

IMPROVE YOUR UDISE DATA ENTRY USING NETWORK COMPUTER

Hello Friends My Team is Found new Technique to Enter udise data in network computer. This technique is based on Server Client Model .SERVER SYSTEM

CLIENT SYSTEMS

CONFIGURATION SETTINGS FOR CLIENT SYSTEM

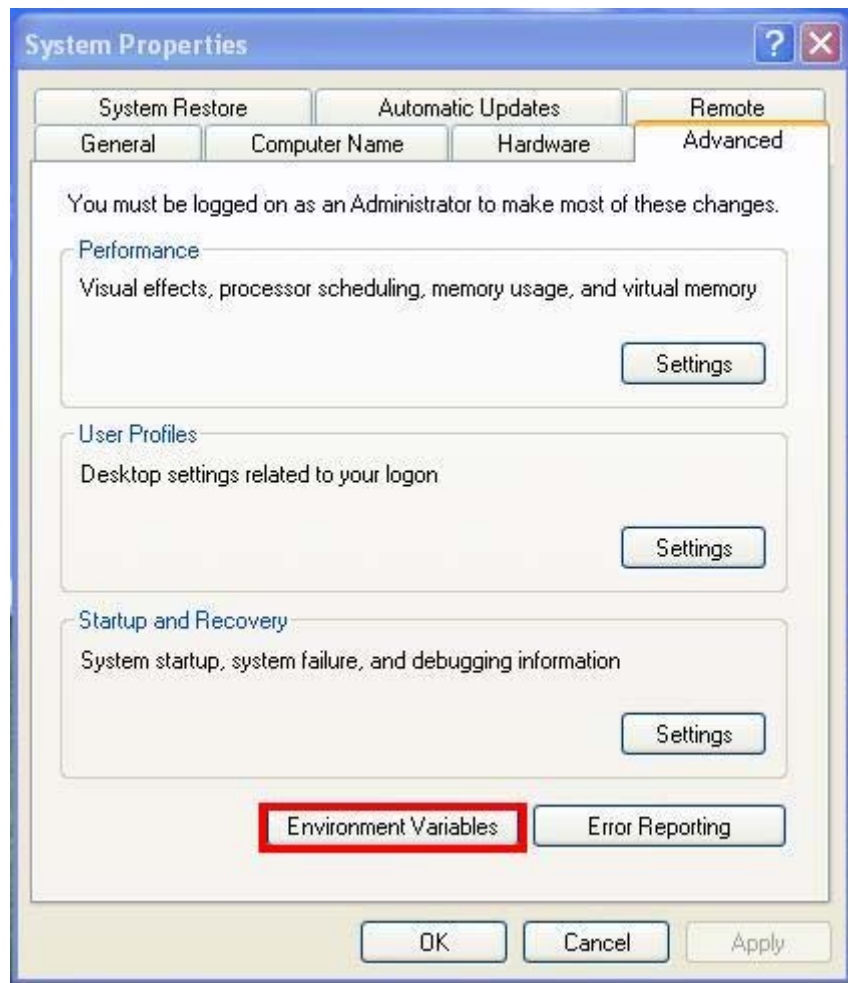

Installation Instruction for Oracle Instant Client ODBC

step 1 – Download Oracle_InstantClient and Extract to C: drive,It will create a directory C:\Oracle_InstantClient

