is reported that a total 83.27 percent teachers post are filled up, out of which, 98.21 percent are filled in private schools and 79.32 percent in government schools, out of total post sanctioned. Overall, the percentage of teachers post filled up, out of total post sanctioned, is highest in Dausa (92.43 percent) and lowest in Jaisalmer (83.27 percent). Amongst the private schools, it is highest in Jaisalmer (98.21 percent) and lowest in Ajmer (95.75 percent). Amongst the Government schools, it is highest in Dausa (89.12 percent) and lowest in Jaisalmer (79.34 percent).

Figure 11 : Percentage of teachers working against the total post sanctioned in the three selected districts of Rajasthan



Gender and category based distribution of schools

Overall, in the three districts, 82.22 percent schools are Co-ed, 12.37 percent schools are only for boys and rest 5.41 percent are only for girls. The highest percent of Co-ed schools are in Jaisalmer (96.15 percent) and lowest in Dausa (64.62 percent). The highest percent of schools which are only for boys, is in Dausa (30.77 percent) and lowest in Jaisalmer (1.28 percent). Similarly, the highest percent of schools which are only for girls, are in Ajmer (7.22 percent) and lowest in Jaisalmer (2.56 percent). Among the schools having primary classes only, 85.96 percent schools are Co-ed, 12.92 percent schools are only for boys and 1.12 percent schools are only for girls. Among the schools having primary with upper primary, 80.95 percent schools are Co-ed, 12.24 percent schools are only for boys and 6.80 percent schools are only for girls. Among the schools having primary with secondary classes, 71.43 percent schools are Co-ed, 11.43 percent schools are only for boys and 17.14 percent schools are only for girls. Among the schools having upper primary with secondary, three-fourths schools are Co-ed, 12.50 percent schools are only for boys and 12.50 percent schools are only for girls. Among the schools having upper primary only, 80.00 percent schools are Co-ed, 10.00 percent schools are only for boys and 10.00 percent schools are only for girls (See table 20a and 20b).

Among the three districts, in **Ajmer** district, 88.89 percent schools are Co-ed, 3.89 percent schools are only for boys and 7.22 percent schools are only for girls. Among the schools having primary only, 95.89 percent schools are Co-ed, 2.74 percent schools are only for boys and 1.37 percent schools are only for girls. Among the schools having primary with upper primary, 86.76 percent schools are Co-ed, 2.94 percent schools are only for boys, and 10.29 percent schools are only for girls. Among the schools having primary with secondary, 80.00 percent schools are Co-ed, 5.00 percent schools are only for boys, and 15.00 percent schools are only for girls. Among the schools having upper primary with secondary 100.00 percent schools are Co-ed. Among the schools having upper primary only, 77.78 percent schools are Co-ed, 11.11 percent schools are only for boys, and 11.11 percent schools are only for girls.

In **Dausa** district, 64.62 percent schools are Co-ed, 30.77 percent schools are only for boys and 4.62 percent schools are only for girls. Among the schools having primary only, 62.71 percent schools are Co-ed, 35.59 percent schools are only for boys and 1.69 percent schools are only for girls. Among the schools having primary with upper primary, 67.92 percent schools are Co-ed, 28.10 percent schools are only for boys and 3.77 percent schools are only for girls. Among the schools having primary with secondary, 53.85 percent schools are Co-ed, 23.08 percent schools are only for boys and 23.08 percent schools are only for girls. Among the schools having upper primary with secondary, 66.67 percent schools are Co-ed, 33.33 percent schools are only for boys and 0.00 percent schools are only for girls. Among the schools having upper primary only, 100.00 percent schools are Co-ed. In **Jaisalmer** district 96.15 percent schools are Co-ed, 1.28 percent schools are only for boys and 2.56 percent schools are only for girls. Among the schools having primary only, 100.00 percent schools are Co-ed. Among the schools having primary with upper primary, 92.31 percent schools are Co-ed,3.85 percent schools are only for boys and 3.85 percent schools are only for girls. Among the schools having primary with secondary, 100.00 percent

schools are Co-ed. Among the schools having upper primary with secondary classes, 75.00 percent schools are Co-ed and 25.00 percent schools are only for girls.

Gender-wise permanent and other staff in schools

In the three districts, overall, 55.36 percent male and 44.64 percent female teachers are working other than the headmaster. In primary schools, it is 50.30 percent for males and 49.70 percent for females, whereas in upper primary, it is 56.91 percent for males and 43.09 percent for females. Similarly, in the three districts overall, 70.00 percent male and 30.00 percent females are working as para teachers. In primary schools, it is 86 percent for males and 14 percent for females, whereas in upper primary, it is 54.00 percent for males and 46.00 percent for females (See table 21a, 21b, 21c and 21d).

Among the three districts, in **Ajmer** district overall, 37.57 percent male and 62.43 percent female teachers are working other than the headmaster. In primary schools, it is 33.65 percent for males and 66.35 percent for females, whereas in upper primary schools, it is 38.87 percent for males and 61.13 percent for females.

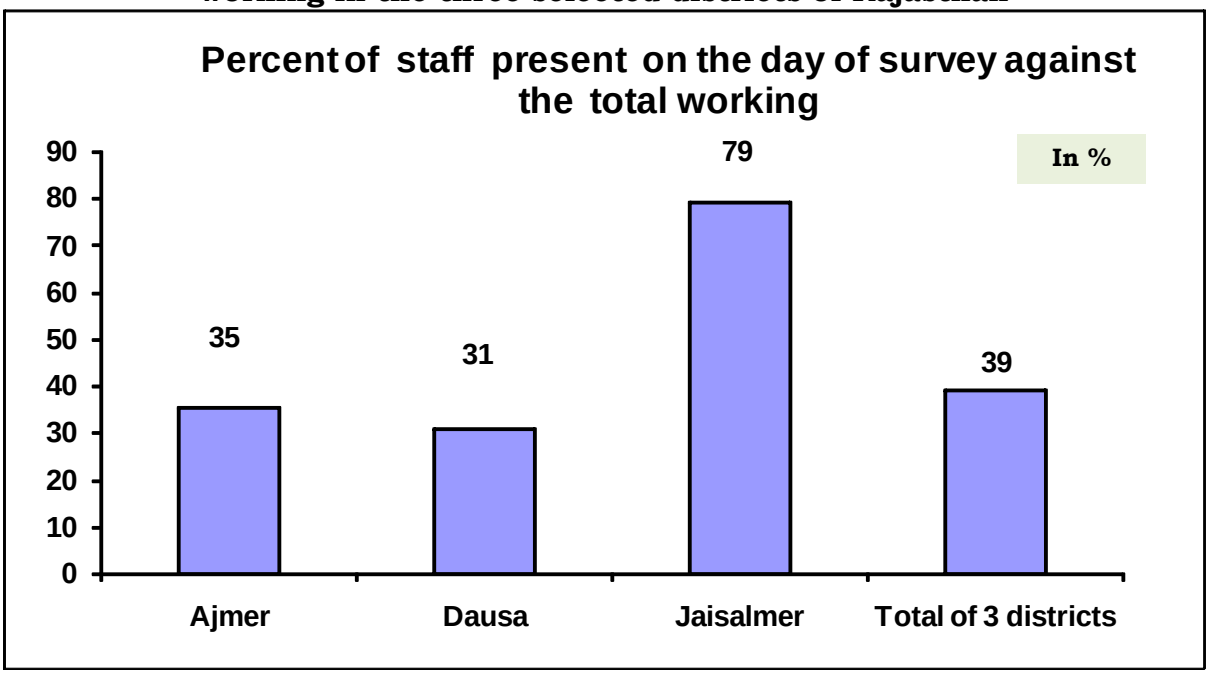
Similarly, in Ajmer district overall, 63.49 percent male and 36.51 percent females are working as a para teacher. In primary, it is 85.71 percent for male and 14.29 percent for female, whereas in upper primary, it is 52.38 percent and 47.62 percent respectively. In **Dausa** district overall, 82.81 percent male and 17.19 percent female teachers are working other than headmaster. In primary, it is 81.82 percent for male and 18.18 percent for female, whereas in upper primary, it is percent are 83.05 percent for males and 46.90 percent for females. Similarly in Dausa district overall, 80.00 percent male and 20.00 percent female are working as para teacher. In primary, it is 78.57 percent for male and 21.43 percent for females, whereas in upper primary, it is percent are 83.33 percent for males and 16.67 percent for females. In Jaisalmer district overall, 75.86 percent male and 24.14 percent female are working other than the headmaster. In primary, it is 70.27 percent for males and 29.73 percent for females, whereas in upper primary, it is 77.78 percent for males and 22.22 percent for females.

Similarly, in **Jaisalmer** district overall, 82.35 percent males and 17.65 percent females are working as para teachers. In primary schools, it is 93.33 percent for males and 6.67 percent for females, whereas in upper primary, it is 0.00 percent for male and 100 percent for females.

Attendance of the teachers on the day of visit

Overall, 39.35 percent of the teachers were present on the day of survey, out of the total working teachers. The highest percent of teachers were present in Jaisalmer district (79.46 percent) followed by Ajmer (35.44 percent) and lowest in Dausa (31.01 percent) (See figure 12 & table 22).

Figure 12 : Percent of staff present on the day of survey against the total working in the three selected districts of Rajasthan



School building type and condition

Status of school building

In Government Schools:

With regards to the status of school building in the 3 districts, the highest percent of schools are functioning in government building (96.32 percent) followed by government on rent (2.67 percent) and lowest are without building (1.00 percent). Among the three districts, in Ajmer district, highest percent of schools are functioning in government building (94.12 percent) followed by government on rent (3.68 percent) and lowest are without building (2.21 percent). In Dausa district, highest percent of schools are functioning in government building (96.81 percent) and lowest in government on rent (3.19 percent). In Jaisalmer district, all the schools are functioning in government building (100.00 percent) (See table 23a).

In Private Schools:

With regards to the status of school building in the 3 districts, the highest percent of schools are functioning in Private on rent (56.18 percent) followed by Private building (43.82 percent). Among the three districts, in **Ajmer** district highest percent of schools are functioning in Private on rent (65.91 percent) followed by Private building (34.09 percent). In **Dausa** district, highest percent of schools are functioning in private building (52.78 percent) followed by Private on rent (47.22 percent). In **Jaisalmer** district, highest percent of schools are functioning in private building (55.56 percent) followed by Private on rent (44.44 percent) (See table 23b).

Type of school building

Out of the total sample of 388 selected schools in the three districts, 95.10 percent are functioning in pucca buildings, 4.12 percent are partially pucca and 0.77 percent are kuccha building. In Ajmer, it is 95.56 percent for pucca, 3.33 percent for partially pucca and 1.11 percent for kuccha. In Dausa, it is 92.31 percent for pucca and 7.69 percent for partially pucca. In Jaisalmer, it is 98.72 percent for pucca and 1.28 percent for kuccha building (See table 23c).

Total number of classrooms and other rooms by condition

Government Schools

Out of total rooms available in the school in the 3 districts, 78.40 percent are in good condition, 14.98 percent need minor repair, 4.62 percent need major repair and 2.00 percent are not usable. For number of classrooms it is 77.61 percent, 16.25 percent, 4.12 percent and 2.02 percent respectively. For other rooms it is 79.88 percent, 12.61 percent, 5.56 percent and 1.95 percent respectively. Among the 3 districts, in **Ajmer** district out of total rooms available in the school, 76.81 percent are in good condition, 17.58 percent need minor repair, 4.51 percent need major repair and 1.10 percent are not usable. For number of classrooms it is 76.45 percent, 19.57 percent, 3.81 percent and 0.17 percent respectively. For other rooms it is 77.52 percent, 13.68 percent, 5.86 percent and 2.93 percent respectively. In **Dausa** district out of total rooms available in the school, 81.93 percent are in good condition, 10.40 percent need minor repair, 4.20 percent need major repair and 3.47 percent are not usable. For number of classrooms it is 76.01 percent, 13.75 percent, 5.12 percent and 5.12 percent respectively. For other rooms it is 94.35 percent, 3.39 percent and 2.26 percent respectively. In **Jaisalmer** district out of total rooms available in the school, 77.30 percent are in good condition, 15.28 percent need minor repair, 5.39 percent need major repair and 2.02 percent are not usable. For number of classrooms it is 76.45 percent, 19.57 percent, 3.81 percent and 0.17 percent respectively. For other rooms, it is 82.51 percent, 12.17 percent, 3.42 percent and 1.90 percent respectively.

Private Schools

Out of total rooms available in the school in the 3 districts, 92.62 percent are in good condition, 4.70 percent need minor repair, 0.17 percent need major repair and 2.52 percent are not usable. For number of classrooms it is 91.89 percent, 5.20 percent, 0.21 percent and 2.70 percent respectively. For other rooms it is 95.65 percent, 2.61 percent, 0.00 percent and 1.74 percent respectively. Among the 3 districts, in **Ajmer** district, out of total rooms available in the school, 93.39 percent are in good condition, 4.67 percent need minor repair, 0.19 percent need major repairs and 1.75 percent are not usable. For number of classrooms it is 92.29 percent, 5.78 percent, 0.24 percent and 1.69 percent respectively. For other rooms it is 97.98 percent, 0.00 percent, 0.00 percent and 2.02 percent respectively. In **Dausa** district, out of total rooms available in the school, 96.45 percent are in good condition, 2.26 percent need minor repair, 1.29 percent need major repair and 0.00 percent are not usable. For number of classrooms it is 96.83 percent, 2.38 percent and 0.79 percent respectively. For other rooms it is 94.83 percent, 1.72 percent, 3.45 percent and none respectively. In **Jaisalmer**

district, out of total rooms available in the school, 87.80 percent are in good condition, 4.88 percent need minor repair, none need major repair and 7.32 percent are not usable. For number of classrooms it is 89.39 percent, 1.52 percent, 0.00 percent and 9.09 percent respectively. For other rooms it is 81.25 percent and 18.75 percent.

Both Government and Private Schools

Out of total rooms available in 388 sampled schools in the 3 districts, 81.79 percent are in good condition, 12.53 percent need minor repair, 3.56 percent need major repair and 2.12 percent are not usable. For number of classrooms, it is 81.61 percent, 13.15 percent, 3.03 percent and 2.21 percent respectively. For other rooms it is 82.20 percent, 11.14 percent, 4.74 percent and 1.92 percent respectively.

Among the 3 districts, in **Ajmer** district, out of total rooms available in the school, 82.79 percent are in good condition, 12.92 percent need minor repair, 2.95 percent need major repair and 1.33 percent is not usable. For number of classrooms it is 82.91 percent, 13.95 percent, 2.36 percent and 0.79 percent respectively. For other rooms it is 82.51 percent, 10.34 percent, 4.43 percent and 2.71 percent respectively. In **Dausa** district, out of total rooms available in the school, 87.18 percent are in good condition, 7.46 percent need minor repair, 3.15 percent need major repair and 2.21 percent are not usable. For number of classrooms it is 84.43 percent, 9.15 percent, 3.37 percent and 3.05 percent respectively. For other rooms it is 94.47 percent, 2.98 percent, 2.55 percent and 0.00 percent respectively. In **Jaisalmer** district, out of total rooms available in the school, 78.94 percent are in good condition, 13.66 percent need minor repairs, 4.55 percent need major repairs and 2.85 percent are not usable. For number of classrooms it is 83.89 percent, 10.03 percent, 2.74 percent and 3.34 percent respectively. For other rooms it is 70.71 percent, 19.70 percent, 7.58 percent and 2.02 percent respectively (See table 23d).

Average Number of Classrooms in a School

In Government schools, overall, in the 3 districts, the average number of classrooms is 4. It is almost same in all the 3 districts. In private schools, overall in the 3 districts, the average number of classrooms is 5. It is highest in Ajmer (9) and same for Dausa and Jaisalmer (7). Overall, in the 3 districts, the average number of classrooms is 4. It is highest in Ajmer (6) followed by Dausa (5) and lowest in Jaisalmer (4).

Facilities available in schools

Availability of boundary walls

Overall, in the three districts, 52.17 percent Government school and 59.55 percent private schools, have permanent boundary walls in the schools. For temporary boundary walls, it is 18.06 percent for Government schools and 12.36 percent for private schools, whereas, in 29.77 percent Government schools and 28.09 percent private School, no boundary wall is available in the school. Among the 3 district, in **Ajmer** district, the percent of school having permanent

boundary walls is 61.73 percent for Government schools and 65.91 percent for private Schools. For temporary boundary walls, it is 18.38 percent for Government and 15.91 percent for private schools, whereas in 19.58 percent Government and 18.18 percent private Schools, no boundary wall is available in the school (See table 24a, 24b, 24c and 24d).

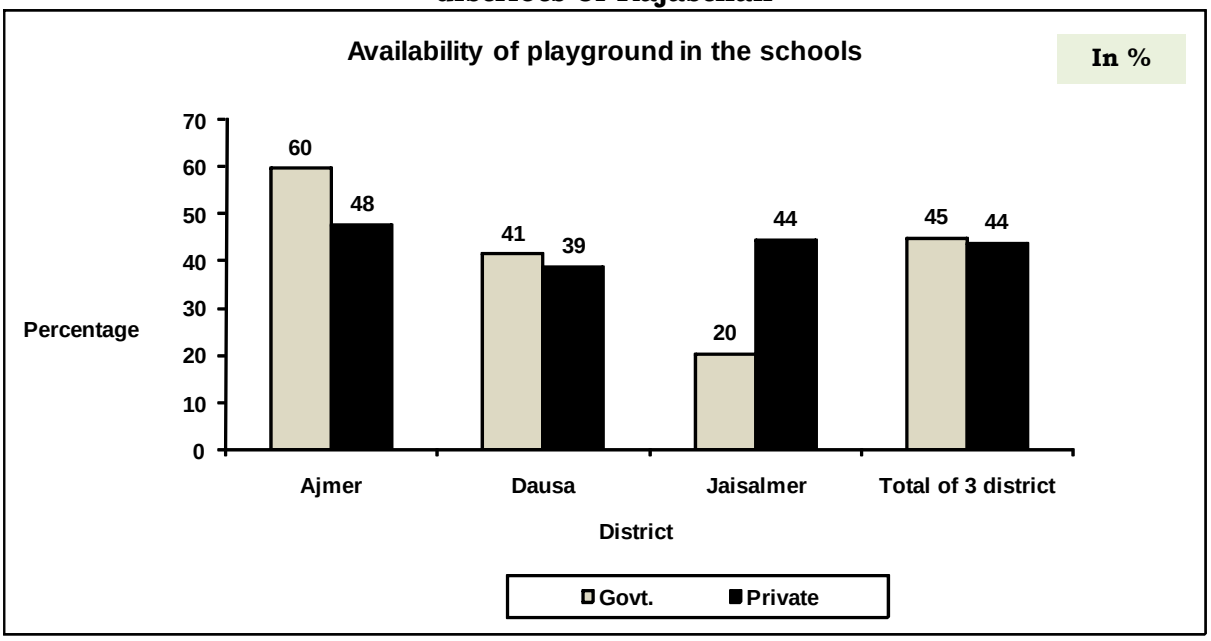
In **Dausa** district, the percent of school have permanent boundary walls, is 45.74 percent for Government and 61.11 percent for private schools. For temporary boundary walls, it is 17.02 percent for Government and 5.56 percent for private schools, whereas in 37.23 percent Government and 33.33 percent private schools, no boundary wall in available in the Dausa district.

In **Jaisalmer** district, the percent of school having permanent boundary walls is 42.03 percent for Government schools and 22.22 percent for private Schools. For temporary boundary walls, it is 18.84 percent for Government and 22.22 percent for private Schools, whereas, in 39.13 percent Government and 55.56 percent private Schools, no boundary wall is available in the school.

Availability of playground

With regards to the availability of playgrounds in the school overall, 44.82 percent Government and 43.82 percent private schools, have this facility. For Government schools, it is highest in Ajmer (59.56 percent) followed by Dausa (41.49 percent) and lowest in Jaisalmer (20.29 percent). For private schools, the highest percent of schools in which playground facility is available covered under Ajmer district (47.73 percent) followed by Jaisalmer (44.44 percent) and lowest in Dausa (38.89 percent) (See figure 13 & table 25).