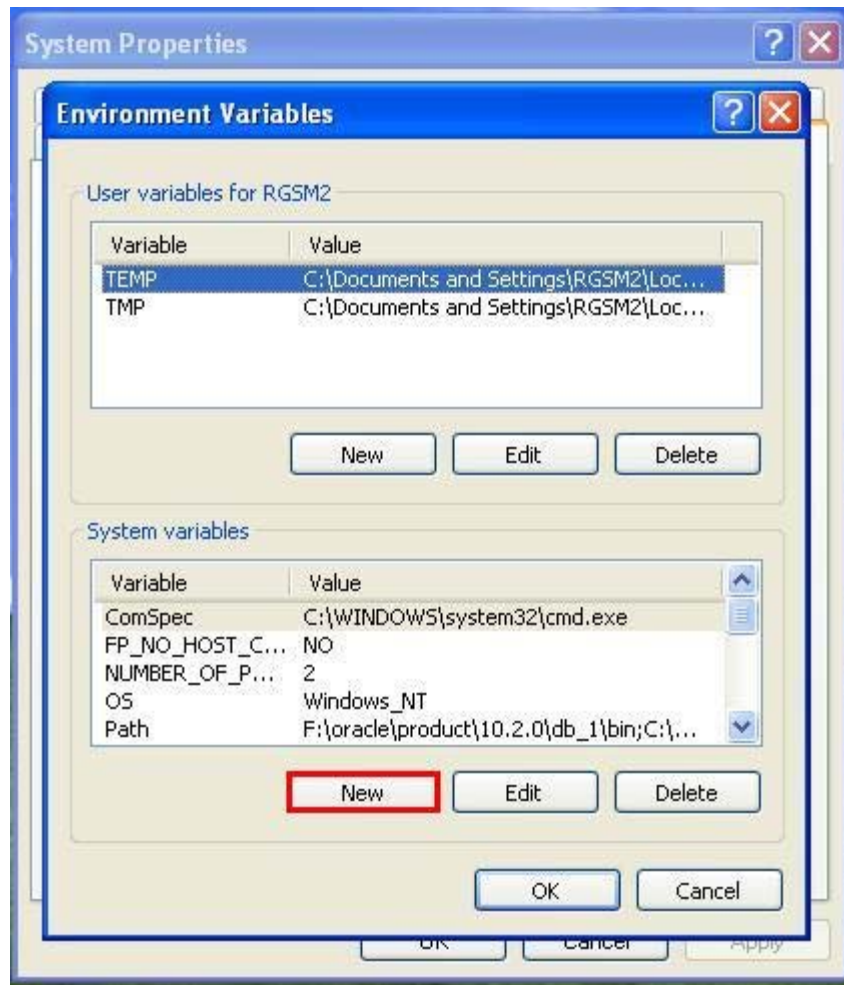

link=

step 2 - Right Click on my computer icon and click properties option. click advanced tab .

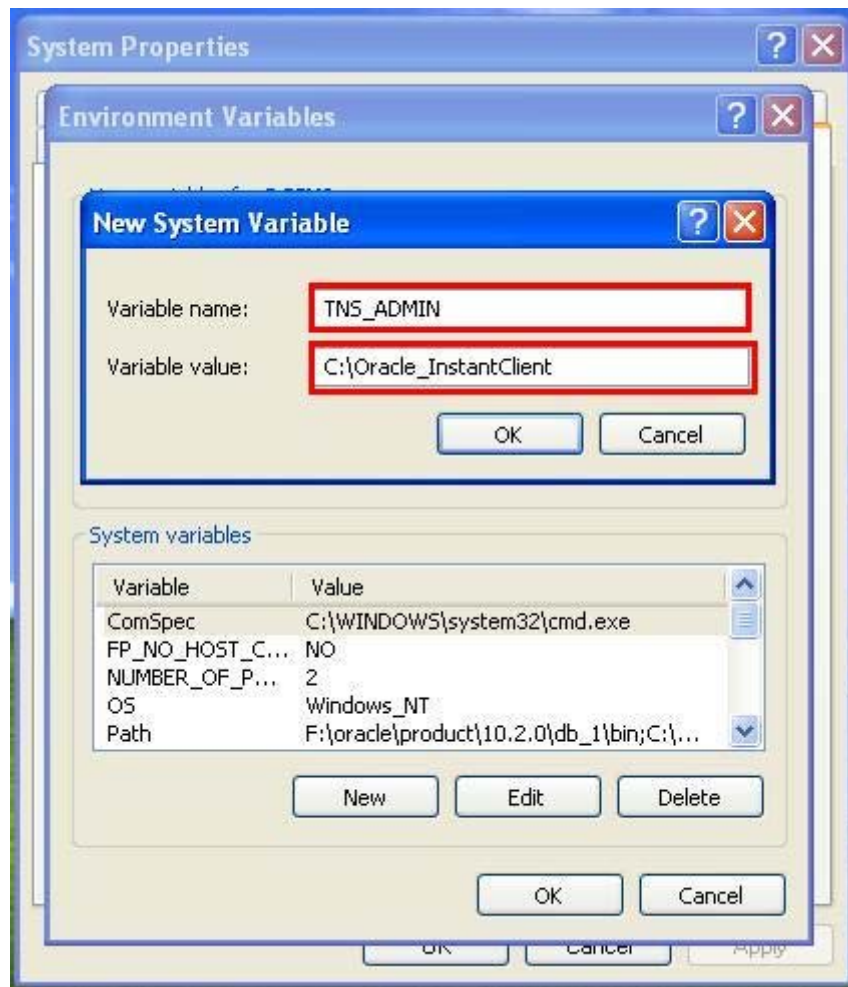

step 3 - click environment variable button.

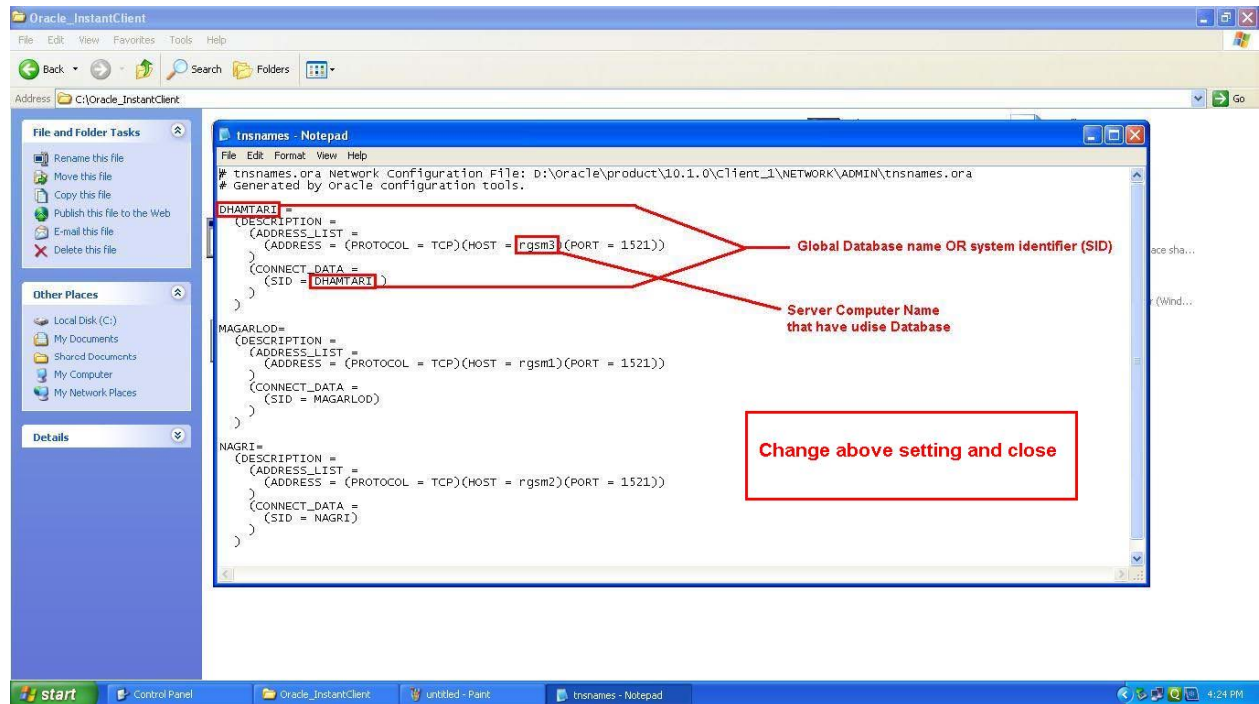

step 4 – click new button from system variables group

step 5 – type variable name “TNS_ADMIN” and variable value “C:\Oracle_InstantClient “ and click ok button then click ok button and then click ok button