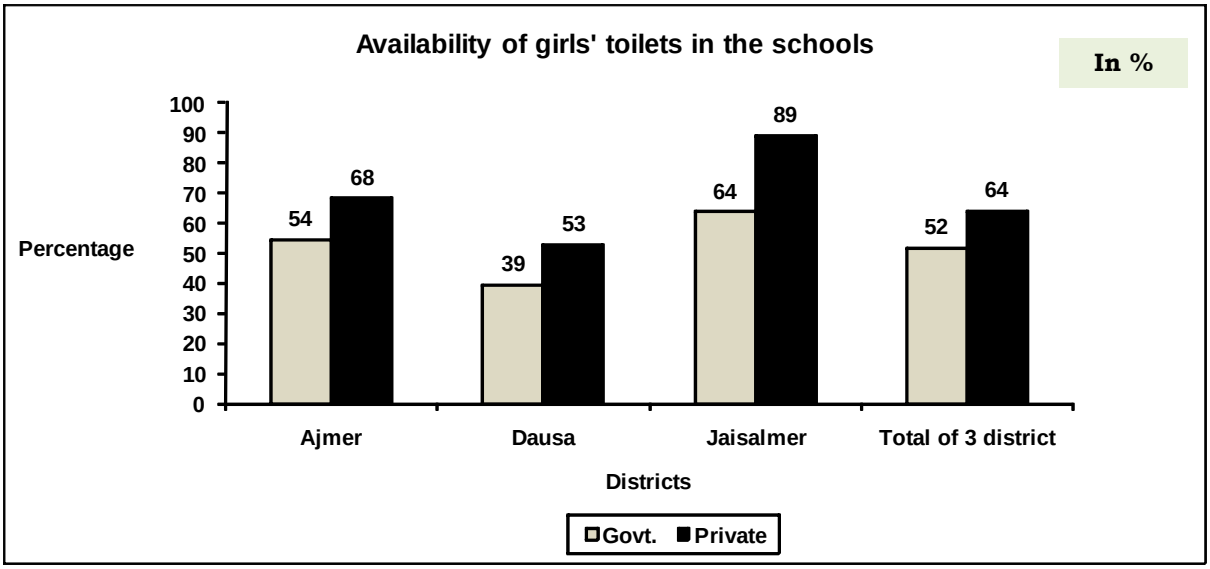
Figure 13 : Availability of playground in the schools in the three selected districts of Rajasthan



Availability of girls' toilet in Schools

It is evident that out of the total sample of size 388 schools, in 51.84 percent Government and 64.04 percent private schools, girl's toilets are available. In case of Government school, it is highest in Jaisalmer (63.77 percent) followed by Ajmer (54.41 percent) and lowest in Dausa (39.36 percent), whereas in case of private Schools, it is highest in Jaisalmer (88.89 percent) followed by Ajmer (68.18 percent) and lowest in Dausa (52.78 percent) (See figure 14 & table 25).

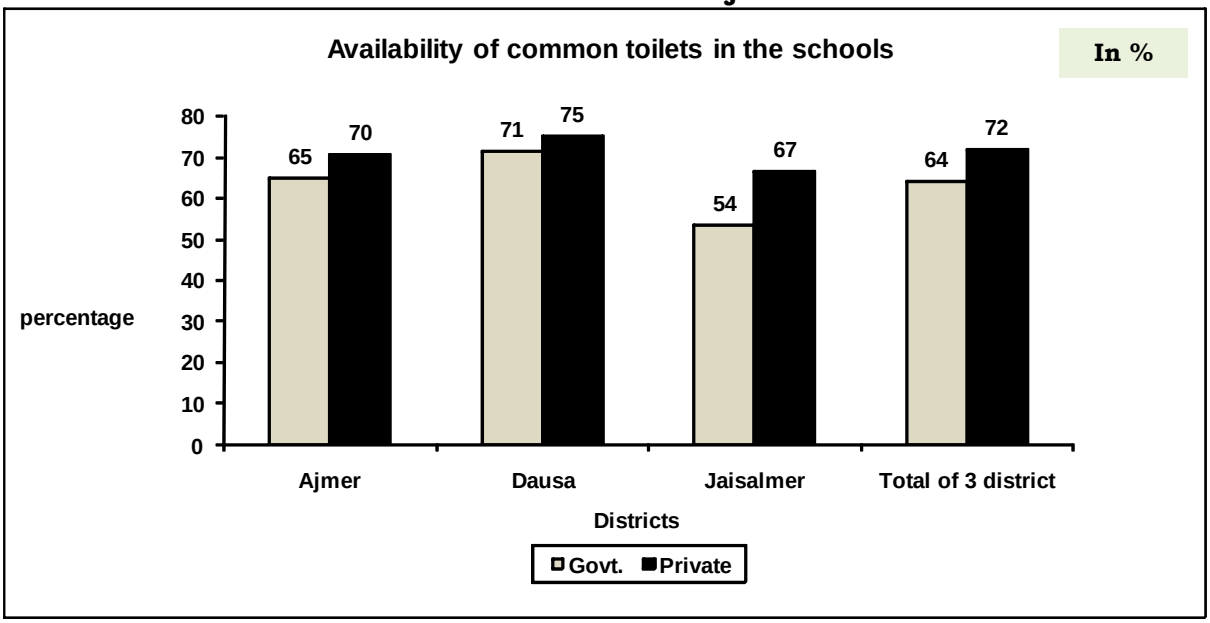
Figure 14 : Availability of girls' toilets in the schools in the three selected districts of Rajasthan



Availability of common toilets in the school

Out of the total sample of size 388 schools, in 64.21 percent Government and 71.91 percent private Schools, common toilets are available. In case of Government schools, it is highest in Dausa (71.28 percent) followed by Ajmer (64.71 percent) and lowest in Jaisalmer (53.62 percent). In case of private Schools, it is highest in Dausa (75 percent) followed by Ajmer (70.45 percent) and lowest in Jaisalmer (66.67 percent) (See figure 15 & table 25).

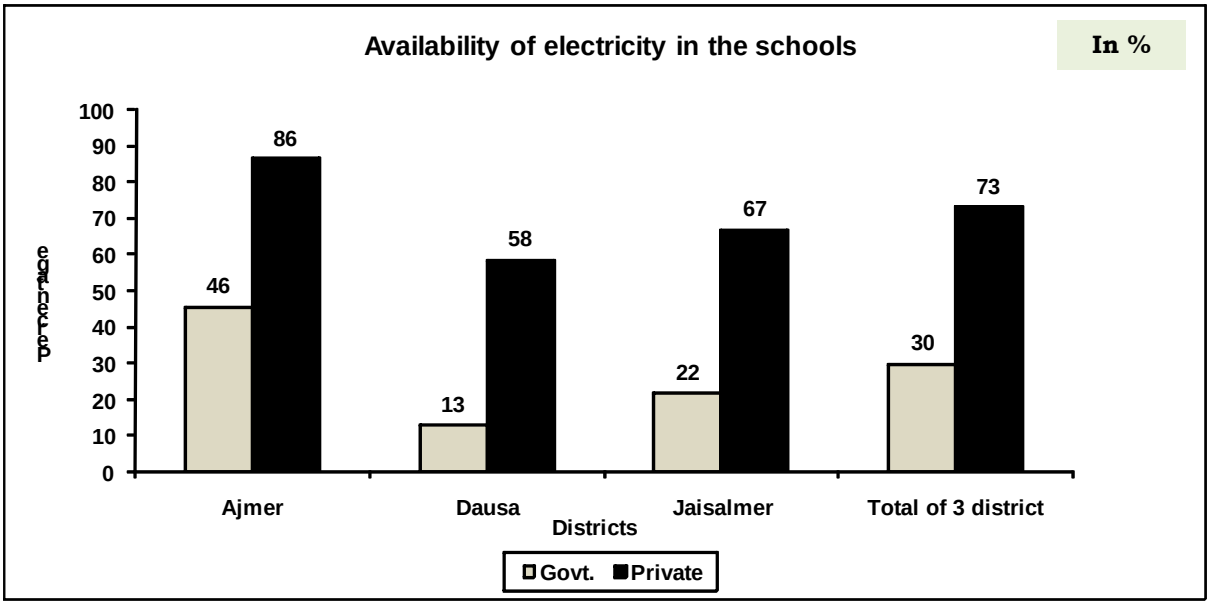
Figure 15 : Availability of common toilets in the schools in the three selected districts of Rajasthan



Availability of electricity in the schools

Out of the total sample of 388 schools, only 29.77 percent Government and 73.03 percent private schools are there, in which electricity is available. In Ajmer district, it is 45.59 percent for Government and 86.36 percent for private. For Dausa district, it is 12.77 percent for Government and 58.33 percent for private Schools, whereas in case of Jaisalmer district, it is 21.74 percent for Government and 66.67 percent for private schools (See figure 16 & table 25).

Figure 16 : Availability of electricity in the schools in the three selected districts of Rajasthan



Availability of drinking water facility in the school

Overall, in the 3 districts in 89.97 percent Government and 100.00 percent private Schools, drinking water facility is available. For Government schools, it is highest in Ajmer (91.91 percent) followed by Dausa (89.36 percent) and lowest in Jaisalmer (86.96 percent), whereas in case of private Schools, drinking water facility is available in all the schools (See table 25).

Source of drinking water

Out of the total 388 schools, the most reported source of drinking water in Government schools, is handpump (46.15 percent) followed by tap water (25.42 percent) followed by others (17.73 percent) and lowest is water from wells (0.67 percent). Whereas in case of private School, tap water is the most popular source of drinking water covering (62.92 percent) schools, followed by others (17.96 percent) followed by hand pump (15.73 percent) and lowest is water from wells (3.37 percent) (See table 25a).

Among the 3 districts, in **Ajmer** district the highest percent of Government schools, are using hand pump (43.38 percent) as a source of drinking water followed by tap water (32.35 percent), followed by other sources (16.16 percent). Whereas in case of private Schools, it is highest for tap water (68.18 percent).

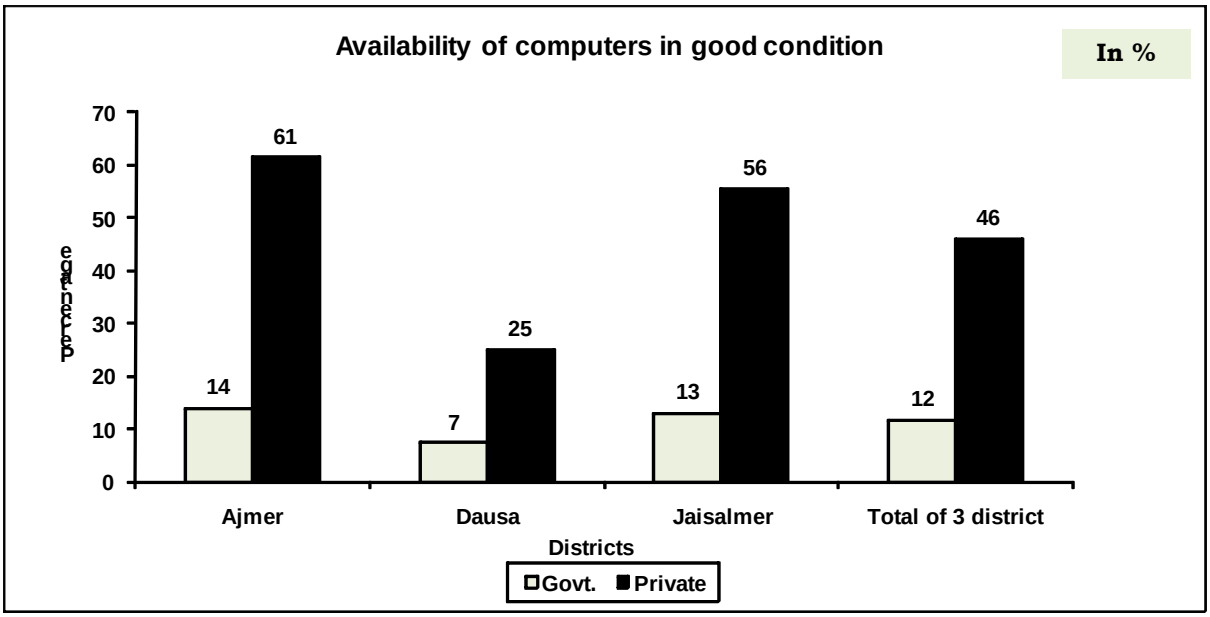
In **Dausa** district, the highest percent of Government schools, are using hand pump (80.85 percent) as a source of drinking water followed by tap water (5.32 percent), followed by other sources (2.13 percent). Whereas in case of private Schools, it is highest for tap water (58.33 percent), followed by hand pump (22.22 percent) followed by others (16.67 percent).

In **Jaisalmer** district ,the highest percent of Government schools, are using other facility (42.03 percent) as a source of drinking water followed by tap water (39.13 percent), followed by hand pump (14.35 percent) and lowest by water well (1.45 percent). Whereas, in case of private schools, it is highest for tap water (56.56 percent).

Availability of computer in good condition

Out of the total sample of 388 schools, in 11.71 percent Government and 46.07 percent private Schools computer facility is available. For Government schools, it is highest in Ajmer (13.97 percent) followed by Jaisalmer (13.04 percent) and lowest in Dausa (7.45 percent). In case of private Schools, it is highest in Ajmer (61.36 percent), followed by Jaisalmer (55.55 percent) and lowest in Dausa (25.00 percent) (See figure 17 & table 25).

Figure 17 : Availability of computers in good condition in the schools in the three selected districts of Rajasthan



Availability of classrooms chairs for students in the schools

Overall, in the 3 districts in 90.30 percent Government schools, chairs are not available to student followed by 8.70 percent schools where chairs are available to some students followed by 1.00 percent where chairs are available to all students. Whereas in case of private schools, in 66.29 percent schools chairs are not available to students followed by 19.90 percent chairs are available to all students, followed by 14.61 percent where chairs are available to some students (See table 26a and 26b).

In Ajmer district, in 81.62 percent Government and 50.00 percent private schools, chairs are not available to students. Similarly, in 16.91 percent Government and 20.45 percent private schools, chairs are not available to some students and in 1.47 percent Government and 29.55 percent private schools, where chairs are available to all students.

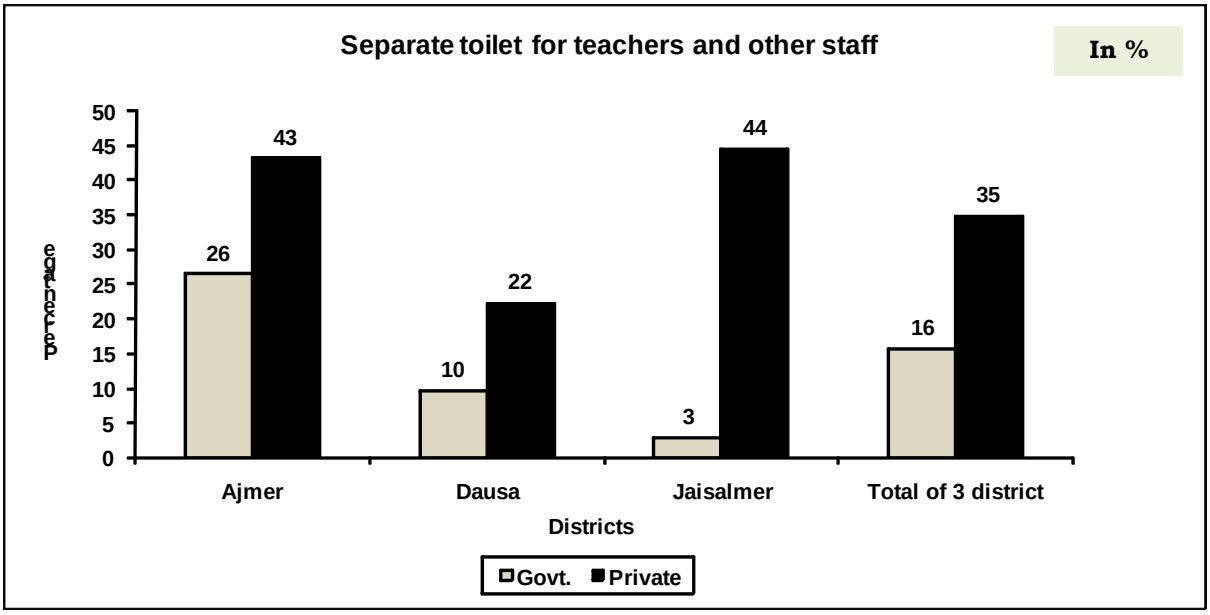
In Dausa district, in 98.94 percent Government and 86.11 percent private schools, in which chairs are not available to students. Similarly, in 1.06 percent Government and 5.56 percent private schools, chairs are not available to some students.

In Jaisalmer district, in 95.65 percent Government and 66.67 percent private schools, in which chairs are not available to students. Similarly in 2.90 percent Government and 22.22 percent private schools, chairs are not available to some students and in 1.45 percent Government and 11.11 percent private Schools, where chairs are available to all students.

Separate toilet for teacher and other staff

Overall, in 3 districts 15.72 percent Government and 34.83 percent private Schools, separate toilet facility for teachers and other staff are available. In Ajmer district, it is 26.47 percent for Government and 43.18 percent for private Schools. In Dausa district, it is 9.57 percent for Government and 22.22 percent for private Schools. In Jaisalmer district, it is 2.9 percent for Government and 44.44 percent for private Schools (See figure 18 & table 25).

Figure 18 : Availability of separate toilet for teachers and other staff in the schools in the three selected districts of Rajasthan



Number of schools where single teacher is working

Out of the total sample of size 388 schools (actual sample size was 395 but 7 schools were found closed), in 19.32 percent schools only a single teacher is working. It is highest in Jaisalmer (46.15 percent) followed by Dausa (17.69 percent) and lowest in Ajmer (8.88 percent) (See table 27).

Educational qualification of head master/ senior teachers

Out of total sample of 388 schools in the 3 districts, in 31.44 percent schools the educational qualification of head master/senior teachers is post-graduation with B.Ed followed by 21.39 percent with graduation and B.Ed followed 12.37 percent higher secondary with BSTC and 3.61 percent in which the qualification is post graduation with M.Ed (See table 28).

Among the 3 districts, in Ajmer district, in the highest percent of schools (33.33 percent) the educational qualification of the headmaster/senior teachers is post graduation with B.Ed. followed by (17.22 percent) graduation with B.Ed. followed by higher secondary with BSTC (12.78 percent) and lowest is post graduation with M.Ed (5.00 percent).

In Dausa district, in the highest percent of schools (36.92 percent) the educational qualification of the headmaster/senior teachers is post graduation with B.Ed. followed by (30.00 percent) other qualifications followed by (21.54 percent) graduation with B.Ed. followed by (7.69 percent) higher secondary with BSTC and lowest is (3.85 percent) post graduation with M.Ed.

In Jaisalmer district, in highest percent of schools (32.05 percent) the educational qualification of the headmaster/senior teachers is others followed by (30.77 percent) graduation with B.Ed. followed by (19.23 percent) higher secondary with BSTC and lowest is (17.95 percent) post graduation with M.Ed.

Service length at the post of Headmaster/ Senior Teacher

Overall, in the 3 districts the highest percent of schools (63.76 percent) are covered under the category, in which the service length at the post of head master/senior teacher is upto 5 years followed by 38.96 percent where service length upto 2 years and lowest (36.24 percent) in which service length is above 5 years (See table 29a and 29b).

Years elapsed since the establishment of the school

Out of the total 388 schools covered, in 57.22 percent of schools, the schools are more than 12 years old, whereas in the rest 42.78 percent of schools are old upto 12 years. In case of Government schools, it is 60.54 percent and 39.46 percent whereas in case of private Schools, it is 46.07 percent and 53.93 percent respectively. Among the 3 districts, in Ajmer district, in 60 percent schools the duration of establishment of school is more than 12 years whereas, in the rest 40 percent, it is duration is up to 12 years. In case of Government schools it is 67.65 percent and 32.35 percent respectively, whereas in case of private Schools, it is 36.36 percent and 63.64 percent respectively(See table 30a, 30b, 30c and 30d).

In Dausa district, in 53.85 percent schools the years elapsed since the establishment of school, is more than 12 years, whereas, in the rest 46.15 percent it is upto 12 years. In case of Government schools, it is 56.38 percent and 43.62 percent respectively, whereas in case of private Schools, it is 47.22 percent and 52.78 percent respectively.