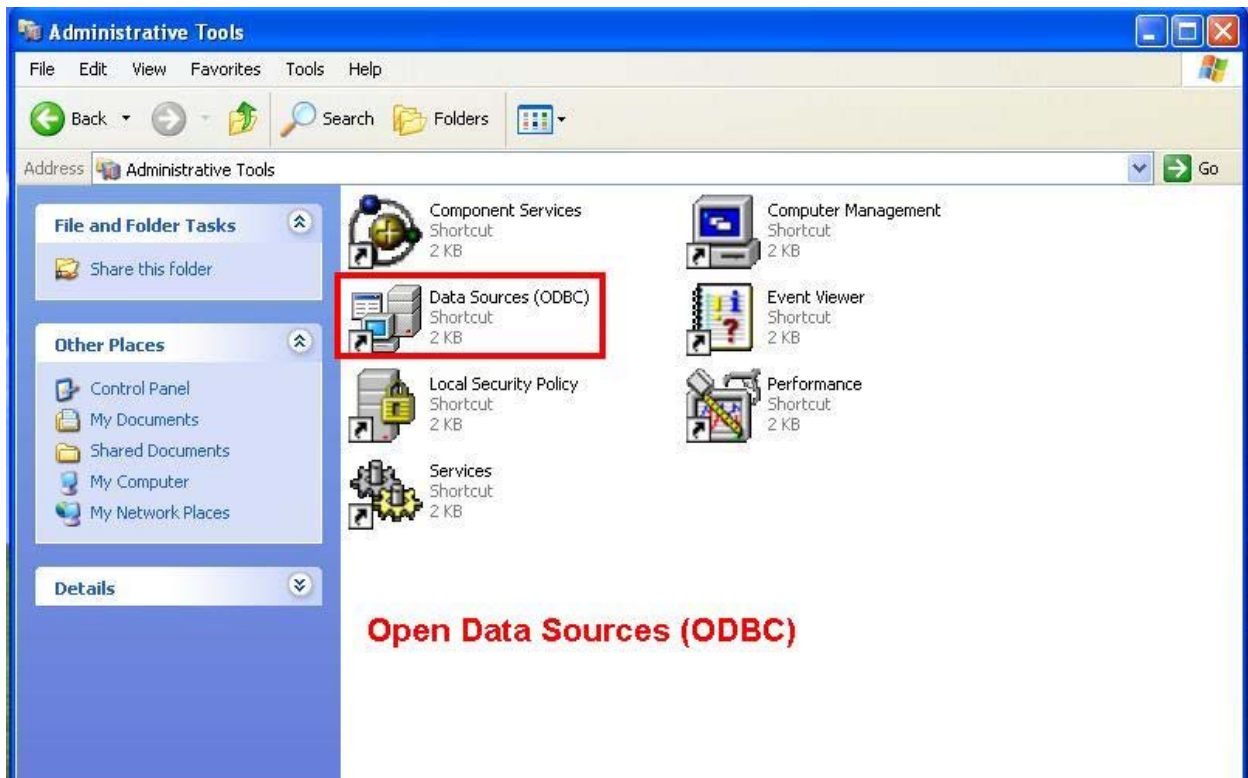

step 6 – now goto C:\Oracle_InstantClient directory and run odbc_install.bat (that run only few second and close automatically) then close all programs if you run and reboot your system