In Jaisalmer district, in 56.41 percent schools, the duration of establishment of school is more than 12 years whereas, in the rest 43.59 percent this duration is upto 12 years. In case of Government schools it is 52.17 percent and 47.83 percent respectively, whereas in case of private Schools, it is 88.89 percent and 11.11 percent respectively.

Genderwise and social categorywise student's enrollment in the schools 2008-09

Overall, in the three districts 51,859 students have been enrolled in primary and upper primary classes in the year 2008-09, out of which, 37,610 students are enrolled in primary classes, out of which 52.72 percent are boys and 47.28 percent are girls, and in upper primary total 14,249 students are enrolled out of which 62.39 percent are boys and 37.61 percent are girls (See table 31).

In case of **Government schools** overall, 23,864 students are enrolled in primary classes, out of which 49.83 percent are boys and 50.17 percent are girls. In the case of upper primary, total 7,672 students are enrolled, out of which 61.10 percent are boys and 38.90 percent are girls.

In case of **private Schools,** total 13,746 students are enrolled in primary classes, out of which 57.74 percent are boys and 42.26 percent are girls. In case of upper primary classes overall, 6,577 students are enrolled out which, 63.18 percent are boys and 36.82 percent are girls.

Out of the total enrolled students in primary classes in the 3 districts, 8.60 percent are repeaters, 20.80 percent are in SC category, 12.30 percent are in ST, 44.9 percent in OBC, 0.60 percent are disabled and 1.80 percent are drop outs. Out of the total enrolled students in upper primary classes in the 3 districts, 7.40 percent are repeaters, 18.20 percent are in SC category, 11.40 percent are in ST, 44.28 percent in OBC, 0.50 percent are disabled and 1.20 percent are drop outs.

Government schools :

Out of the total enrolled student in primary classes in the 3 districts, 13.00 percent are repeaters and social category-wise, 24.40 percent are in SC category, 12.40 percent are in ST, 51.70 percent are in OBC. In all, 0.30 percent are disabled. In all, 1.90 percent are drop outs.

Out of the total enrolled student in upper primary classes in the 3 districts, 11.40 percent are repeaters, 23.20 percent are in SC category, 9.70 percent are in ST, 54.80 percent are in OBC, 0.20 percent are disabled and 1.70 percent are drop outs.

Private schools :

Out of the total enrolled student in primary classes in the 3 districts, 1.00 percent are repeaters, and social category-wise 14.40 percent are in SC category, 12.10 percent are in ST , 33.10 percent are in OBC, 1.10 percent are disabled and 1.70 percent are drop outs. Out of the total enrolled student in upper primary classes in the 3 districts, 2.80 percent are repeaters, 12.30 percent are in SC category, 13.50 percent are in ST , 31.00 percent are in OBC, 1.00 percent are disabled and 0.70 percent are drop outs.

Among the 3 districts, in Ajmer district overall, 19587 students are enrolled in primary classes and 8449 are enrolled in upper primary classes. Out of the total students enrolled in primary classes, 11580 (59.12 percent) are enrolled in government school and 8007 (40.87 percent) are enrolled in private School. Out of the total students enrolled in upper primary classes, 4857 (57.48 percent) students are enrolled in Government schools and 3592 (42.51 percent) are enrolled in private Schools.

With regards to total students enrolled in primary classes in Ajmer district, 51.20 percent are boys and 48.80 percent are girls. For Government school, it is 50.53

percent for boys and 49.47 percent for girls. For private Schools, it is 52.17 percent for boys and 47.83 percent for girls respectively.

With regards to total students enrolled in upper primary classes in Ajmer district, 58.64 percent are boys and 41.36 percent are girls. For Government school, it is 61.84 percent for boys and 38.16 percent for girls. For private Schools, it is 54.31 percent for boys and 45.69 percent for girls respectively.

Out of the total students enrolled in primary classes in Ajmer district, 8.00 percent are repeaters, 20.00 percent are in SC category, 3.10 percent are in ST, 52.70 percent are in OBC, 0.90 percent are disabled and 2.20 percent are drop outs. Similarly in case of upper primary, it is 10.00 percent for repeaters, 16.10 percent for SC category, 1.90 percent for ST, 52.60 percent for OBC, 0.80 percent for disabled and 1.50 percent for drop outs.

In case of Government schools, out of the total students enrolled in primary classes in Ajmer district, 12.70 percent are repeaters, 23.30 percent are in SC category, 3.90 percent are in ST , 66.30 percent are in OBC, 0.20 percent are disabled and 3.40 percent are drop outs. Similarly in case of upper primary, it is 14.60 percent for repeaters, 19.50 percent for SC category, 2.50 percent for ST, 68.90 percent for OBC, 0.20 percent for disabled and 2.20 percent for drop outs.

In case of private Schools, out of the total students enrolled in primary classes in Ajmer district, 1.20 percent are repeaters, 15.10 percent are in SC category, 1.90 percent are in ST, 32.90 percent are in OBC, 1.80 percent are disabled and 0.60 percent are drop outs. Similarly in case of upper primary, it is 3.60 percent for repeaters, 11.60 percent for SC category, 1.10 percent for ST, 30.40 percent for OBC, 1.60 percent for disabled and 0.50 percent for drop outs.

In **Dausa** district overall, 12344 students are enrolled in primary classes and 4401 are enrolled in upper primary classes. Out of the total students enrolled in primary classes, 7362 (59.64 percent) are enrolled in government school and 4982 (40.35 percent) are enrolled in private schools. Out of the total students enrolled in upper primary classes, 1901 (43.19 percent) students are enrolled in Government schools and 2500 (56.80 percent) are enrolled in private Schools.

With regards to total students enrolled in primary classes in Dausa district, 53.46 percent are boys and 46.57 percent are girls. For Government school, it is 46.00 percent for boys and 53.99 percent for girls. For private Schools, it is 64.39 percent for boys and 35.60 percent for girls respectively.

With regards to total students enrolled in upper primary classes in Dausa district, 65.62 percent are boys and 34.37 percent are girls. For Government school, it is 55.81 percent for boys and 44.18 percent for girls. For private Schools, it is 73.08 percent for boys and 26.92 percent for girls respectively.

Out of the total students enrolled in primary classes in Dausa district, 5.10 percent are repeaters, 22.90 percent are in SC category, 30.30 percent are in ST, 31.20 percent are in OBC, 0.30 percent are disabled and 1.40 percent are drop outs. Similarly in case of upper primary, it is 3.10 percent for repeaters, 21.70

percent for SC category, 32.20 percent for ST, 28.10 percent for OBC, 0.10 percent for disabled and 0.80 percent for drop outs.

In case of Government schools, out of the total students enrolled in primary classes in Dausa district 7.90 percent are repeaters, 28.70 percent are in SC category, 31.00 percent are in ST , 30.80 percent are in OBC, 0.40 percent are disabled and 0.30 percent are drop outs. Similarly in case of upper primary it is 4.60 percent for repeaters, 32.90 percent for SC category, 31.20 percent for ST, 24.50 percent for OBC, 0.10 percent for disabled and 0.50 percent for drop outs.

In case of private schools, out of the total students enrolled in primary classes in Dausa district, 0.80 percent are repeaters, 14.30 percent are in SC category, 29.30 percent are in ST , 31.90 percent are in OBC, 0.10 percent are disabled and 3.10 percent are drop outs. Similarly in case of upper primary it is 2.00 percent for repeaters, 13.10 percent for SC category, 33.00 percent for ST, 30.80 percent for OBC, 0.20 percent for disabled and 1.00 percent for drop outs.

In **Jaisalmer** district overall, 5679 students are enrolled in primary classes and 1399 are enrolled in upper primary classes. Out of the total students enrolled in primary classes, 4922 (86.67 percent) are enrolled in government school and 757 (13.32 percent) are enrolled in private School. Out of the total students enrolled in upper primary classes, 914 (65.33 percent) students are enrolled in Government schools and 485 (34.66 percent) are enrolled in private Schools.

With regards to total students enrolled in primary classes in Jaisalmer district, 56.43 percent are boys and 43.56 percent are girls. For Government school, it is 53.92 percent for boys and 46.07 percent for girls. For private Schools, it is 72.78 percent for boys and 27.21 percent for girls respectively.

With regards to total students enrolled in upper primary classes in Jaisalmer district, 74.83 percent are boys and 25.16 percent are girls. For Government schools, it is 73.19 percent for boys and 26.80 percent for girls. For private Schools, it is 77.93 percent for boys and 22.06 percent for girls respectively.

Out of the total students enrolled in primary classes in Jaisalmer district, 18.30 percent are repeaters, 19.00 percent are in SC category, 4.80 percent are in ST, 47.70 percent are in OBC, 0.30 percent are disabled and 1.30 percent are drop outs. Similarly in case of upper primary, it is 5.40 percent for repeaters, 19.90 percent for SC category, 3.40 percent for ST, 40.30 percent for OBC, 0.30 percent for disabled and 1.10 percent for drop-outs.

In case of Government schools, out of the total students enrolled in primary classes in Jaisalmer district, 21.10 percent are repeaters, 20.80 percent are in SC category, 4.50 percent are in ST, 48.50 percent are in OBC, 0.30 percent are disabled and 0.80 percent are drop outs. Similarly in case of upper primary, it is 8.00 percent for repeaters, 23.00 percent for SC category, 2.70 percent for ST, 42.80 percent for OBC, 0.20 percent for disabled and 1.10 percent for drop outs.

In case of private Schools, out of the total students enrolled in primary classes in Jaisalmer district, 0.00 percent are repeaters, 7.50 percent are in SC category, 7.00 percent are in ST, 42.50 percent are in OBC, 0.10 percent are disabled and

5.00 percent are drop outs. Similarly in case of upper primary, it is 0.60 percent for repeaters, 14.20 percent for SC category, 4.70 percent for ST, 35.70 percent for OBC, 0.40 percent for disabled and 1.00 percent for drop-outs.

Genderwise and social categorywise students' enrollment in the schools for 2009-10

Overall, in the three districts, 50,908 students are enrolled in primary and upper primary classes, out of which, 36,837 students are enrolled in primary classes 14,071 in upper primary classes. Out of total students enrolled in primary classes, 22,193 (60.24 percent) are enrolled in government schools and 14,644 (39.75 percent) in Private schools. Out of total students enrolled in upper primary classes, 7550 (53.65 percent) are enrolled in government schools and 6,521 (46.34 percent) in Private schools (See table 32).