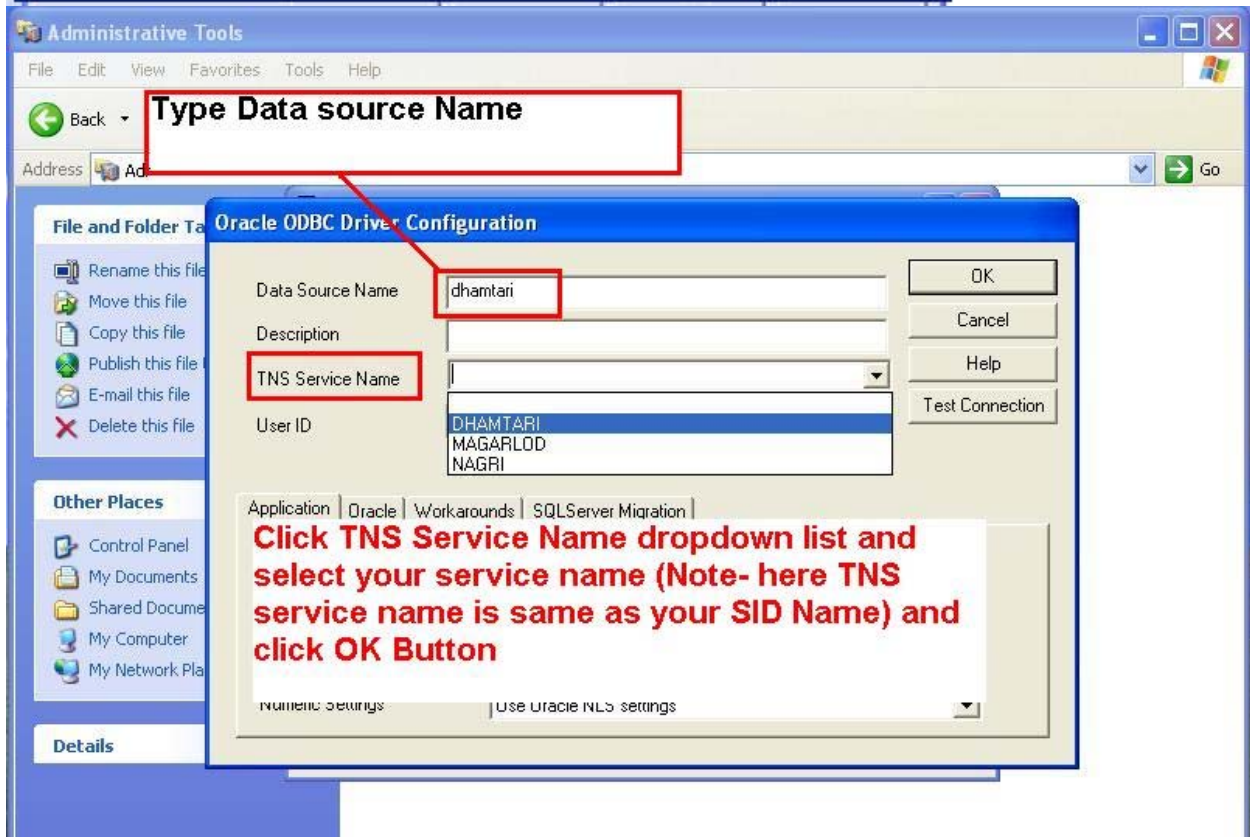

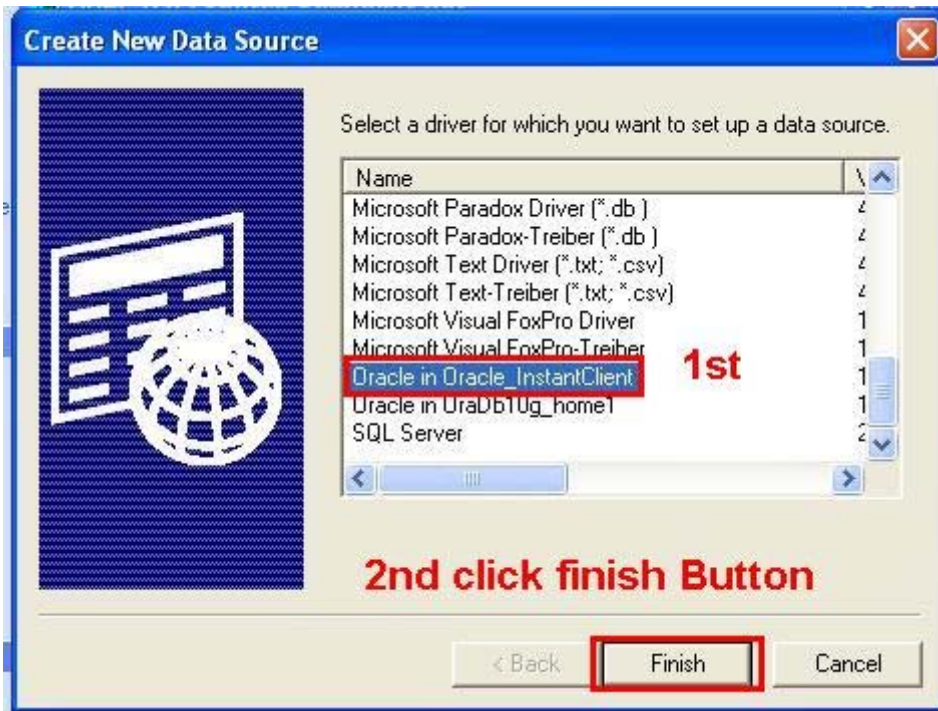