With regards to total students enrolled in primary classes in the 3 district, 52.76 percent are boys and 47.23 percent are girls. Overall, 71.98 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 73.63 percent boys were present. Similarly out of total enrolled girls, 69.98 percent were present.

In SC category overall, 67.99 percent students were present out of the total students enrolled in SC category. In case of boys, this is 70.57 percent and in case of girls, this is 64.73 percent respectively.

In ST category overall, 67.14 percent students were present out of the total students enrolled in ST category. In case of boys, this is 70.55 percent and in case of girls, this is 62.95 percent respectively.

Among the 3 district, overall, in the Ajmer district total enrollment in primary classes on the day of survey is 19622, out of which 3926 (20.01 percent) students are in SC category and 427 (2.18 percent) students are in ST category. Out of total enrollment on the day of survey , 50.69 percent are boys and 49.31 percent are girls.

Overall, 76.60 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 80.01 percent boys were present. Similarly out of total enrolled girls, 73.09 percent were present.

In SC category overall, 70.22 percent students were present out of the total students enrolled in SC category. In case of boys, this is 73.25 percent and in case of girls, this is 66.59 percent respectively.

In ST category overall, 55.04 percent students were present out of the total students enrolled in ST category. In case of boys, this is 62.50 percent and in case of girls, this is 44.69 percent respectively.

Overall, in the Ajmer district total enrollment in upper primary classes on the day of survey is 8442, out of which, 1448 (17.15 percent) students are in SC category and 163 (1.93 percent) students are in ST category. Out of total enrollment on the day of survey , 57.49 percent are boys and 42.51 percent are girls.

Overall, 67.52 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 64.25 percent boys were present. Similarly out of total enrolled girls, 71.94 percent were present.

In SC category overall, 61.05 percent students were present out of the total students enrolled in SC category. In case of boys, this is 66.24 percent and in case of girls, this is 53.34 percent respectively.

In ST category overall, 49.69 percent students were present out of the total students enrolled in ST category. In case of boys, this is 53.57 percent and in case of girls, this is 45.57 percent respectively.

Overall, in the Ajmer district total enrollment upto upper primary on the day of survey is 28064, out of which, 5374 (19.15 percent) students are in SC category and 590 (2.10 percent) students are in ST category. Out of total enrollment on the day of survey , 52.74 percent are boys and 47.26 percent are girls.

Overall, 73.87 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 74.84 percent boys were present. Similarly out of total enrolled girls, 72.78 percent were present.

In SC category overall, 67.75 percent students were present out of the total students enrolled in SC category. In case of boys, this is 71.23 percent and in case of girls, this is 63.33 percent respectively.

In ST category overall, 53.56 percent students were present out of the total students enrolled in ST category. In case of boys, this is 60.24 percent and in case of girls, this is 44.96 percent respectively.

Overall, in the Dausa district total enrollment in primary classes on the day of survey is 11890, out of which, 2955 (24.85 percent) students are in SC category and 3573 (30.05 percent) students are in ST category. Out of total enrollment on the day of survey , 53.51 percent are boys and 46.49 percent are girls.

Overall, 74.52 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 76.97 percent boys were present. Similarly out of total enrolled girls, 71.71 percent were present.

In SC category overall, 72.28 percent students were present out of the total students enrolled in SC category. In case of boys, this is 74.40 percent and in case of girls, this is 69.86 percent respectively.

In ST category overall, 71.96 percent students were present out of the total students enrolled in ST category. In case of boys, this is 77.50 percent and in case of girls, this is 65.95 percent respectively.

Overall, in the Dausa district total enrollment in upper primary classes on the day of survey is 4153, out of which 952 (22.92 percent) students are in SC category and 1340 (32.27 percent) students are in ST category. Out of total enrollment on the day of survey , 61.83 percent are boys and 38.17 percent are girls.

Overall, 63.79 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 62.77 percent boys were present. Similarly out of total enrolled girls, 65.43 percent were present.

In SC category overall, 58.19 percent students were present out of the total students enrolled in SC category. In case of boys, this is 57.02 percent and in case of girls, this is 60.05 percent respectively.

In ST category overall, 62.39 percent students were present out of the total students enrolled in ST category. In case of boys, this is 61.48 percent and in case of girls, this is 63.77 percent respectively.

Overall, in the Dausa district total enrollment upto upper primary on the day of survey is 16043, out of which 3907 (24.35 percent) students are in SC category and 4913 (30.62 percent) students are in ST category. Out of total enrollment on the day of survey , 55.66 percent are boys and 44.34 percent are girls.

Overall, 71.74 percent students were present on the day of survey, out of the total enrolled students. Out of the total boys enrolled, 72.89 percent boys were present. Similarly out of total enrolled girls, 70.31 percent were present.
In SC category overall, 68.85 percent students were present out of the total students enrolled in SC category. In case of boys, this is 69.70 percent and in case of girls, this is 67.79 percent respectively.

In ST category overall, 69.35 percent students were present out of the total students enrolled in ST category. In case of boys, this is 72.64 percent and in case of girls, this is 65.43 percent respectively.

Overall, in the Jaisalmer district total enrollment in primary classes on the day of survey is 5368, out of which 978 (18.22 percent) students are in SC category and 254 (4.73 percent) students are in ST category. Out of total enrollment on the day of survey , 57.04 percent are boys and 42.96 percent are girls.

Overall, 63.11 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 70.02 percent boys were present. Similarly out of total enrolled girls, 53.95 percent were present.

In SC category overall, 63.91 percent students were present, out of the total students enrolled in SC category. In case of boys, this is 69.44 percent and in case of girls, this is 57.70 percent respectively.

In ST category overall, 55.91 percent students were present out of the total students enrolled in ST category. In case of boys, this is 60.26 percent and in case of girls, this is 48.98 percent respectively.

Overall, in the Jaisalmer district total enrollment in upper primary classes on the day of survey is 1353, out of which 260 (19.22 percent) students are in SC category and 58 (4.29 percent) students are in ST category. Out of total enrollment on the day of survey , 73.10 percent are boys and 26.90 percent are girls.

Overall, 70.66 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 73.31 percent boys were present. Similarly out of total enrolled girls, 63.46 percent were present.

In SC category overall, 75.38 percent students were present out of the total students enrolled in SC category. In case of boys, this is 73.12 percent and in case of girls, this is 81.08 percent respectively.

In ST category overall, 67.24 percent students were present out of the total students enrolled in ST category. In case of boys, this is 59.18 percent and in case of girls, this is 111.11 percent respectively.

Overall, in the Jaisalmer district total enrollment upto upper primary on the day of survey is 6721, out of which 1238 (18.42 percent) students are in SC category and 312 (4.64 percent) students are in ST category. Out of total enrollment on the day of survey , 60.27 percent are boys and 39.73 percent are girls.

Overall, 64.63 percent students were present on the day of survey out of the total enrolled students. Out of the total boys enrolled, 70.82 percent boys were present. Similarly out of total enrolled girls, 55.24 percent were present.
In SC category overall, 66.32 percent students were present, out of the total students enrolled in SC category. In case of boys, this is 70.41 percent and in case of girls, this is 60.93 percent respectively.

In ST category overall, 58.01 percent students were present, out of the total students enrolled in ST category. In case of boys, this is 60.00 percent and in case of girls this is 54.21 percent respectively.

Other important aspects

Cooperation of Headmaster in giving information easily

Overall, in the 3 districts in 67.56 percent schools cooperation of Headmaster was good, in 27.76 percent cooperation of Headmaster was very good whereas, in 4.68 percent schools this cooperation was satisfactory in giving information easily in Government Schools. In case of Private schools, this percentage was 39.33 percent for good, 25.84 percent for very good and 11.24 percent for satisfactory (See table 36).

Among the 3 districts, in Ajmer district, in 69.85 percent schools cooperation of Headmaster was good, in 25.00 percent cooperation of Headmaster was very good whereas, in 5.15 percent schools this cooperation was satisfactory in giving information easily in Government Schools. In case of Private schools, this percentage was 56.82 percent for good, 29.55 percent for very good and 13.64 percent for satisfactory. In Dausa district in 57.45 percent schools cooperation of Headmaster was good, in 35.11 percent cooperation of Headmaster was very good whereas, in 7.45 percent schools this cooperation was satisfactory in giving information easily in Government Schools. In case of Private schools, this percentage was 8.33 percent for good, 22.22 percent for very good and 11.11 percent for satisfactory. In Jaisalmer district, in 76.81 percent schools cooperation of Headmaster was good, in 23.19 percent cooperation of Headmaster was very good in giving information easily in Government Schools. In case of Private schools this percentage was 77.78 percent for good and 22.22 percent for very good.

Principal could provide information easily

Overall, in the three districts, in 74.92 percent schools the way in which Principal could provide information was very good, in 18.73 percent schools it was good, in 18.73 percent schools it was satisfactory whereas in 0.33 percent schools it was bad in case of Government schools. In case of Private schools, this percent was 87.64 percent for very good, 12.36 percent for good and 7.87 percent for satisfactory(See table 36).

Among the 3 districts, in Ajmer district, in 96.32 percent schools the way in which Principal could provide information was very good and in 3.68 percent schools it was good in case of Government schools. In case of Private schools, this percent was 90.91 percent for very good and 9.09 percent for good. In Dausa district, in 37.23 percent schools the way in which Principal could provide information was very good, in 53.19 percent schools it was good, in 7.45 percent schools it was satisfactory whereas, in 1.06 percent schools it was bad in case of Government schools. In case of Private schools this percent was, 88.89 percent for very good and 11.11 percent for good. In Jaisalmer district, in 84.06 percent schools the way in which Principal could provide information was very good , in 1.45 percent schools it was good, in 71.01 percent schools it was satisfactory in case of Government schools. In case of Private schools, this percent was 66.67 percent for very good, 33.33 percent for good and 77.78 percent for satisfactory.

Information given by single register only

Overall, in the 3 district in 67.22 percent government and 67.42 percent private schools, information given by single register only. In Ajmer district, this percent was 51.47 percent for government and 65.91 percent for private schools. In Dausa district, this percent was 67.02 percent for government and 61.11 percent for private schools. In Jaisalmer district, this percent was 98.55 percent for government and 100.00 percent for private schools(See table 36).