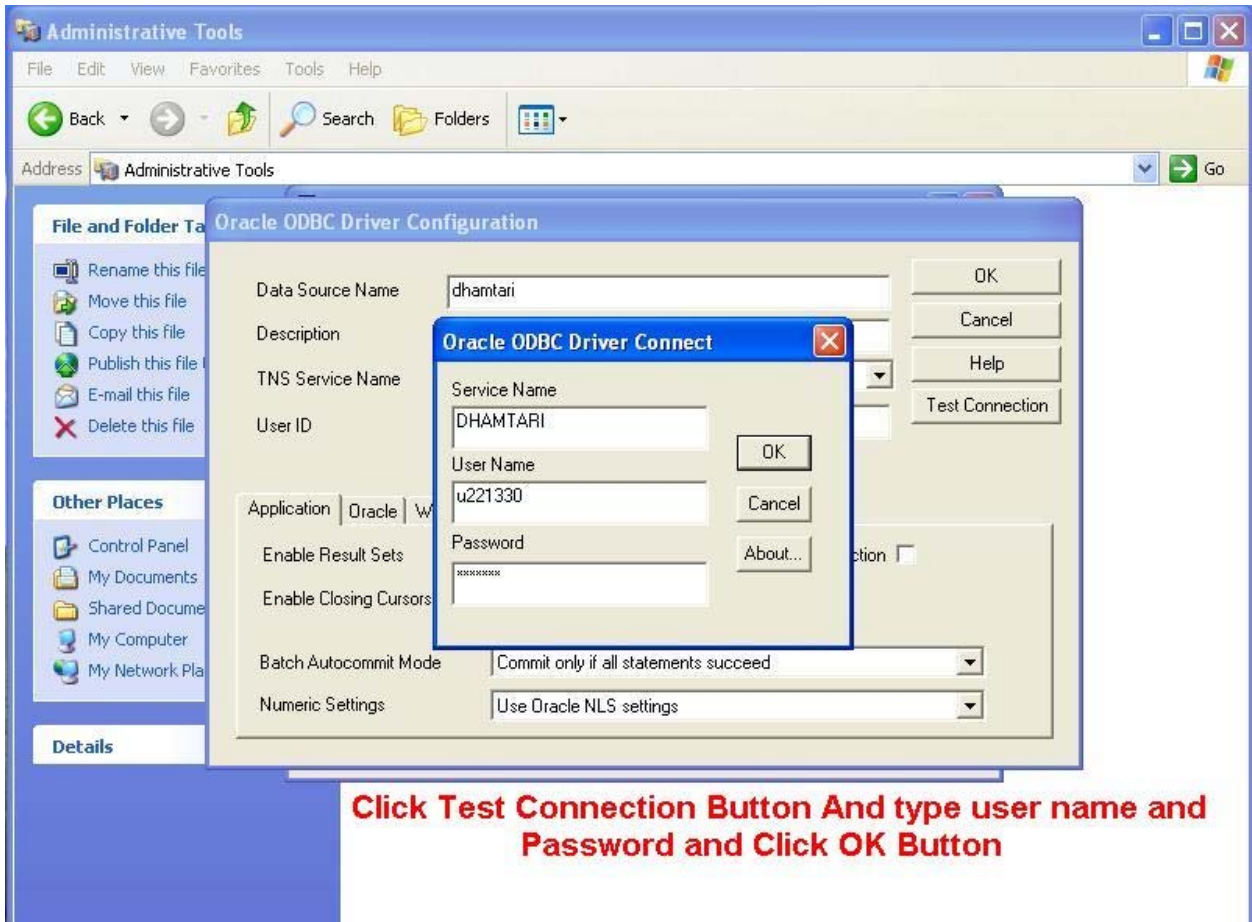

step 8 – goto control panel and open administrative tools

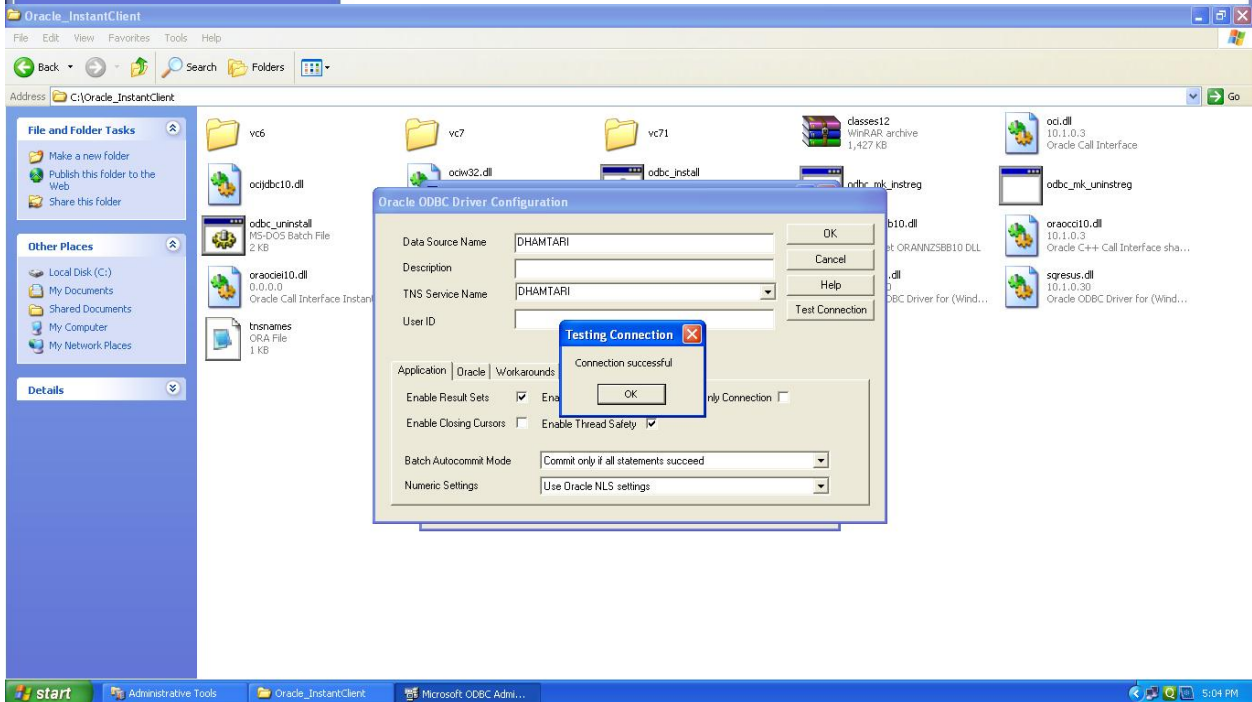

step 9 – open data sources (ODBC)