Maintenance of attendance register

Overall, in the 3 district in 99.00 percent government and 97.75 percent private schools attendance register was properly maintained. In Ajmer district, this percent was 99.26 percent for government and 97.73 percent for private schools. In Dausa district, this percent was 98.94 percent for government and 97.22 percent for private schools. In Jaisalmer district, this percent was 98.55 percent for government and 100.00 percent for private schools(See table 36).

Availability of students' enrollment in category

Overall, in the 3 district in 80.27 percent government and 78.65 percent private schools, category wise students' enrollment were available. In Ajmer district, this percent was 69.85 percent for government and 77.27 percent for private schools. In Dausa district, this percent was 87.23 percent for government and 80.56 percent for private schools. In Jaisalmer district, this percent was 91.30 percent for government and 77.78 percent for private schools(See table 36).

Availability of report card of school

Overall, in the 3 district in 70.23 percent government and 62.92 percent private schools, school report card were available. In Ajmer district, this percent was 69.12 percent for government and 75.00 percent for private schools. In Dausa district, this percent was 51.06 percent for government and 38.89 percent for private schools. In Jaisalmer district, this percent was 98.55 percent for government and 100.00 percent for private schools(See table 36).

Preserving records properly

Overall, in the 3 district 70.23 percent government and 62.92 percent private schools were preserving records properly. In Ajmer district, this percent was 97.79 percent for government and 95.45 percent for private schools. In Dausa district, this percent was 94.68 percent for government and 97.22 percent for private schools. In Jaisalmer district, this percent was 98.55 percent for government and 88.89 percent for private schools(See table 36).

Teachers reaching school in time

Overall, in the 3 district in 97.32 percent government and 97.75 percent private schools, teachers were reaching school in time. In Ajmer district, this percent was 99.26 percent for government and 100.00 percent for private schools. In Dausa district, this percent was 100.00 percent for government and 100.00 percent for private schools. In Jaisalmer district, this percent was 89.86 percent for government and 77.78 percent for private schools(See table 36).

Availability of DISE format

Overall, in the 3 districts in 73.58 percent government and 69.66 percent private schools, DISE format was available. In Ajmer district, this percent was 92.65 percent for government and 75.00 percent for private schools. In Dausa district, this percent was 94.68 percent for government and 80.56 percent for private schools. In Jaisalmer district, this percent was 7.25 percent for government and 0.00 percent for private schools(See table 36).

Problem faced by enumerator in collecting information

Overall, in the 3 districts in 21.74 percent government and 15.73 percent private schools, enumerator faced the problem in collecting information. In Ajmer district, this percent was 3.68 percent for government and 11.36 percent for private schools. In Dausa district, this percent was 8.51 percent for government and 5.56 percent for private schools. In Jaisalmer district, this percent was 75.36 percent for government and 77.78 percent for private schools (See table 36).

Availability of display boards in the school

Overall, in the 3 districts, in 67.56 percent government and 49.44 percent private schools, display boards were available in the school. In Ajmer district, this percent was 50.74 percent for government and 50.00 percent for private schools. In Dausa district, this percent was 70.21 percent for government and 50.00

percent for private schools. In Jaisalmer district, this percent was 97.10 percent for government and 44.44 percent for private schools (See table 36).

Facility of midday meal in school

Overall, in the 3 district in 97.66 percent government and 11.24 percent private schools, midday meal facility was available in the school. In Ajmer district, this percent was 97.06 percent for government and 13.64 percent for private schools. In Dausa district, this percent was 96.81 percent for government and 0.00 percent for private schools. In Jaisalmer district, this percent was 100.00 percent for government and 44.44 percent for private schools (See table 36).

Quality of midday meal in school

Overall, in the 3 districts in 25.00 percent schools, quality of midday meal was good, in 73.63 percent, quality of midday meal was satisfactory, whereas in 4.68 percent schools, the quality was not satisfactory in Government Schools. In case of Private schools, in 100.00 percent schools, the quality of midday meal was good (See table 36).

Among the 3 districts, in Ajmer district, in 34.85 percent schools quality of midday meal was good, in 63.64 percent quality of midday meal was satisfactory, whereas in 1.52 percent schools this quality was not satisfactory in Government Schools. In case of Private schools, in 100.00 percent schools quality of midday meal was good.

In Dausa district in Government Schools, in 16.48 percent schools quality of midday meal was good, in 81.32 percent quality of midday meal was satisfactory whereas, in 2.20 percent schools, the quality was not satisfactory. In case of Private schools, data is not available. In Jaisalmer district, in 17.39 percent schools quality of midday meal was good, in 82.61 percent quality of midday meal was satisfactory in Government Schools. In case of Private schools, in all the schools quality of midday meal was good.

Chapter 4

Chapter 4 Conclusions and Recommendations

Background

The Directorate of Economics and Statistics has been commissioned to conduct a Study on the 5% post enumeration check of the DISE data. The District Statistical Officers (DSOs) and Statistical Assistants (SA) were entrusted with the task of collecting data by canvassing a semi-structured schedule called the special DCF.

Major Findings

In all, 51,859 and 50,908 students have been reported to be enrolled in the 388 schools in the years 2008-09 and 2009-10 respectively. There is a slight decline in the number of students enrolled. The data reveals that the total number of girls enrolled per 1,000 boys in the three districts has increased from 806 in 2008-09 to 825 in 2009-10. The percentage increase in girls' enrollment per 1,000 boys is highest in Dausa district at 4.18 percent.

Table 14 : Total enrollment by gender in the three districts in 5% PES, 2010

Districts	*Total Sampled Schools*	*Total Enrollment, 2008-09*	*Total Enrollment, 2009-10*	*No. of Girls per 1,000 Boys enrolled, 2008-09*	*No. of Girls per 1,000 Boys enrolled, 2009-10*	*% change in girls per 1,000 boys enrolled*
Total of three districts	**388**	**51,859**	**50,908**	**806**	**825**	**2.36**
Ajmer	180	28,036	28,157	871	882	1.26
Dausa	130	16,745	16,040	766	798	4.18
Jaisalmer	78	7,078	6,711	665	673	1.20

With regards to the enrollment by social category, the percentage of ST enrolled is quite low compared to SC and others at 12.05 percent in the total of three districts in the year 2008-09. It has still declined to 11.33 percent in 2009-10, which is a matter of concern in the 5% of the schools covered in the three districts.

Table 15 : Percentage SC and ST enrolled in the three districts in 5% PES, 2010

Districts	*Total Sampled Schools*	*% of SC enrolled out of total enrolled, 2008-09*	*% of SC enrolled out of total enrolled, 2009-10*	*% of ST enrolled out of total enrolled, 2008-09*	*% of ST enrolled out of total enrolled, 2009-10*
Total of three districts	**388**	**20.07**	**20.50**	**12.05**	**11.33**
Ajmer	180	18.80	18.96	2.71	2.00
Dausa	130	22.55	24.53	30.84	30.13
Jaisalmer	78	19.20	17.33	4.56	5.59

The percentage of drop-outs has increased in the 5% schools, reveals that there is a slight increase in the percentage of drop-outs from 1.65 percent in 2008-09 to 1.95 percent in 2009-10. This is more in case of boys (21.4 percent) compared to girls (9.1 percent).

Table 16 : Percentage distribution of status of drop-outs in the three districts for the year 2008-09 and 2009-10 in PES

Particulars	Total of 3 districts, 2008-09			Total of 3 districts, 2009-10			% change		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
Drop-outs	472	386	858	573	421	994	21.4	9.1	15.9
(%)	1.64	1.67	1.65	2.05	1.83	1.95			

Facilities in schools

With regards to the availability of facilities of like playground, common toilets, girls' toilet, separate toilet for teachers and other staff, electricity, drinking water facility and computers, on an average Jaisalmer is seems to be deprived as it is low in availability of playgrounds, common toilets, separate toilets for teachers and other staff and availability of drinking water facility.

Student class room ratio

With regards to infrastructure, overall in the 3 districts Student-Class room ratio is 25.80. For government schools this ratio is 23.76 whereas for private schools this ratio is 29.24. Among the three district, this ratio is highest in Ajmer (27.57) followed by Dausa (25.75) and lowest in Jaisalmer (20.43). For government schools this ratio is highest in Ajmer (25.67) followed by Dausa (22.71) and lowest in Jaisalmer (20.88). For private schools this ratio is highest in Ajmer (30.32) followed by Dausa (30.23) and lowest in Jaisalmer (18.64).

Pupil Teacher ratio

Overall in the 3 districts Pupil Teacher ratio is 25.05. For government schools this ratio is 24.29 whereas for private schools this ratio is 26.17. Amongst the three districts, the Pupil teacher ratio for Government Schools as per DISE data reveals that it is highest in Dausa district (33.39) followed by Jaisalmer (29.70) and Ajmer (29.67). As per the PES data of 5 percent sample checking, it is highest in case of Jaisalmer (32.49) followed by Dausa (28.56) and Ajmer (20.75).

Table 17 : Student-Classroom ratio and Pupil Teacher ratio in the three districts for the year 2009-10 in PES

Ratio	Type	AJMER	DAUSA	JAISALMER	TOTAL OF THREE DISTRICTS
Student-Class room ratio	Government	25.67	22.71	20.88	23.76
	Private	30.32	30.23	18.64	29.24
	Total	**27.57**	**25.75**	**20.43**	**25.80**
Pupil Teacher Ratio (PTR)					
	Government	20.75	28.56	32.49	24.29
	Private	25.47	28.22	22.36	26.17
	Total	**22.63**	**28.39**	**30.00**	**25.05**

In case of the percentage of pupils of classes upto class V (primary), who passed, it is highest in case of Dausa (98.05 percent) followed by Jaisalmer (91.68 percent) and Ajmer (90.04 percent). In case of the percentage of pupils of classes VI to class VIII (upper primary), who passed, it is highest in case of Dausa (80.77 percent) followed by Ajmer (75.14 percent) and Jaisalmer (64.66 percent).