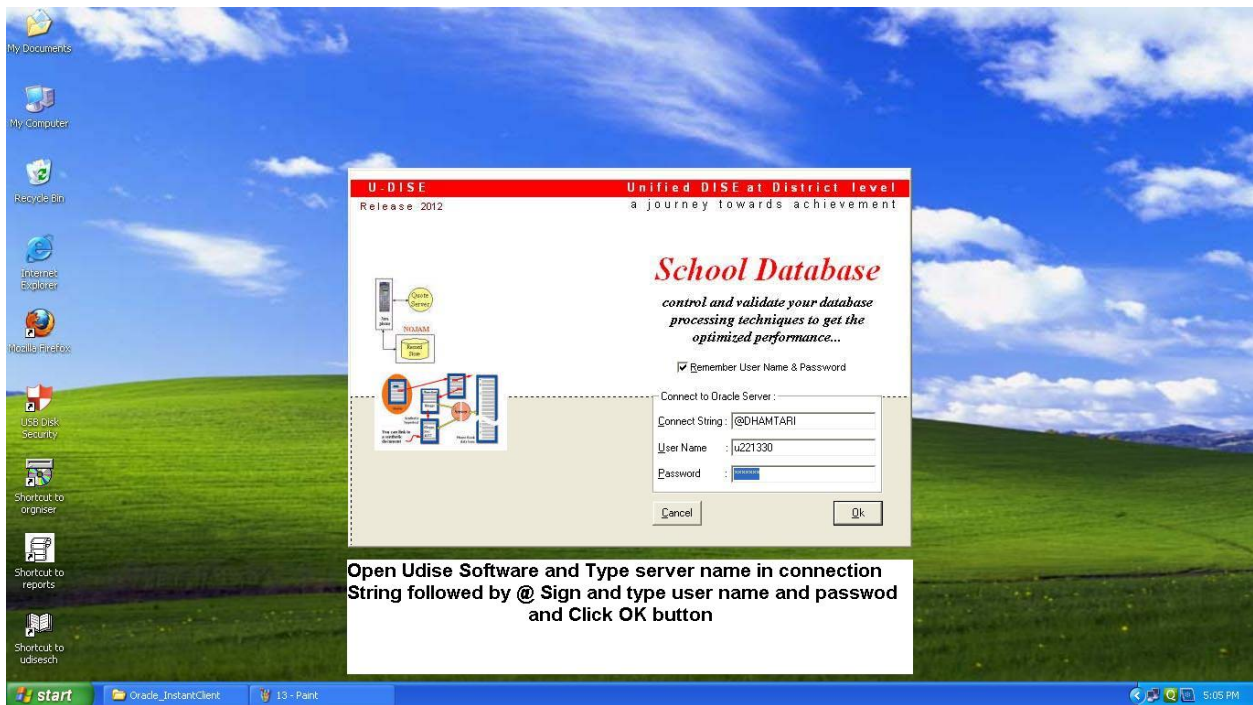

Click Test Connection Button And type user name and Password and Click OK Button

Unified - D I S E - School selection - 22133000101 (GOVT P. S. DHORABHATA)

Data Output Rows Report Card Exit

Search by School Name Filter 00 - All schools Build : 03.02.2013

Blocks 221330 - DHAMTARI Clusters Villages Panchayat Filter List Arguments Value

Total Schools: 520

Double click on the school to know the inconsistency. Enrolment is Zero Variables like school category, management, Pincode, teacher, toilet etc. details not given

Above configuration are tested by our UDISE Team.....

after configure client systems you can able to entering data more then one user on the network

REMEMBER:-

- 1 > Backup your Database before use above configuration.**
- 2>check yourudise entry is proper save on server.**
- 3>check your network cable is proper connected to system.**
- 4> don't disconnect while you enter dise data if by mistake disconnected your system first connect your computer to network and restart udise software and start data entry.**