Table 18a : Pass percentage of students in three districts for the year 2007-08 in PES

Percentage Passed	TYPE	AJMER	DAUSA	JAISALMER	TOTAL OF THREE DISTRICTS
Pass percent of upto Class V students (Primary)	Government	93.57	98.87	100.00	96.41
	Private	96.99	100.00	100.00	98.20
	Total	**94.91**	**99.28**	**100.00**	**97.03**
Pass percent of class VI to VIII students (Upper Primary)	Government	67.21	65.56	75.61	67.93
	Private	87.28	87.42	95.80	87.96
	Total	**75.89**	**78.81**	**82.32**	**77.48**

Table 18b : Pass percentage of students in three districts for the year 2008-09 in PES

Percentage Passed	TYPE	AJMER	DAUSA	JAISALMER	TOTAL OF THREE DISTRICTS
Pass percent of upto Class V students (Primary)	Government	92.28	99.29	97.25	95.45
	Private	97.75	99.52	100.00	98.53
	Total	**94.53**	**99.39**	**97.60**	**96.63**
Pass percent of class VI to VIII students (Upper Primary)	Government	67.97	80.40	51.03	68.75
	Private	89.20	82.17	86.34	86.08
	Total	**76.73**	**81.52**	**66.54**	**77.13**

Conclusions

There seems to be some variation between the regular DISE data captured by the DCF and the special DCF of PES data. With regards to the findings of the 5% PES of the schools, the following are a matter of concern:

1. There is a slight decline in the enrollment of Scheduled tribes
2. There is low availability of facilities in the schools of Jaisalmer with regards to availability of playgrounds, common toilets, separate toilets for teachers and other staff and availability of drinking water facility.

Recommendations

The following are some of the recommendations based on field experience:

- The system of DISE needs to be popularized by the School education department by making it usable at the district administration level to identify low performing panchayat samitis and panchayats and by the schools.

- The DISE formats should also be made available at all schools without fail as in the PES, it is revealed that in the 5% schools that the survey was carried out, in Jaisalmer district, in only 7.25 percent of schools the DISE format was available in the Govt schools.

- There needs to be periodic dissemination of data and feedback needs to be taken from the community level.

- Strict Monitoring of the DISE DCF formats needs to be done to ensure quality of data and reduce variation.

- The DISE data should be made available in excel format on the website, so that further analysis could be done on it easily.

- The focus needs to be on other indicators in addition to Gross and Net enrolment ratio.

Hand pump (1)/ Well (2)/ Tap Water (3)/ Others (4)/ No Drinking water facility available (5)

11. Does the School have a Playground? (Yes=1/ No=2) ☐

12. Number of Computers available in good working condition. ☐☐

13. Seating arrangement for children in school: (Enter Code) ☐
Furniture for all students (1)/ Furniture for some students (2)/ No furniture- children sit on the floor (3)

E. Student Enrolment

1. Children Enrolled in the Last Academic Year

(Academic Year: .....)

Enrolment	Class 1		Class 2		Class 3		Class 4		Class 5		Class 6		Class 7		Class 8	
	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G
Total Enrolment																
Repeaters																
SC Children Enrolled																
ST Children Enrolled																
OBC Children Enrolled																
Children with Disabilities																
Number of Children who left the School																

B: Boys G: Girls

2. Enrolment and Attendance Details of Children on the Day of the Survey

Class	Enrolment on the Day of the Survey						Attendance the Day of the Survey					
	Total		SC		ST		Total		SC		ST	
	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls
Class I												
Class II												
Class III												
Class IV												
Class V												
Class VI												
Class VII												
Class VIII												

N.B.: 'Enrolment' means, the number of children on rolls as entered in the school register.
'Attendance' means, the number of children physically present in the classroom on the day of the survey.

3. Children Enrolment in the Present Academic Year

(Academic Year: ……)

Enrolment	Class 1		Class 2		Class 3		Class 4		Class 5		Class 6		Class 7		Class 8	
	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G
Total Enrolment																
Repeaters																
SC Children Enrolled																
ST Children Enrolled																
OBC Children Enrolled																
Children with Disabilities																
Number of Children who left the School																

B: Boys G: Girls

4. Grade-wise Examination details for which Annual Examination is conducted for the last Academic Year

(Academic Year: .....)

Grade	Enrolment at the end of the Academic Year						Appeared for the Examination						Passed in the Examination					
	Total		SC		ST		Total		SC		ST		Total		SC		ST	
	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G
Class IV/V																		
Class VII/VIII																		

5. Grade-wise Examination details for which Annual Examination is conducted for the Present Academic Year

(Academic Year: .....)

Grade	Enrolment at the end of the Academic Year						Appeared for the Examination						Passed in the Examination					
	Total		SC		ST		Total		SC		ST		Total		SC		ST	
	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G	B	G
Class IV/V																		
Class VII/VIII																		

Investigator Feedback Schedule

1. Name of the Person conducting the survey : _____

2. DISE School Code : ☐☐☐☐☐☐☐☐☐☐☐

3. Date of visit of the School : ……./……./……

4.Was the School open on the first day of the visit: (Yes = 1/ No = 2) ☐

5. If no when was the School visited second time (Date) : ……./……./……

6. Was the school open on the second visit: (Yes = 1/ No = 2) : ☐

7. Number of visits made to the school to get information : _____

(In case the school was closed on both the days, contact the BRC/CRC Coordinators for replacement of the schools to be surveyed. Replacement should be resorted only in exceptional cases.)

Attributes pertaining to the Principal /Head Teacher towards the investigation:

Attribute	Category of Response from the School				
	Very Good	Good	Average	Poor	Very Poor
Initial reaction of the Principal/Head Teacher					
Response of the Principal/Head Teacher to provide information					
Availability of Records					

1. Was the Principal /Head Teacher able to provide the information pertaining to enrolment and details of pass percentage easily? (Yes = 1/ No = 2): ☐

2. Was the Principal able to give the enrolment and other details from a single Register? (Yes = 1/ No = 2): ☐

3. Do the teachers in the school fill-up the attendance register properly? (Yes = 1/ No = 2): ☐

4. Does the principal have the year end summery details of Children for all grades available with him? (Yes = 1/ No = 2): ☐

5. Was the School Report Card available in the School? (Yes = 1/ No = 2): ☐

6.Are the attendance registers properly maintained and kept in the Almirahs?
(Yes = 1/ No = 2): ☐

7. Do the Teachers in the school come on time? (Yes = 1/ No = 2): ☐

8. Was the School having a photo copy of filled in DISE DCF? (Yes = 1/ No = 2): ☐

9. Did the investigator face any problem in getting the required information from the School? (Yes = 1/ No = 2): ☐

If yes, briefly mention the kind of problem faced by the investigator in eliciting the information from the school

(प्रधानाचार्य के हस्ताक्षर)

अन्वेषक प्रतिक्रिया अनुसूची

1. अन्वेषक का नाम जो सर्वेक्षण कर रहा है।
2. डाईस विद्यालय कोड
3. विद्यालय में सर्वे का दिनांक.....
4. क्या प्रथम बार जाने पर विद्यालय खुला था (हॉदक1/नहींदक2)
5. यदि नही, तो दूसरी यात्रा का दिनांक.....
6. क्या दूसरी बार जाने पर विद्यालय खुला था (हॉदक1/नहींदक2)
7. सूचना प्राप्त करने के लिए विद्यालय में की गई यात्राओ की संख्या.....

(यदि दोनो यात्रा के दौरान विद्यालय बन्द था तो बीआरसी/सीआरसी समन्वयक से विद्यालय बदलने के लिये सम्पर्क किया).....

निरीक्षण के दौरान प्रधानाचार्य/प्रमुख अध्यापक की प्रतिक्रिया

प्रतिक्रिया	विद्यालय से प्राप्त प्रतिउत्तर की श्रेणी				
प्रधानाचार्य/प्रमुख अध्यापक की प्रारंभिक प्रतिक्रिया	बहुत अच्छा	अच्छा	ओसत	खराब	बहुत खराब
प्रधानाचार्य/प्रमुख अध्यापक का सूचना देने में सहयोग					
रेकार्ड की उपलब्धता					

1. क्या प्रधानाचार्य/प्रमुख अध्यापक ने बच्चों के नामांकन और उर्त्तीण प्रतिशत की जानकारी आसानी से दी (हॉदक1/नहींदक2)
2. क्या प्रधानाचार्य ने नामांकन एवं अन्य विवरण एक ही रजिस्टर से दिया है (हॉदक1/नहींदक2)
3. क्या विद्यालय में अध्यापक द्वारा उपस्थिति पंजिका को ठीक तरह से संधारण किया जा रहा हैं। (हॉदक1/नहींदक2)
4. क्या प्रधानाचार्य के पास सभी बच्चो का श्रेणीवार पूरे वर्ष का सांराश उपलब्ध है(हॉदक1/नहींदक2)
5. क्या विद्यालय में विद्यालय का रिपोर्ट कार्ड उपलब्ध है (हॉदक1/नहींदक2)
6. क्या उपस्थिति पंजिका ठीक से बनायी गयी है और आलमारी में सुरक्षित रखी गयी है। (हॉदक1/नहींदक2)
7. क्या अध्यापक विद्यालय में समय से आते है। (हॉदक1/नहींदक2)
8. क्या विद्यालय के पास डाइस/डीसीएफ की भरी हुई प्रतिलिपि थी (हॉदक1/नहींदक2)
9. क्या अन्वेषक को विद्यालय से जानकारी प्राप्त करने में कोई समस्या रही। (हॉदक1/नहींदक2)

(यदि हॉ तो समस्या का संक्षिप्त विवरण दे)

.....
.....
.....
.....
.....

(अगर उपलब्ध जगह पर्याप्त नहीं है, तो अलग कागज का प्रयोग करें)

10. क्या विद्यालय में डिस्प्ले बोर्ड है (हॉदक1/नहींदक2)
11. क्या विद्यालय में दोपहर के भोजन (मिड डे मिल)का प्रावधान है (हॉदक1/नहींदक2)
12. विद्यालय मे मिड डे मिल योजना अन्तर्गत बच्चो को दिये जा रहे भोजन की गुणवत्ता कैसी हैघ
    1. अच्छा हैं। 2. सन्तोषजनक हैं। 3. सन्तोषजनक नहीं हैं।
13. विद्यालय में बच्चो के लिये बैठने की क्या व्यवस्था है ।

(कृपया नीचे अपनी टिप्पणी दीजिये)
